Flourishing from A.D. 1 to 700, the Recuay inhabited lands in northern Peru just below the imposing glaciers of the highest mountain chain in the tropics. Thriving on an economy of high-altitude crops and camelid herding, they left behind finely made artworks and grand palatial buildings with an unprecedented aesthetic and a high degree of technical sophistication. In this first in-depth study of these peoples, George Lau situates the Recuay within the great diversification of cultural styles associated with the Early Intermediate Period, provides new and significant evidence to evaluate models of social complexity, and offers fresh theories about life, settlement, art, and cosmology in the high Andes. Lau crafts a nuanced social and historical model in order to evaluate the record of Recuay developments as part of a wider Andean prehistory. He analyzes the rise and decline of Recuay groups as well as their special interactions with the Andean landscape. Their coherence was expressed as shared culture, community, and corporate identity, but Lau also reveals its diversity through time and space in order to challenge the monolithic characterizations of Recuay society pervasive in the literature today. Many of the innovations in Recuay culture, revealed for the first time in this landmark volume, left a lasting impact on Andean history and continue to have relevance today. The author highlights the ways that material things intervened in ancient social and political life, rather than being merely passive reflections of historical change, to show that Recuay public art, exchange, technological innovations, warfare, and religion offer key insights into the emergence of social hierarchy and chiefly leadership and the formation, interaction, and later dissolution of large discrete polities. By presenting Recuay artifacts as fundamentally social in the sense of creating and negotiating relations among persons, places, and things, he recognizes in the complexities of the past an enduring order and intelligence that shape the contours of history.

In the tradition of Cormac McCarthy and Flannery O'Connor, Bill Cheng's Southern Cross the Dog is an epic literary debut in which the bonds between three childhood friends are upended by the Great Mississippi Flood of 1927. In its aftermath, one young man must choose between the lure of the future and the claims of the past. Having lost virtually everything in the fearsome storm—home, family, first love—Robert Chatham embarks on an odyssey that takes him through the deep South, from the desperation of a refugee camp to the fiery and raucous brothel Hotel Beau-Miel and into the Mississippi hinterland, where he joins a crew hired to clear the swamp and build a dam. Along his journey he encounters piano-playing hustlers, ne'er-do-well Klansmen, well-intentioned whores, and a family of fur trappers, the L'Etang brothers, whose very existence is threatened by the swamp-clearing around them. The L'Etang brothers are fierce and wild but there is something soft about their cousin Frankie, possibly the only woman capable of penetrating Robert's darkest places and overturning his conviction that he's marked by the devil. Teeming with language that renders both the savage beauty and complex humanity of our shared past, Southern Cross the Dog is a tour de force that heralds the arrival of a major new voice in fiction.

Risk is always present; only the probabilities of risk vary. Communities of Fate offers an opportunity to deepen our understanding of the social origins and organization of risk. By emphasizing the social aspects of risk and illustrating the range of circumstances in which risk is not only socially defined but socially created, the author helps demonstrate the extent to which reducing risk is not a technical problem, but, within Habermas' framework, a practical one. In short, how do we encourage all people, including those predisposed to technical solutions, to appreciate the extent to which risk is socially constructed and, thus, to join the socio-political struggle to reduce it where that is possible?

Contents: Introduction; Theoretical Frameworks-The Classical Statements; Theoretical Frameworks-The Contemporary Statements; Empirical Case Studies of Risk; Policy Implications.

This exciting new text teaches the foundations of electric circuits and develops a thinking style and a problem-solving methodology that is based on physical insight. Designed for the first course or sequence in circuits in electrical engineering, the approach imparts not only an appreciation for the elegance of the mathematics of circuit theory, but a genuine "feel" for a circuit's physical operation. This will benefit students not only in the rest of the curriculum, but in being able to cope with the rapidly changing technology they will face on-the-job. The text covers all the traditional topics in a way that holds students' interest. The presentation is only as mathematically rigorous as is needed, and theory is always related to real-life situations. Franco introduces ideal transformers and amplifiers early on to stimulate student interest by giving a taste of actual engineering practice. This is followed by extensive coverage of the operational amplifier to provide a practical illustration of abstract but fundamental concepts such as impedance transformation and root location control--always with a vigilant eye on the underlying physical basis. SPICE is referred to throughout the text as a means for checking the results of hand calculations, and in separate end-of-chapter sections, which introduce the most important SPICE features at the specific points in the presentation at which students will find them most useful. Over 350 worked examples, 400-plus exercises, and 1000 end-of-chapter problems help students develop an engineering approach to problem solving based on conceptual understanding and physical intuition rather than on rote procedures.

Buddy and his family are living a wonderful life on a small ranch in New Mexico until Buddy's father takes ill and the family is forced to sell and move to Colorado. They settle in the mile high city of Denver so Buddy's father can be close to the military hospital. The family is forced into poverty when Buddy's father dies and Buddy faces life as a fatherless boy. He grieves for his father and rebels against his mother. He runs the streets and forms strong relationships with other boys. They share many adventures and grew up together through the great depression. Buddy finds himself in a leadership role amongst the boys in his neighborhood and draws many together to form a gang. The war breaks out in Europe and the Pacific and the boys get swept up in the patriotism. They head to the west coast to join the merchant Marines. Buddy finds that he is too young and lies about his age to get signed up. He finds a job on a Danish merchant ship and sails the Pacific. After leaving ship on the East coast he rejoins his friends and they join the Army Air Force. He is stationed in Hawaii and then is transferred back to Denver to finish his tour of duty. The story addresses many of the challenges that young boys and girls faced when growing up in that turbulent time of the Great Depression and War II. Women Making Shakespeare presents a series of 20-25 short essays that draw on a variety of resources, including interviews with directors, actors, and other performance practitioners, to explore the place (or constitutive absence) of women in the Shakespearean text and in the history of Shakespearean reception - the many ways women, working individually or in communities, have shaped and transformed the reception, performance, and teaching of Shakespeare from the 17th century to the present. The book highlights the essential role Shakespeare's texts have played in the historical development of feminism. Rather than a traditional collection of essays, Women Making Shakespeare brings together materials from diverse resources and uses diverse research methods to create something new and transformative. Among the many women's interactions with Shakespeare to be considered are acting (whether on the professional stage, in film, on lecture tours, or in staged readings), editing, teaching, academic writing, and recycling through adaptations and appropriations (film, novels, poems, plays, visual arts).

It is appropriate that a surgical teacher. Robert E. Hermann. M.D . . with a large experience in a specialized field should author the beautifully illustrated Manual of Surgery of the Gallbladder. Bile Ducts. and Exocrine Pancreas. This manual. which takes its place in the distinguished series sponsored by Richard H. Egdahl, M.D . . is designed for the working surgeon. resident or practitioner. who wishes to refresh his memory or to bring himself abreast of current thinking and techniques. The carefully planned format and the elegant color illustrations of Mr. Robert Reed permit this with the expenditure of a minimum of time and effort. and surgeons who must operate on the organs and structures it covers will wish to have it available for reference. Stanley O. Hoerr, M.D. former Chairman. Division of Surgery Cleveland Clinic Chairman.

Department of Surgery Fairview General Hospital Cleveland, Ohio Preface Operations on the gallbladder and bile ducts are among the surgical procedures most commonly performed by general surgeons. In most hospitals, cholecystectomy is the most frequently performed operation within the abdomen; approximately 600,000 are performed each year in the United States. In addition, an estimated 120,000 bile duct operations are performed yearly. Pancreatic surgery is less frequent, but because of the close relation between the biliary system and the pancreas, knowledge of pancreatic problems is equally essential to the surgeon.

Dreaming of Sheep in Navajo Country offers a fresh interpretation of the history of Navajo (Din) pastoralism. The dramatic reduction of livestock on the Navajo Reservation in the 1930s -- when hundreds of thousands of sheep, goats, and horses were killed -- was an ambitious attempt by the federal government to eliminate overgrazing on an arid landscape and to better the lives of the people who lived there. Instead, the policy was a disaster, resulting in the loss of livelihood for Navajos -- especially women, the primary owners and tenders of the animals -- without significant improvement of the grazing lands. Livestock on the reservation increased exponentially after the late 1860s as more and more people and animals, hemmed in on all sides by Anglo and Hispanic ranchers, tried to feed themselves on an increasingly barren landscape. At the beginning of the twentieth century, grazing lands were showing signs of distress. As soil conditions worsened, weeds unpalatable for livestock pushed out nutritious native grasses, until by the 1930s federal officials believed conditions had reached a critical point. Well-intentioned New Dealers made serious errors in anticipating the human and environmental consequences of removing or killing tens of thousands of animals. Environmental historian Marsha Weisiger examines the factors that led to the poor condition of the range and explains how the Bureau of Indian Affairs, the Navajos, and climate change contributed to it. Using archival sources and oral accounts, she describes the importance of land and stock animals in Navajo culture. By positioning women at the center of the story, she demonstrates the place they hold as significant actors in Native American and environmental history. *Dreaming of Sheep in Navajo Country* is a compelling and important story that looks at the people and conditions that contributed to a botched policy whose legacy is still felt by the Navajos and their lands today.

In *The Assassin's Accomplice*, historian Kate Clifford Larson tells the gripping story of Mary Surratt, a little-known participant in the plot to kill Abraham Lincoln, and the first woman ever to be executed by the federal government of the United States. Surratt, a Confederate sympathizer, ran the boarding house in Washington where the conspirators--including her rebel son, John Surratt--met to plan the assassination. When a military tribunal convicted her for her crimes and sentenced her to death, five of the nine commissioners petitioned President Andrew Johnson to show mercy on Surratt because of her sex and age. Unmoved, Johnson refused--Surratt, he said, "kept the nest that hatched the egg." Set against the backdrop of the Civil War, *The Assassin's Accomplice* tells the intricate story of the Lincoln conspiracy through the eyes of its only female participant. Based on long-lost interviews, confessions, and court testimony, the text explores how Mary's actions defied nineteenth-century norms of femininity, piety, and motherhood, leaving her vulnerable to deadly punishment historically reserved for men. A riveting narrative account of sex, espionage, and murder cloaked in the enchantments of Southern womanhood, *The Assassin's Accomplice* offers a fresh perspective on America's most famous murder.
