Angeli o Demoni è il quinto romanzo della Saga storica a sfondo fantasy gotico 'Il Regno dei Due Fratelli', che nel penultimo e decisivo capitolo, viene influenzato dal più recente genere 'Paranormal Romance'. Filippo e suo figlio, portati in catene nel nuovo mondo, grazie ad una guida d'eccezione iniziano un avventuroso viaggio tra le nevi dei selvaggi inverni del Nord America. Lungo il cammino, numerosi flashback porteranno alla luce nuove verità in linea con le più recenti scoperte scientifiche ed archeologiche, sulla nascita del Regno degli uomini: dal racconto della genesi, alla cacciata dal Paradiso, attraversando l'antico Egitto per poi giungere grazie ai Templari ben oltre la fondazione della Fede Cattolica e fino ai giorni nostri. Inaspettatamente, una quarta legione sbarcherà nel nuovo mondo per pretendere la sua fetta di terra. Le streghe sono tornate, e bramosi di vendetta, pretenderanno il pagamento del prezzo dalle atroci persecuzioni subite nel vecchio mondo, ponendo le basi per quella che presto sarebbe diventata la più grande caccia alle streghe della Storia (Salem). Con questo romanzo, la serie de 'Il Regno dei Due Fratelli' si rivela come una Saga multi-tempo, un racconto dei racconti, nato e maturato dal confronto con le più moderne traduzioni non interpretative dei testi Biblici, dei rotoli del

Qumran, e gli ultimi Vangeli portati alla luce solo di recente

Bringing together leading academics hailing from different cultural and scholarly horizons, this book revisits legal hermeneutics by making particular reference to philosophy, sociology and linguistics. On the assumption that theory has much to teach law, that theory motivates and enables, the writings of such intellectuals as Martin Heidegger, Hans-Georg Gadamer, Jacques Derrida, Paul Ricœur, Giorgio Agamben, Jürgen Habermas, Ronald Dworkin and Ludwig Wittgenstein receive special consideration. As it explores the matter of reading the law and as it inquires into the emergence of meaning within the dynamic between reader and text against the background of the reader's worldly finiteness, this collection of essays wishes to contribute to an improved appreciation of the merits and limits of law's hermeneutics which, it argues, is emphatically not to be reduced to a simple tool for textual exegesis.

The Ethics of a Potential Urbanism explores the possible and potential relevance of Giorgio Agamben's political thoughts and writings for the theory and the practice of architecture and urban design. It sketches out the potentiality of Agamben's politics, which can affect change in current architectural and design discourses. The book investigates the possibility of an inoperative

architecture, as an ethical shift for a different practice, just a little bit different, but able to deactivate the sociospatial dispositive and mobilize a new theory and a new project for the urban now to come. This particular reading from Agamben's oeuvre suggests a destituent mode of both thinking and practicing of architecture and urbanism that could possibly redeem them from their social emptiness, cultural irrelevance, economic reductionism and proto-avant-garde extravagance, contributing to a renewed critical 'encounter' with architecture's aesthetic-political function.

Religion and European Philosophy: Key Thinkers from Kant to Žižek draws together a diverse group of scholars in theology, religious studies, and philosophy to discuss the role that religion plays among key figures in the European philosophical tradition. Designed for

accessibility, each of the thirty-four chapters includes background information on the key thinker, an overview of the main themes, concepts, and concerns that occupy his or her attention, and a discussion of the religious and theological elements present in his or her thought, in light of contemporary issues. Given the scope of the volume, *Religion and European Philosophy* will be the go-to guide for understanding the religious and theological dimensions of European philosophy, for both students and established researchers alike.

Ever since Plato's Socrates exiled the poets from the ideal city in *The Republic*, Western thought has insisted on a strict demarcation between philosophy and poetry. Yet might their long-standing quarrel hide deeper affinities? This book explores the distinctive ways in which twentieth-century and contemporary continental thinkers have engaged with poetry and its contribution to philosophical meaning making, challenging us to rethink how philosophy has been changed through its encounters with poetry. In wide-ranging reflections on thinkers such as Heidegger, Gadamer, Arendt, Lacan, Merleau-Ponty, Deleuze, Irigaray, Badiou, Kristeva, and Agamben, among others, distinguished contributors consider how different philosophers encountered the force and intensity of poetry and the negotiations that took place as they sought resolutions of the quarrel. Instead of a clash between competing worldviews, they figured the relationship between philosophy and poetry as one of productive mutuality, leading toward new modes of thinking and understanding. Spanning a range of issues with nuance and rigor, this compelling and

comprehensive book opens new possibilities for philosophical poetry and the poetics of philosophy. This volume traces the ways in which Heidegger's philosophical thinking has been taken up, critically re-appropriated, and disseminated in literary and poetic writing since the middle of the 20th century.

The first truly comprehensive and fully up-to-date critical introduction to the philosophy of Giorgio Agamben for an interdisciplinary audience.

A major intervention in media studies theorizes the politics and aesthetics of internet video The wave of uprisings and revolutions that swept the Middle East and North Africa between 2010 and 2012 were most vividly transmitted throughout the world not by television or even social media, but in short videos produced by the participants themselves and circulated anonymously on the internet. In *The People Are Not An Image*, Snowden explores this radical shift in revolutionary self-representation, showing that the political consequences of these videos cannot be located without reference to their aesthetic form. Looking at videos from Tunisia, Bahrain, Syria, Libya, and Egypt, Snowden attends closely to the circumstances of both their production and circulation, drawing on a wide range of historical and theoretical material, to discover what they can tell us about the potential for revolution in our time and the possibilities of video as a genuinely decentralized and vernacular medium. Leopardis Dichtung und Philosophie werden gemeinhin als ausschließlich oder doch überwiegend pessimistisch beschrieben, obgleich der Autor selbst sich wiederholt gegen eine solche vereindeutigende und reduktive Lektüre aussprach. Tatsächlich lassen sich immer

wieder in seinem Werk anti-pessimistische Strategien entdecken, etwa, wenn Leopardi über die Wirkung eines "pezzo di vera, contemporanea poesia" schreibt: "essa aggiunge un filo alla tela brevissima della nostra vita" (Zibaldone 4450). Der Band leistet einen facettenreichen Beitrag zur Überwindung des ‹Stereotyps des Pessimismus› (Antonio Prete), das noch immer die Rezeption des ungleich vielfältigeren Werks dominiert. This book analyses the European border at Lampedusa as a metaphor for visible and invisible powers that impinge on relations between Europe and Africa/Asia. Taking an interdisciplinary approach (political, social, cultural, economic and artistic), it explores the island as a place where social relations based around race, gender, sex, age and class are being reproduced and/or subverted. The authors argue that Lampedusa should be understood as a synecdoche for European borders and boundaries. Widening the classical definition of the term 'border', the authors examine the different meanings assigned to the term by migrants, the local population, seafarers and associative actors based on their subjective and embodied experiences. They reveal how migration policies, international relations with African, Middle Eastern and Asian countries, and the perpetuation of new forms of colonization and imperialism entail heavy consequences for the European Union. This work will appeal to a wide readership, from scholars of migration, anthropology and sociology, to students of political science, Italian, African and cultural studies.

This book analyzes the implication of secular/liberal

values in Western and human rights law and its impact on Muslim women. It offers an innovative reading of the tension between the religious and secular spheres. The author does not view the two as binary opposites. Rather, she believes they are twin categories that define specific forms of lives as well as a specific notion of womanhood. This divergence from the usual dichotomy opens the doors for a reinterpretation of secularism in contemporary Europe. This method also helps readers to view the study of religion vs. secularism in a new light. It allows for a better understanding of the challenges that contemporary Europe now faces regarding the accommodation of different religious identities. For instance, one entire section of the book concerns the practice of veiling and explores the contentious headscarf debate. It features case studies from Switzerland, France, and the UK. In addition, the analysis combines a wide range of disciplines and employs an integrated, comparative, and inter-disciplinary approach. The author successfully brings together arguments from different fields with a comparative legal and political analysis of Western and Islamic law and politics. This innovative study appeals to students and researchers while offering an important contribution to the debate over the role of religion in contemporary secular Europe and its impact on women's rights and gender equality.

This interdisciplinary book brings together essays that consider how the body enacts social and cultural rituals in relation to objects, spaces, and the everyday, and how these are questioned, explored, and problematised through, and translated into dance, art, and performance. The chapters are written by significant artists and scholars and consider practices from various locations, including Central and Western Europe, Mexico, and the United States. The authors build on dialogues between, for example, philosophy and museum studies, and memory studies and post-humanism, and engage with a wide range of theory from phenomenology to relational aesthetics to New Materialism. Thus this book represents a unique collection that together considers the continuum between everyday and cultural life, and how rituals and memories are inscribed onto our being. It will be of interest to scholars and practitioners, students and teachers, and particularly those who are curious about the intersections between arts disciplines.

Dem Gott der klassischen Philosophie, der vollkommen, unveränderlich und ewig ist, steht in der christlichen Theologie die geschichtliche Wirkmächtigkeit Gottes in seiner Gerechtigkeit, Barmherzigkeit, Gnade, Fürsorge, Vergebung und Treue zur Seite. Wie diese beiden Sichtweisen zusammenzubringen sind und wie damit die Frage nach Gottes Handeln in der Welt adäquat zu

beantworten ist, stellt eine der ältesten Streitfragen in der Theologie und Philosophiegeschichte dar. Sie verschärft sich darüber hinaus noch vor dem Hintergrund der naturwissenschaftlichen Fundamentalthese von der kausalen Geschlossenheit des physikalischen Universums. Dieser Sammelband bringt die in jüngster Zeit entworfenen Perspektiven auf die Problematik zusammen und sucht so nach einer vertretbaren Antwort auf die Frage nach dem Handeln Gottes in der Welt.
