This IBM® Redpaper™ publication gives a broad understanding of a new architecture of the IBM Power System E950 (9040-MR9) server that supports IBM AIX®, and Linux operating systems. The objective of this paper is to introduce the major innovative Power E950 offerings and relevant functions: The IBM POWER9™ processor, which is available at frequencies of 2.8 - 3.4 GHz. Significantly strengthened cores and larger caches. Supports up to 16 TB of memory, which is four times more than the IBM POWER8® processor-based IBM Power System E850 server. Integrated I/O

subsystem and hot-pluggable Peripheral Component Interconnect Express (PCIe) Gen4 slots, which have double the bandwidth of Gen3 I/O slots. Supports EXP12SX and ESP24SX external disk drawers, which have 12 Gb Serial Attached SCSI (SAS) interfaces and support Active Optical Cables (AOCs) for greater distances and less cable bulk. New IBM EnergyScale™ technology offers new variable processor frequency modes that provide a significant performance boost beyond the static nominal frequency. This publication is for professionals who want to acquire a better understanding of IBM Power Systems™ products. The intended audience includes the following roles: Clients Sales and marketing professionals Technical support professionals IBM Business Partners Independent software vendors (ISVs) This paper expands the current set of Power Systems documentation by providing a desktop reference that offers a detailed technical description of the Power E950 server. This paper does not replace the current marketing materials and configuration tools. It is intended as an extra source of information that, together with existing sources, can be used to enhance your knowledge of IBM server solutions.

Stai cercando il miglior modo di prepararti agli esami ECDL ma vorresti evitare di pagare costosissimi corsi propedeutici, o libri di testo da centinaia di pagine: il modo c'è, ed il nostro scopo è darti tutti gli strumenti e consigli per riuscirci. In questa guida troverai i consigli pratici per approcciare l'iscrizione e gli esami. Non importa se sei un principiante o hai già qualche esperienza, vogliamo creare le basi per la tua

Do you know what's the biggest obstacle preventing many from learning Korean to fluency? It's a lack of vocabulary! Reading in Korean is perhaps the most effective way to build up your vocabulary. With our book Korean Short Stories for Beginners and Intermediate Learners, you can practice reading the language while working on your Korean vocabulary and grammar skills. The stories contained within this book were written with Korean language learners in mind, so you don't have to worry about the level of the reading being too difficult as you encounter new vocabulary and grammar to learn Korean. Our Korean short stories use only the real language as spoken and

SGL's X Windows graphics expert explains how to construct real and useful 3D applications using OpenGL and X, and how to tightly integrate OpenGL applications with the X Window System. Using the OpenGL Utility Toolkit (GLUT) to show how OpenGL programs can be quickly constructed, the book explores OpenGL features using examples written in GLUT.

This book constitutes the refereed proceedings of the 8th International Conference on Web-Based Learning, ICWL 2009, held in Aachen, Germany, in August 2009. The 38 revised full papers and 14 short papers are presented together with three invited papers and were carefully reviewed and selected from 106 submissions. They deal with topics such as technology enhanced learning, web-based learning for oriental languages, mobile learning, social software and Web 2.0 for technology enhanced learning, learning resource deployment, organization and management, design, model and framework of E-learning systems, e-learning metadata and standards, educational

Learning; Technology-Supported Learning; Education 4.0; Pedagogical and Psychological Issues. With growing calls for affordable and quality education worldwide, we are currently witnessing a significant transformation in the development of post-secondary education and pedagogical practices. Higher education is undergoing innovative transformations to respond to our urgent needs. The change is hastened by the global pandemic that is currently underway. The 9th International Conference on Interactive, Collaborative, and Blended Learning: Visions and Concepts for Education 4.0 was conducted in an online format at McMaster University, Canada, from 14th to 15th October 2020, to deliberate and share the innovations and strategies. This conferences main objectives were to discuss guidelines and new concepts for engineering education in higher education institutions, including emerging technologies in learning; to debate new conference format in worldwide pandemic and post-pandemic conditions; and to discuss new technology-based tools and resources that drive the education in non-traditional ways such as Education 4.0. Since its beginning in 2007, this conference is devoted to new learning approaches with a focus on applications and experiences in the fields of interactive, collaborative, and blended learning and related new technologies. Currently, the ICBL conferences are forums to exchange recent trends, research findings, and disseminate practical experiences in collaborative and blended learning, and engineering pedagogy. The conference bridges the gap between pure scientific research and the everyday work of educators.

Interested readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, school teachers, industry-centric educators, continuing education practitioners, etc.

Many reports over the last few years have analysed the potential use of games, videogames, 3D environments and virtual reality for educational purposes. Numerous emerging technological devices have also appeared that will play important roles in the development of teaching and learning processes. In the context of these developments, learning rather than teaching becomes the main axis in the organisation of the educational process. This process has now gone beyond the analogue world and face-to-face education to enter the digital world, where new learning environments are being produced with ever greater doses of realism. *Teaching and Learning in Digital Worlds* examines the teaching and learning process in 3D virtual environments from both the theoretical and practical points of view.

Pur trattandosi di un mezzo pubblicitario affidabile e di indubbio valore, AdWords necessita di una conoscenza approfondita: sono in molti a credere che sia sufficiente aprire un account, creare ed attivare una campagna AdWords per poi lasciare che questa automatizzi quei meccanismi necessari per avere contezza del riscontro oggettivo in termini di ROI (ritorno sull'investimento) rispetto agli obiettivi di marketing che ci siamo prefissati, senza dover dedicare, quindi, ulteriore tempo alla campagna pubblicitaria stessa. In realtà comprendere che non è necessario spendere tanti soldi

per far funzionare una campagna, ma il modo in cui questi vengono spesi, significa essere entrati in contatto con le potenzialità e la varietà dei meccanismi che sono alla base di una campagna pay per clic di successo. Quello che voglio fare con questa guida è fornirti le basi in termini di approccio alla logica del funzionamento della piattaforma, per farti comprendere come possono interagire tra loro i complessi meccanismi che fanno di AdWords un punto fermo ed una certezza nel panorama della pubblicità online.

This work is a collection of front-end research papers on data fusion and perceptions. Authors are leading European experts of Artificial Intelligence, Mathematical Statistics and/or Machine Learning. Area overlaps with "Intelligent Data Analysis", which aims to unscramble latent structures in collected data: Statistical Learning, Model Selection, Information Fusion, Soccer Robots, Fuzzy Quantifiers, Emotions and Artifacts.

Best-selling author, Walter Savitch, uses a conversational style to teach programmers problem solving and programming techniques with Java. Readers are introduced to object-oriented programming and important computer science concepts such as testing and debugging techniques, program style, inheritance, and exception handling. It includes thorough coverage of the Swing libraries and event driven programming. The Java coverage is a concise, accessible

introduction that covers key language features. Thorough early coverage of objects is included, with an emphasis on applications over applets. The author includes a highly flexible format that allows readers to adapt coverage of topics to their preferred order. Although the book does cover such more advanced topics as inheritance, exception handling, and the Swing libraries, it starts from the beginning, and it teaches traditional, more basic techniques, such as algorithm design. The volume provides concise coverage of computers and Java objects, primitive types, strings, and interactive I/O, flow of control, defining classes and methods, arrays, inheritance, exception handling, streams and file I/O, recursion, window interfaces using swing objects, and applets and HTML. For Programmers.

This first issue of the semi-annual lifelong learning bibliography contains references to output from January to June 2001, a time of intense debate and reflection on lifelong learning in Europe. It also includes monographs, chapters, journal articles, legal texts, Internet sites, and CD-ROMs dealing with lifelong learning at European, international, and European Commission member state levels. The 506-item bibliography is structured under headings of current interest and by the situation in member states and the candidate countries. The Key Themes category includes skill development; human resources development;

learning innovation; accreditation of prior learning; guidance and counseling; and community-based learning. Topics under Transversal Themes are active citizenship, employability, and partnership. The category, Situation at European Level, covers European policy, national policy documents, European Union/EEA countries, and central and eastern European countries. The category, Situation at International Level, covers international organizations, Africa, Asia, Australia, United States, and Canada. In each category, literature is presented in alphabetical order by title, showing all important fields to enable identification of suitable documents. For titles not in English or French, a rough translation is provided. Documents have been indexed using the European Training Thesaurus. Descriptors are listed under each publication. An annex lists, by country, members of the documentary information network with address, Web address, and contact person. (YLB)

This Dictionary covers information and communication technology (ICT), including hardware and software; information networks, including the Internet and the World Wide Web; automatic control; and ICT-related computer-aided fields. The Dictionary also lists abbreviated names of relevant organizations, conferences, symposia and workshops. Text in French. This army of the Kingdom of Italy started during Bonaparte's first campaign with the creation of the Lombard and Cisalpine Legions. This army especially featured a greater number of enrolled troops, instead of volunteers. The Italian Royal Guard, from the beginning of the century, was the hub around which the Army of the Kingdom of Italy was formed. It took part in the great campaigns of the Empire. The transalpine uniforms often recalled those worn by their French brothers-in-arms. The Army of the Kingdom of Naples (from 1806 to 1815, commanded in succession by Joseph Bonaparte then Joachim Murat) inherited a tradition forged by the Bourbons. The Neapolitan Army, large but unreliable, was entrusted with defending the south of Italy with the French, against the Bourbons and the English; this did not prevent it from being mobilized alongside the French army in Spain or in divisions within the Grande Armée during the Russian Campaign.
