The demographics of ageing suggest a great need for an early diagnosis of dementia and for the development of preventive strategies. Neurodegeneration in Alzheimer's disease is estimated to start 20-30 years before clinical onset, and the identification of biological markers for pre-clinical and early diagnosis is the principal aim of research

studies in the field. In this book, the authors present topical research on Alzheimer's diagnosis including cerebrospinal fluid biomarker Amyloid-B 1-42 identification; visual impairment in Alzheimer's disease; cerebral glucose metabolism through F-fluoro-deoxy-glucose positron emission tomography and neuroimaging.

A popular minimalist blogger and author of *The More of Less* shows you how to methodically turn your home into a place of peace, contentment, and purposeful living. One of today's most influential minimalist advocates takes us on a decluttering tour of our own houses and apartments, showing us how to decide what to get rid of and what to keep. He both offers practical guidelines for simplifying our lifestyle at home and addresses underlying issues that contribute to over-accumulation in the first place. The purpose is not just to create a more inviting living space. It's also to turn our life's HQ--our home--into a launching pad for a more fulfilling and productive life in the world. Considering studying history at university? Wondering whether a history degree will get you a good job, and what you might earn? Want to know what it's actually like to study history at degree level? «Then he can hear it. The sound that he has merely sensed, now he can hear it loud and clear. It keeps getting closer. It seems like some sort of breathing. Birger can feel the shivers down his spine. He fumbles for his headlamp, turns it on and flashes the light towards something moving between the stalactites!» In this book, we get to meet Birger. He likes stories. The scientific story of man, of our Earth and everything that lives, and has lived - but also the exciting stories told by our ancestors to explain how everything was mutually linked together. In Birger's Odyssey, Birger is the one heading for a long journey. Before he leaves together with his parents, he finds the whaling diary that his great-great-grandfather Ole wrote when he was in the Southern Ocean. In Antarctica, Birger gets to experience research and science linked to the Earth and the ice. At the same time, he is reading about the whaling adventures of his great-great-grandfather Ole. Birger is also writing his very own book about his personal imaginary Odyssey.

This book provides an introduction to three contemporary syntactic theories, Government-Binding Theory, Generalized Phrase Structure Grammar, and Lexical-Functional Grammar. In successive chapters, Sells lucidly presents and illustrates the fundamental aspects of each theory. In an introductory chapter he describes the basic syntactic concepts and assumptions shared by each theory; in the postscript, Thomas

The book analyses the renewed importance of the North Atlantic for NATO in the face of new security challenges This Whitehall Paper explores the renewed importance of the North Atlantic Ocean to NATO's security through the lenses of the United States, United Kingdom and Norway in particular. These three NATO members form the territorial rim around the North Atlantic and its peripheral seas.

All are maritime nations that have historically taken prime responsibility for security in the region and together with Iceland they form the front line to a resurgent Russian maritime capability. These three counties, with support from the rest of the northern region, must take the lead to ensure that NATO and its partners devote sufficient resources to this aspect of NATO's area of responsibility.

Anthony Gormley is widely recognised as one of the most imaginative and original artists working in the UK today. This illustrated book accompanies the exhibition Anthony Gormley: Blind Light at The Hayward, the artist's first major showing in London in over 25 years. Since the 1980s Gormley has focused consistently on the human figure, often using his own body as the starting point for works that explore our perception of space, architecture, and bodily presence. Alongside specially commissioned photography of Gormley's major new projects, the book includes an original visual essay by the artist that elaborates his aesthetic preoccupations with images selected from his own photographic archive. Essays from leading writers and scholars Anthony Vidler, Susan Stewart and W. J. T. Mitchell provide a context in which to understand Gormley's new work, while an in-depth interview with The Hayward Director Ralph Rugoff and co-curator Jacky Klein reconsiders Gormley's place within contemporary culture and

the history of art.

'Facing the Music' provides a rich resource for reflection and practice for all those involved in teaching and learning music in culturally diverse environments, from policy makers to classroom teachers. Schippers gradually unfolds the complexities and potential of learning and teaching music 'out of context'.

The Iceberg Family live in The Ice Fjord far, far to the north. The fjord is clean and beautiful like the clearest glass. Here the iceberg children Ice Laug, Ice Finn and Ice Bjorg play all day long. Sometimes seals and whales come to see them, and now and then a hungry polar bear may show up. One day, however, something very special happens. A boat full of people in blue jackets comes into their fjord and begins to circle around them. The icebergs, both the small and the big ones, get frightened. What will happen to their family now? Can they live there safely as they have done up to now? Or will warm currents in the sea make them melt? Will plastic and garbage fill the stomachs of the whales and lead to their death? They have heard some rumours... In this book Lippert has chosen to use some traits from the fairy tale, but without sticking completely to that genre. The mixture of genres is chosen to give the book a modern expression. At the same time the association with well-known fairy tale traits can be a motivator to make the children think their own thoughts. That is the author's intention.

This paper reviews Iraq's Request for Emergency Post-Conflict Assistance (EPCA). The authorities' main goals under the EPCA-supported program are to improve the general welfare of the Iraqi people and address Iraq's external debt problem. The authorities' program is to be underpinned by a prudent fiscal policy that aims to limit spending to available government revenues and external resources, the use of the exchange rate to anchor inflation expectations, and the planning and undertaking of key structural reforms to transform Iraq into a market economy.

Although often overlooked, anti-Polish sentiment was central to Nazi ideology. At the outset of World War II, Hitler initiated a process of 'depolonization' (Entpolonisierung) which resulted in the death or displacement of a significant number of Polish people living in Nazi-occupied territories. By examining policies of indirect extermination through a detailed study of Szmalcowka, a 'displacement' camp located in Toru? in Reichsgau Danzig-West Prussia, Tomasz Ceran explores the terrible consequences of

Nazi ideology. He provides both an in-depth historical account of a little-known camp and an important analysis of Nazi practices and policy-making in the Polish territories which were annexed. A strong addition to World War II literature, Ceran's book is essential reading for scholars and students interested in World War II, Polish History, Nazi ideology and the nature of violence and resilience.

Courtney Carver shows us the power of simplicity to improve our health, build more meaningful relationships, and relieve stress in our professional and personal lives. We are often on a quest for more—we give in to pressure every day to work more, own more, and do more. For Carver, this constant striving had to come to a stop when she was diagnosed with Multiple Sclerosis (MS). Stress was like gasoline on the fire of symptoms, and it became clear that she needed to root out the physical and psychological clutter that were the source of her debt and discontent. In this book, she shows us how to pursue practical minimalism so we can create more with less—more space, more time, and even more love. Carver invites us to look at the big picture, discover what's most important to us, and reclaim lightness and ease by getting rid of all the excess things.

From New York Times Bestseller Mimi Jean Pamfiloff comes *SMART TASS*, a new Romantic Comedy. He's the hot college quarterback all the girls want. She's the smart girl he loves to pick on. And now that they're all grown up, things are about to get geekin' ugly. My name is Tass. I'm smart, I'm driven, and I am determined not to let prankster Hunter Johnson continue raining on my parade. When we were little, he'd pull my hair and call me names. When we were teenagers, he'd throw food and tease me for being a flat-chested virgin. But now that we've ended up at the same college, he's out of his hot head if he thinks he can keep messing with my life. It's like he's fixated on me or something. Well, guess what, Mr. Amazefootball? I'm not that geeky little girl anymore and you do not screw with a smart woman. So what's my plan? It's definitely wild, and he's about to find out.

E-Learning offers many opportunities for individuals and institutions all over the world. Individuals can access to education they need almost anytime and anywhere they are ready to. Institutions are able to provide more cost-effective training to their employees. E-learning context is very important. It is common to find educators who perceive e-learning as internet-only education that encourages a static and content-focused series of text pages on screen. Others envisage the shallow and random online messages that are typical of a social real-time chat session, and wonder how that type of communication could add any value to academic discourse. Some may have experienced e-learning done poorly, and extrapolate their experience into a negative impression of all e-learning. The book will examine the emergence and growth of e-learning. The use of the "e" prefix indicates the application of information and communication technology (ICT) in government, finance, and all forms of socio-economic and community development. This eBook is designed and presented in two volumes. The first volume consists of the country cases of Algeria, Belarus, Bulgaria, Egypt, Estonia, Finland, Greece, Jordan, Hungary, Iraq, Iran, Israel, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Macedonia, Moldova, and Morocco. The second volume gives a place to the country cases of Norway, Oman, Palestine, Poland, Romania, Russia, Saudi Arabia, Serbia, Slovakia, Slovenia, Sweden, Syria, Tajikistan, Tunisia, Turkey, Ukraine, United Arab Emirates and Uzbekistan. So, the book consists of more than 70 authors from 39 different countries and from 42 universities and 14 institutions

“Rachel Macy Stafford's post "The Day I Stopped Saying Hurry Up" was a true phenomenon on The Huffington Post, igniting countless conversations online and off about freeing ourselves from the vicious cycle of keeping up with our overstuffed agendas. Hands Free Mama has the power to keep that conversation going and remind us that we must not let our lives pass us by.” --Arianna Huffington, Chair, President, and Editor-in-Chief of the Huffington Post Media Group, nationally syndicated columnist, and author of thirteen books <http://www.huffingtonpost.com/ DISCOVER THE POWER, JOY, AND LOVE of Living “Hands Free”> If technology is the new addiction, then multi-tasking is the new marching order. We check our email while cooking dinner, send a text while bathing the kids, and spend more time looking into electronic screens than into the eyes of our loved ones. With our never-ending to-do lists and jam-packed schedules, it’s no wonder we’re distracted. But this isn’t the way it has to be. In July 2010, special education teacher and mother Rachel Macy Stafford decided enough was enough. Tired of losing track of what matters most in life, Rachel began practicing simple strategies that enabled her to momentarily let go of largely

meaningless distractions and engage in meaningful soul-to-soul connections. She started a blog to chronicle her endeavors and soon saw how both external and internal distractions had been sabotaging her happiness and preventing her from bonding with the people she loves most. Hands Free Mama is the digital society's answer to finding balance in a media-saturated, perfection-obsessed world. It doesn't mean giving up all technology forever. It doesn't mean forgoing our jobs and responsibilities. What it does mean is seizing the little moments that life offers us to engage in real and meaningful interaction. It means looking our loved ones in the eye and giving them the gift of our undivided attention, leaving the laundry till later to dance with our kids in the rain, and living a present, authentic, and intentional life despite a world full of distractions. So join Rachel and go hands-free. Discover what happens when you choose to open your heart—and your hands—to the possibilities of each God-given moment.

The International Tracing Service, one of the largest Holocaust-related archival repositories in the world, holds millions of documents that enrich our understanding of the many forms of persecution during the Nazi era and its continued repercussions ever since. Drawing on a selection of recently available documents from the archive, this essential resource provides new insights into human decision-making in genocidal settings, the factors that drive it, and its far-reaching consequences. The sources that the author has collected and

contextualized here reflect the full range of behaviors and roles that victims, their oppressors, beneficiaries, and postwar aid organizations played beginning in 1933, through World War II, the Holocaust, and up to the present.

Silence has many causes: shame, embarrassment, ignorance, a desire to protect. The silence that has surrounded the atrocities committed against the Jewish population of Eastern Europe and the Soviet Union during World War II is particularly remarkable given the scholarly and popular interest in the war. It, too, has many causes—of which antisemitism, the most striking, is only one. When, on July 10, 1941, in the wake of the German invasion of the Soviet Union, local residents enflamed by Nazi propaganda murdered the entire Jewish population of Jedwabne, Poland, the ferocity of the attack horrified their fellow Poles. The denial of Polish involvement in the massacre lasted for decades. Since its founding, the journal *Kritika: Explorations in Russian and Eurasian History* has led the way in exploring the East European and Soviet experience of the Holocaust. This volume combines revised articles from the journal and previously unpublished pieces to highlight the complex interactions of prejudice, power, and publicity. It offers a probing examination of the complicity of local populations in the mass murder of Jews perpetrated in areas such as Poland, Ukraine, Bessarabia, and northern Bukovina and analyzes Soviet responses to the

Holocaust. Based on Soviet commission reports, news media, and other archives, the contributors examine the factors that led certain local residents to participate in the extermination of their Jewish neighbors; the interaction of Nazi occupation regimes with various sectors of the local population; the ambiguities of Soviet press coverage, which at times reported and at times suppressed information about persecution specifically directed at the Jews; the extraordinary Soviet efforts to document and prosecute Nazi crimes and the way in which the Soviet state's agenda informed that effort; and the lingering effects of silence about the true impact of the Holocaust on public memory and state responses. R. G. Popperwell provides a fascinating and highly accessible guide to the correct pronunciation of Norwegian.

Wear just 33 items for 3 months and get back all the JOY you were missing while you were worrying what to wear. In Project 333, minimalist expert and author of *Soulful Simplicity* Courtney Carver takes a new approach to living simply--starting with your wardrobe. Project 333 promises that not only can you survive with just 33 items in your closet for 3 months, but you'll thrive just like the thousands of woman who have taken on the challenge and never looked back. Let the de-cluttering begin! Ever ask yourself how many of the items in your closet you actually wear? In search of a way to pare down on her expensive shopping habit,

consistent lack of satisfaction with her purchases, and ever-growing closet, Carver created Project 333. In this book, she guides readers through their closets item-by-item, sifting through all the emotional baggage associated with those oh-so strappy high-heel sandals that cost a fortune but destroy your feet every time you walk more than a few steps to that extensive collection of never-worn little black dresses, to locate the items that actually look and feel like you. As Carver reveals in this book, once we finally release ourselves from the cyclical nature of consumerism and focus less on our shoes and more on our self-care, we not only look great we feel great-- and we can see a clear path to make other important changes in our lives that reach far beyond our closets. With tips, solutions, and a closet-full of inspiration, this life-changing minimalist manual shows readers that we are so much more than what we wear, and that who we are and what we have is so much more than enough.

Don't Settle for More Most of us know we own too much stuff. We feel the weight and burden of our clutter, and we tire of cleaning and managing and organizing. While excess consumption leads to bigger houses, faster cars, fancier technology, and cluttered homes, it never brings happiness. Rather, it results in a desire for more. It redirects our greatest passions to things that can never fulfill. And it distracts us from the very life we wish we were living. Live a better life with

less. In *The More of Less*, Joshua Becker helps you... • Recognize the life-giving benefits of owning less • Realize how all the stuff you own is keeping you from pursuing your dreams • Craft a personal, practical approach to decluttering your home and life • Experience the joys of generosity • Learn why the best part of minimalism isn't a clean house, it's a full life

The beauty of minimalism isn't in what it takes away. It's in what it gives. *Make Room in Your Life for What You Really Want* "Maybe you don't need to own all this stuff." After a casual conversation with his neighbor on Memorial Day 2008, Joshua Becker realized he needed a change. He was spending far too much time organizing possessions, cleaning up messes, and looking for more to buy. So Joshua and his wife decided to remove the nonessential possessions from their home and life. Eventually, they sold, donated, or discarded over 60 percent of what they owned. In exchange, they found a life of more freedom, more contentment, more generosity, and more opportunity to pursue the things that mattered most. *The More of Less* delivers an empowering plan for living more by owning less. With practical suggestions and encouragement to personalize your own minimalist style, Joshua Becker shows you why minimizing possessions is the best way to maximize life. Are you ready for less cleaning, less anxiety, and less stress in your life? Simplicity isn't as complicated as you think.

Library and Information Studies for Arctic Social Sciences and Humanities serves as a key interdisciplinary title that links the social sciences and humanities with current issues, trends, and projects in library, archival, and information sciences within shared Arctic frameworks and geographies. Including contributions from professionals and academics working across and on the Arctic, the book presents recent research, theoretical inquiry, and applied professional endeavours at academic and public libraries, as well as archives, museums, government institutions, and other organisations. Focusing on efforts that further Arctic knowledge and research, papers present local, regional, and institutional case studies to conceptually and empirically describe real-life research in which the authors are engaged. Topics covered include the complexities of developing and managing multilingual resources; working in geographically isolated areas; curating combinations of local, regional, national, and international content collections; and understanding historical and contemporary colonial-industrial influences in indigenous knowledge. Library and Information Studies for Arctic Social Sciences and Humanities will be essential reading for academics, researchers, and students working the fields of library, archival, and information or data science, as well as those working in the humanities and social sciences more generally. It should also be of great interest to librarians, archivists,
