Despite the growing body of work on the media in Wales, very little exists on the history of commercial television in Wales. This book seeks to address this imbalance by tracing the growth and development of ITV in Wales and assessing its contribution to the life of the nation. ITV has been a powerful force in British broadcasting since its inception in 1955. When commercial television came to Wales for the first time in 1958, it immediately got caught up in with matters of national identity, language and geography. Compared with the BBC, it is a relative newcomer; its growth was slower than that of the BBC and it took until 1962 to complete the network across the UK. Once it had arrived, however, its impact was considerable. The book will provide an historical

narrative and critical analysis of independent television (ITV) in Wales from 1958 up until the present day.

In his bestselling book *Emergence*, Derek Rydall helps you throw aside the self-help books and recognize one simple, radical truth: the answer is already in you. The harder we try to change, the deeper in the hole we get. We find a new partner but have the same old fights. We strive for an ever-bigger paycheck but end up broke at a higher income bracket. This is what happens when the basic principle of life—the Law of Emergence—is disrupted, stopping you from knowing that you are the perfect you. Like an acorn is a perfect acorn that becomes a perfect oak tree, there is not a part of you from beginning to end that isn't exactly what you should be. The Law of Emergence provides the foundation to re-engage with this ancient principle. In this seven-stage framework, spiritual life coach Derek Rydall shows that we aren't lacking anything; everything we need to fulfill our full potential is already inside us. Backed by an ancient truth that has largely been lost, Rydall changes the conversation around how to achieve your potential by showing you how to activate the genius already in you and empower your purpose in life. If you are struggling to improve something about yourself—your health, your mindset, your relationships, then *Emergence* is the book and Derek is the teacher you have been waiting for.

Boasting over 15 million tourists visiting every year, this Florida city is one of America's oldest and one of its most popular. *The Making of St. Petersburg* captures the character of this bay city through its past, from the Spanish clash with indigenous peoples to the creation of the downtown waterfront parks and grand hotels. Take a journey with local historian Will Michaels as he chronicles St.

Petersburg's storied history, including the world's first airline, the birth of Pinellas County and the good old American pastime, Major League Baseball. The people and events in this work paint a beautiful portrait of a coastal Florida city and reveal St. Petersburg's sense of place.

The work of internationally renowned photographer Anthony Osmond-Evans has featured in publications throughout the world. With this book, he presents a pictorial tour of the diverse peoples and landscapes of the United Kingdom.

These notes form the basis of this second volume of THE KITCHEN DIARIES. More than a diary, this is a collection of small kitchen celebrations, be it a casual, beer-fuelled supper of warm flatbreads with pieces of grilled lamb scattered with toasted pine kernels and blood-red pomegranate seeds or a quiet moment contemplating a bowl of soup and a loaf of bread.'

A random spectator is the premise of photographer John Chao's 50-year visual celebration-the fruition of his half-century photographic odyssey. Here, photographs coalesce as revelations, inviting the viewer on a footpath which unfolds as a deliberate set of accidental impressions. Chao's uncanny vision is testimony to the cultural inheritance to which he was bequeathed. His early life passed along a trajectory that led him through the 1950s-'60s Asia, South & North America, respectively. The collision of these cultures lifted Chao's burgeoning intuition into a form of escapism and storytelling - his instrument being the camera. And surprisingly, his abounding faith in the unseen. The spontaneity of style and the radiance of discovery are gifted to the viewer who hurtles along as an unwitting companion in Chao's sojourn. While never intending an audience, Chao's visual virtuosity has long since been hidden from the world of photography. After leaving the comfort zone of success in New York City, he found himself thriving in the newfound obscurity of the west and reinvented himself as a magazine publisher and manufacturer. Chao maintained his quest and preserved decades of hidden gems in his Columbia River Gorge home. His collection of over half-a-million photographs has been distilled to 500 images spanning five decades and over 40 countries in this, his first photographic memoir.

There are far more entrepreneurs than most people realize. But the failure rate of new businesses is disappointingly high, and the economic impact of most of them disappointingly low, suggesting that enthusiastic would-be entrepreneurs and their investors all too often operate under a false set of assumptions. This book shows that the reality of entrepreneurship is decidedly different from the myths that have come to surround it. Scott Shane, a leading expert in entrepreneurial activity in the United States and other countries, draws on the data from extensive research to provide accurate, useful information about who becomes an entrepreneur and why, how businesses are started, which factors lead to

success, and which predict a likely failure. The Illusions of Entrepreneurship is an essential resource for everyone who has dreamed of starting a new business, for investors in start-ups, for policy makers attempting to facilitate the formation and survival of new businesses, and for researchers interested in the economic impact of entrepreneurial activity. Scott Shane offers research-based answers to these questions and many others: · Why do people start businesses? · What industries are popular for start-ups? · How many jobs do new businesses create? · How do entrepreneurs finance their start-ups? · What makes some locations and some countries more entrepreneurial than others? · What are the characteristics of the typical entrepreneur? · How well does the typical start-up perform? · What strategies contribute to the survival and profitability of new businesses over time?
