From the bestselling author of Team of Teams and My Share of the Task, an entirely new way to understand risk and master the unknown. Retired four-star general Stan McChrystal has lived a life associated with the deadly risks of combat. From his first day at West Point, to his years in Afghanistan, to his efforts helping business leaders

navigate a global pandemic, McChrystal has seen how individuals and organizations fail to mitigate risk. Why? Because they focus on the probability of something happening instead of the interface by which it can be managed. In this new book, General McChrystal offers a battle-tested system for detecting and responding to risk. Instead of defining risk as a force to predict, McChrystal and coauthor Anna Butrico show that there are in fact ten dimensions of control we can adjust at any given time. By closely monitoring these controls, we can maintain a healthy Risk Immune System that allows us to effectively anticipate, identify, analyze, and act upon the ever-present possibility that things will not go as planned. Drawing on examples ranging from military history to the business world, and offering practical exercises to improve preparedness, McChrystal illustrates how these ten factors are always in effect, and how by considering them, individuals and organizations can exert mastery over every conceivable sort of risk that they might face. We may not be able to see the future, but with McChrystal's hard-won guidance, we can improve our resistance and build a strong defense against what we know—and what we don't.

Take control of your personal finances with this concise, timely and indispensable guide, from acclaimed money expert Laura Whateley.

Half of the world's population has one, the other half sometimes comes into contact with it, and yet a great deal of ignorance exists regarding the penis.

Surprisingly many men think their penis is too short, even if it is above average in length. The fact that the morning erection is the last of eight nightly erections is a well-kept secret. Or that the foreskin, once unfolded, is as big as a postcard. Men always carry their penis with them, but they do not know it as well as they think.

In this book, urologist Piet Hoebeke clarifies the mysteries of the male reproductive organ. Accessibly and humouristically written, Hoebeke explains the penis: Why do we have one? What does it do? How do I keep it fit and healthy?

And of course: what to do when your foreskin gets stuck between the zipper of your pants?
