Japanese manufacturing investment in the European Community has grown dramatically over the last twenty years. At first, instances of investment were few, concentrated in a small number of industrial sectors. But since the mid-1980's there has been a surge of investment in a much wider range of industries. This volume details the growth of Japanese manufacturing investment in Europe in fourteen industrial sectors. The impact of Japanese competition and direct investment on European industries is considered in the context of the emergence of the three major trading blocs: the United States, Japan and the EC. Roger Strange concludes by making important policy recommendations, and arguing for the need for a new theoretical framework for assessing the political economy of foreign direct investment.

Derived from the renowned multi-volume International Encyclopaedia of Laws, this monograph provides a survey and analysis of the rules concerning intellectual property rights in Kenya. It covers every type of intellectual property right in depth – copyright and neighbouring rights, patents, utility models, trademarks, trade names, industrial designs, plant variety protection, chip protection, trade secrets, and confidential information. Particular attention is paid throughout to recent developments and trends. The analysis approaches each right in terms of its sources in law and in legislation, and proceeds to such legal issues as subject matter of protection, conditions of protection, ownership,

transfer of rights, licences, scope of exclusive rights, limitations, exemptions, duration of protection, infringement, available remedies, and overlapping with other intellectual property rights. The book provides a clear overview of intellectual property legislation and policy, and at the same time offers practical guidance on which sound preliminary decisions may be based. Lawyers representing parties with interests in Kenya will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative intellectual property law.
