A beautifully illustrated volume on the Tudor-style house, a keystone in American interiors and architecture. Since its birth in sixteenth-century England, the Tudor-style house has been a favorite for homeowners from all walks of life. Hallmarks of the style include steeply pitched gables and roofs covered in slate or imitation thatch, bays of casement windows with diamond-paned leaded glass, clustered chimney stacks, interiors of wood paneling and plasterwork, and, especially, half-timbered and stuccoed facades. In the United States, prime examples can be found coast to coast, from the Tudor City apartment buildings of New York to the stately homes of Tuxedo Park; from the cozy, Prairie-inspired homes of Oak Park, Illinois, to the richly nuanced Arts and Crafts-inflected mansions of Pasadena, California. In an age when all agree that the McMansion, with its ungainly proportions and sameness of design, should be banished from the landscape, the Tudor house remains a delight and an inspiration, being anything but cookie-cutter, with tremendous variation from home to home. The *Tudor Home* showcases the wide variety of Tudor homes and the many manifestations the form has taken across the nation, from the famous communities of Bronxville, New York, to the California Tudors of Highland Park. With a wealth of color imagery newly photographed for this volume and insightful commentary on the history, development, and evolution of the Tudor style in America, the book is an engaging read that opens a window on this much loved style of home.

A Guide to the Project Management Body of Knowledge (PMBOK® Guide) provides generalized project management guidance applicable to most projects most of the time. In order to apply this generalized guidance to construction projects, the Project Management Institute has developed the Construction Extension to the PMBOK® Guide. This Construction Extension provides construction-specific guidance for the project management practitioner for each of the PMBOK® Guide Knowledge Areas, as well as guidance in these additional areas not found in the PMBOK® Guide:•All project resources, rather than just human resources•Project health, safety, security, and environmental management•Project financial management, in addition to cost•Management of claims in construction This edition of the Construction Extension also follows a new structure, discussing the principles in each of the Knowledge Areas rather than discussing the individual processes. This approach broadens the applicability of the Construction Extension by increasing the focus on the “what” and “why” of construction project management. This Construction Extension also includes discussion of emerging trends and developments in the construction industry that affect the application of project management to construction projects.

Most people know that there are 70 million Baby Boomers in America today....but what is less known is that there are approximately 100 million people in America between the ages of 16 and 30. This generation has just entered, or will soon be entering the work force. And they have no idea how to invest, save, or handle their money. Young people today come out of school having had little or no formal education on the basics of money management. Many have large debts from student loans looming over their heads. And many feel confused and powerless when their pricey educations don't translate into high paying jobs. They feel that their \$30,000-\$40,000 salary is too meager to bother with investing, and they constantly fear that there will be "too much month left at the end of their money." Douglas R. Andrew has shown the parents of this generation a different pathway to financial freedom. Now Doug and his sons, Emron and Aaron - both of whom are in their mid-20s - show the under-30 crowd how they can break from traditional 401k investment plans and instead can find a better way by investing in real estate, budgeting effectively, avoiding unnecessary taxes and using life insurance to create tax-free income. With the principles outlined in *Millionaire by Thirty*, recent graduates will be earning enough interest on their savings to meet their basic living expenses by the time they're 30. And by the time they're 35, their investments will be earning more money than they are, guaranteeing them a happy, wealthy future.

One of the biggest challenges for students of housing is understanding the financial principles which underpin the place of housing in the wider economy. By taking a political economy approach, Peter King's *Understanding Housing Finance* makes the basic principles of the subject accessible, without requiring detailed prior knowledge of economics or financial systems. The book explains housing finance by exploring the way in which markets and governments react together. It takes a conceptual approach to consider the advantages and limits of housing markets and why governments intervene. The consequences of intervention are explored in detail using examples of housing subsidy systems and policy mechanisms such as rent control, housing allowances and subsidies to owner occupation. This is a key reference

for students on housing and planning courses at both undergraduate and postgraduate level. The book's approach means that its relevance is not confined to one particular housing system, but is useful for those studying housing finance in most developed and developing countries.

Watching the kite ascend higher into the sky, ten-year-old Raghav felt butterflies run deep down his gut, inflating his desire to fly high in a supersonic jet. His kite, entangled with another, crashed onto the ground. The flight took off smoothly from the runway of her heart, only to be hit by turbulence and thunderstorms smashing the plane into an abandoned sea full of gloominess. There he saw a lighthouse, a ray of hope. She became his lifeguard and taught him to swim through the storm. Like a guiding angel, she enlightened him towards the path of self-discovery leading to his journey to the island called 'Bollywood.' Raghav rode on a roller coaster encompassing love, passion, and conflicts.

Hopping from one town to another in search of his purpose, he landed in the city of love and lights, Paris, where he saw the horizon, an illusion of his world merging with hers. But just like the two poles on Earth never meet, so was his destiny.

On one side, he had Diya whom he could never get, and on the other side was Niharika whom he could never lose, and in the midst of all the chaos, he found his treasure. Come along with him to discover his hidden treasure. Who knows!
