Scientific and popular interest in dissociation and dissociative disorders has grown significantly in the past decade. Responding to the need for an authoritative reference on this topic, Steven Jay Lynn and Judith W. Rhue present an unusually comprehensive volume, covering the major aspects of dissociation--from the predominant models and diagnostic and treatment approaches, to significant research, clinical, and conceptual issues. Illuminating reading, *Dissociation* confronts many of the controversies and debates surrounding the topic. Founded on research and grounded in theory, it is an important addition to the scholarly literature. Laying the groundwork for the rest of the book, the first section discusses current theoretical and research perspectives on dissociation. Chapters set forth results of the latest research alongside actual clinical examples. In the second section, chapters present practical information designed to assist clinicians in diagnosing and treating clients suffering from dissociative disorders, post-traumatic stress disorders, and the consequences of sexual victimization and cult involvement. Fostering an appreciation for the ways in which social and cultural factors affect the expression of dissociative symptoms, this section also illustrates the ways in which transference and countertransference can affect dissociative symptoms and the treatment of multiple personality disorder, (MPD). The third section, on current issues and controversies, provides invaluable information for all

clinicians who encounter clients with dissociative disorders. Chapters probe such questions as whether trauma causes dissociative pathology, whether and under what circumstances pseudomemories of child abuse can be created, the relationship between conversion and dissociative disorders and their respective placement in diagnostic classification schemes, and areas of possible rapprochement between those who believe in MPD and those who are skeptical of the disorder. Offering the most significant contribution to scholarly coverage of dissociation to date, this highly provocative volume offers valuable insights for the clinician, as well as many new theories, hypotheses, and syntheses of the research literature. As such, *Dissociation* will be welcomed by anyone who encounters dissociative disorders in clinical practice. It is also a useful primary text for researchers and students of psychotherapy in a broad range of helping professions.

This book presents a close look at the golden age of Swedish pornography in the 1970s, with a specific focus on pornographic films screened in Malmö between 1971 and 1976. How, Mariah Larsson asks, was that one small city's embrace of the era's sexual liberation both representative and unique in relation to the rest of Sweden? Combining historical case studies with comprehensive analyses of advertisements, critical responses and censorship records, Larsson deconstructs the complexities and paradoxes of the Swedish porn scene. Looking as closely at the exhibition spaces where porn was seen as at the productions themselves and their audiences, Larsson

reveals the conditions and social changes that allowed pornography in Sweden to flourish in the period. Mariah Larsson is senior lecturer in film studies at Linnaeus University in Sweden. She has previously taught sexology at Malmö University and cinema studies at Stockholm University.

It is now more than forty years since these sermons were delivered, but throughout all these years, this great valuable work "The General pattern of Islamic thought In the Quran" remained unpublished! When the young Hojjat-al-Islam sayyed Ali Khamenei began these series of sermons at the half-built Imam Hassan Mojtaba Mosque in Mash-had for 28 sessions in the month of Ramadan 1394 (1975), the city of Mash-had acquired a different atmosphere: The sessions were held following noon-prayers in the heat of summertime when people usually went to their houses to rest for a couple of hours; yet, in a locality in this city many people , young and old, were on the way to attend Khamenei's unique lectures; if you could look at the audience, you would notice that many people belonging to different social strata: Theology students, high school pupils, university students, shop- keepers, local residents, both men and women, especially young ones, all attended these sessions; medical students had managed to hire two buses to transfer them from the vicinity of the university to this mosque. In Khamenei's lectures, everything is different from traditional, spiritual sermons: everyone is given one or two photocopied pages containing a summary of topics to be discussed in the session, the lecturer delivers his speech while standing g on a fasting day and

after the end of the lecture, a fine-sounding Quran reciter chants the relevant Quranic verses discussed already. Khamenei's sessions really resembles an educational classroom rather than a traditional preaching

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

This collection challenges the tendency among scholars of ancient Greece to see magical and religious ritual as mutually exclusive and to ignore "magical" practices in Greek religion. The contributors survey specific bodies of archaeological, epigraphical, and papyrological evidence for magical practices in the Greek world, and, in each case, determine whether the traditional dichotomy between magic and religion helps in any way to conceptualize the objective features of the evidence examined. Contributors include Christopher A. Faraone, J.H.M. Strubbe, H.S. Versnel, Roy Kotansky, John Scarborough, Samuel Eitrem, Fritz Graf, John J. Winkler, Hans Dieter Betz, and C.R. Phillips.

Can we align global production and consumption systems with sustainability? Can business growth actually lead to a healthier planet? Can companies innovate through the circular economy to create competitive advantage and genuine impact? Waste to Wealth proved that the emerging circular economy advantage exists – now Lacy, Long and Spindler show you how to realize it at speed and scale in The Circular Economy Handbook. We stand at a crossroads, with rising geopolitical and geo-economic

tensions, massive technological change and a host of social and environmental challenges. We are pushing planetary boundaries to their limits, with climate change and threats to biodiversity and oceans as just a few examples. Significant impacts are already being felt, and both people and planet face potentially catastrophic and irreversible consequences if we don't urgently change our global model and systems. Our current linear "take, make, waste" models of production and consumption will not be sustainable in a world of some 9 billion people by 2050, especially with ever-expanding rates of consumption. Thriving within these dynamics demands more than incremental adjustments to business-as-usual. The circular economy offers a powerful means to decouple growth from use of scarce and harmful resources, enabling greater production and consumption with fewer negative environmental impacts—at the same time, making companies more innovative and competitive. In fact, this book shows that \$4.5 trillion in economic value is at stake. Delivering on the promise of a circular economy demands impact and scale, extending through value chains and, ultimately, disrupting the entire economic system. In *The Circular Economy Handbook*, the authors illuminate the path from insight to action, from linear to circular. With case studies, advice and practical guidance, they show leaders how to pivot towards a holistic circular organization, embedding circularity internally and delivering broad-based system change. With unique insights across business models, technologies, and industries – featuring stories and real-world examples from circular pioneers – this book

The definitive translation by Dick Davis of the great national epic of Iran—now newly revised and expanded to be the most complete English-language edition A Penguin Classic Dick Davis—“our pre-eminent translator from the Persian” (The Washington Post)—has revised and expanded his acclaimed translation of Ferdowsi’s masterpiece, adding more than 100 pages of newly translated text. Davis’s elegant combination of prose and verse allows the poetry of the Shahnameh to sing its own tales directly, interspersed sparingly with clearly marked explanations to ease along modern readers. Originally composed for the Samanid princes of Khorasan in the tenth century, the Shahnameh is among the greatest works of world literature. This prodigious narrative tells the story of pre-Islamic Persia, from the mythical creation of the world and the dawn of Persian civilization through the seventh-century Arab conquest. The stories of the Shahnameh are deeply embedded in Persian culture and beyond, as attested by their appearance in such works as *The Kite Runner* and the love poems of Rumi

and Hafez. For more than sixty-five years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,500 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

The author highlights the three main aspects of Shi'a Islam: its historical development, especially the history of the Imams; the rituals, including flagellation and passion plays; and the rule of the mullahs, known as the "government of experts." Shi'ism is as old as Islam. It began as an exclusively Arab political issue of succession to Muhammad, and was later embraced by the Iranians. At the core of Shi'i religious practice are rituals of mourning and atonement.--Publisher description.
