The words classic and romantic, we are often told, cannot be defined at all, and even if they could be defined, some would add, we should not be much profited. But this inability or unwillingness to define may itself turn out to be only one aspect of a movement that from Rousseau to Bergson has sought to discredit the analytical intellect—what Wordsworth calls “the false secondary power by which we multiply distinctions.” However, those who are with Socrates rather than with Rousseau or Wordsworth in this matter, will insist on the importance of definition, especially in a chaotic era like the present; for nothing is more characteristic of such an era than its irresponsible use of general terms. Now to measure up to the Socratic standard, a definition must not be abstract and metaphysical, but experimental; it must not, that is, reflect our opinion of what a word should mean, but what it actually has meant. Mathematicians may be free at times to frame their own definitions, but in the case of words like classic and romantic, that have been used innumerable times, and used not in one but in many countries, such a method is inadmissible. One must keep one’s eye on actual usage. One should indeed allow for a certain amount of freakishness in this usage. Beaumarchais, for example, makes classic synonymous with barbaric. One may disregard an occasional aberration of this kind, but if one can find only confusion and inconsistency in all the main uses of words like classic and romantic, the only procedure for those who speak or write in order to be understood is to banish the words from their vocabulary. Now to define in a Socratic way two things are necessary: one must learn to see a common element in things that are apparently different and also to discriminate between things that are apparently similar. A Newton, to take the familiar instance of the former process, saw a common element in the fall of an apple and the motion of a planet; and one may perhaps without being a literary Newton discover a common element in all the main uses of the word romantic as well as in all the main uses of the word classic; though some of the things to which the word romantic in particular has been applied seem, it must be admitted, at least as far apart as the fall of an apple and the motion of a planet. The first step is to perceive the something that connects two or more of these things apparently so diverse, and then it may be found necessary to refer this unifying trait itself back to something still more general, and so on until we arrive, not indeed at anything absolute—the absolute will always elude us—but at what Goethe calls the original or underlying phenomenon (Urphänomen). A fruitful source of false definition is to take as primary in a more or less closely allied group of facts what is actually secondary—for example, to fix upon the return to the Middle Ages as the central fact in romanticism, whereas this return is only symptomatic; it is very far from being the original phenomenon. Confused and incomplete definitions of romanticism have indeed just that origin—they seek to put at the centre something that though romantic is not central but peripheral, and so the whole subject is thrown out of perspective.

This volume contains the proceedings of the International Conference The Presidency of James Earl Carter Junior. Between Reformism, Pacifism and Human Rights, held in Rome on April 28, 2016, at the Institute Santa Maria in Aquiro, with the Senate of the Italian Republic patronage. Forty years after his election to the White House, it was deemed necessary to reflect on the

political activity of a President little considered, until now, by the Italian historiography. The Carter Presidency, inspired since its inception by a predominant religious sentiment, was marked by a clear break with the past. Themes such as the respect for human rights, dialogue with the historic Soviet enemy, pacifism as a weapon of the Middle East problem resolution, industrial development through a sustainable approach were introduced right from the thirty-ninth occupant of the White House. At the presidential elections of 1980, which saw him clash with the Republican Ronald Reagan, Carter paid especially the failures of his reform and economic policy: the US economic difficulties and the significant increase in the unemployment rate were the main reasons that cost him his reelection. Reformism, pacifism, respect for human rights: concepts that would continue to inspire Carter's policy, despite the defeat against Reagan.

Although recent works on Galileo's trial have reached new heights of erudition, documentation, and sophistication, they often exhibit inflated complexities, neglect 400 years of historiography, or make little effort to learn from Galileo. This book strives to avoid such lacunae by judiciously comparing and contrasting the two Galileo affairs, that is, the original controversy over the earth's motion ending with his condemnation by the Inquisition in 1633, and the subsequent controversy over the rightness of that condemnation continuing to our day. The book argues that the Copernican Revolution required that the hypothesis of the earth's motion be not only constructively supported with new reasons and evidence, but also critically defended from numerous old and new objections. This defense in turn required not only the destructive refutation, but also the appreciative understanding of those objections in all their strength. A major Galilean accomplishment was to elaborate such a reasoned, critical, and fair-minded defense of Copernicanism. Galileo's trial can be interpreted as a series of ecclesiastic attempts to stop him from so defending Copernicus. And an essential thread of the subsequent controversy has been the emergence of many arguments claiming that his condemnation was right, as well as defenses of Galileo from such criticisms. The book's particular yet overarching thesis is that today the proper defense of Galileo can and should have the reasoned, critical, and fair-minded character which his own defense of Copernicus had.

MLN pioneered the introduction of contemporary continental criticism into American scholarship. Critical studies in the modern languages--Italian, Hispanic, German, French--and recent work in comparative literature are the basis for articles and notes in MLN. Four single-language issues and one comparative literature issue are published each year.

In 2007 a symposium was held at Texas A&M University to celebrate the twenty-fifth anniversary of Texas A&M University Press's

publication of the first volume reporting the Yassiada shipwreck site. Seventeen papers from that symposium featured in this book broadly illustrate such varied topics as ships and seafaring life, maritime trade, naval texts, commercial cargoes, and recent developments in the analysis of the Yassiada ship itself.

In both Vasari's life and in his *Lives*, prints played important roles. This volume examines Giorgio Vasari's interest, as an art historian and as an artist, in engravings and woodblock prints, revealing how it sheds light on aspects of Vasari's career, and on aspects of sixteenth-century artistic culture and artistic practice. It is the first book to study his interest in prints from this dual perspective.

First published in 1997. Routledge is an imprint of Taylor & Francis, an informa company.

Cities are shaped as much by a repertoire of buildings, works and objects, as by cultural institutions, ideas and interactions between forms and practices entangled in identity formations. This is particularly true when seen through a city as forceful and splendid as Venice. The essays in this volume investigate these connections between art and identity, through discussions of patronage, space and the dissemination of architectural models and knowledge in Venice, its territories and beyond. They celebrate Professor Deborah Howard's leading role in fostering a historically grounded and interdisciplinary approach to the art and architecture of Venice. Based on an examination and re-interpretation of a wide range of archival material and primary sources, the contributing authors approach the notion of identity in its many guises: as self-representation, as strong sub-currents of spatial strategies, as visual and semantic discourses, and as political and imperial aspirations. Employing interdisciplinary modes of interpretation, these studies offer ground-breaking analyses of canonical sites and works of art, diverse groups of patrons, as well as the life and oeuvre of leading architects such as Jacopo Sansovino and Andrea Palladio. In so doing, they link together citizens and nobles, past and present, the real and the symbolic, space and sound, religion and power, the city and its parts, Venice and the Stato da Mar, the Serenissima and the Sublime Port.

School inclusion is a perennially popular yet polemic topic in most countries. This timely book explores what is known about inclusion, highlighting outstanding examples of inclusion to provide a complete overview of successful inclusion. The book concentrates on how to make inclusion work - from the view of internationally established practitioners in the field of teacher education - with a focus on what variables are likely to make a difference in practice. *What Works in Inclusion?* covers three key aspects: Theories of inclusive education Examples of how inclusion can be encouraged and facilitated What prevents inclusion from being successful Drawing on case studies from a wide range of countries, including USA, Australia, UK, Canada and Italy, there is focus on the positive aspects of inclusion: 'how' it can work and 'what actually works', helping you understand successful aspects of inclusion as well as developing an understanding of how inclusive education can best be implemented. In addition to the research-based accounts of how to make inclusion work, the book considers the difficulties that can arise in attempting to achieve successful inclusion and how such barriers can be overcome, to ensure a successful inclusive experience for both teachers and students. This is a key text for all serving and aspiring teachers and SENCOs, as well as those interested in inclusion and SEN in schools, and will inform and challenge in equal measure. Catharine Whittaker "Focusing on both theory and practice, this timely volume provides a refreshing set of challenges to all of us who are committed to the development of more inclusive education systems. The presentation of ideas and experiences from different countries is particularly powerful in this respect." Professor Mel Ainscow, University of Manchester, UK "Boyle and Topping provide a collection of salient chapters on critical issues pertaining to inclusive education from a collection of world leaders in the field. This book is scholarly, current, and research-based, yet at the same time readable and informative for a wide audience of university teachers and their students, along with practicing educators in the field. Recognizing that inclusive education is an ongoing project this book nevertheless provides a rigorous gestalt of inclusive education theory, practical advice for implementation, and potential barriers to success. This is one of the finest books on this topic currently available." Professor Tim Loreman, Faculty of Education, Concordia University College of Alberta, Canada

A history of Genoa, tracing the city's transformation from an obscure port into the capital of a small but thriving republic with an extensive overseas empire. Covering six centuries, the text interweaves political events, economic trends, social conditions and cultural accomplishments.

"Italian Literature before 1900 in English Translation provides the most complete record possible of texts from the early periods that have been translated into English, and published between 1929 and 2008. It lists works from all genres and subjects, and includes translations wherever they have appeared across the globe. In this annotated bibliography, Robin Healey covers over 5,200 distinct editions of pre-1900 Italian writings. Most entries are accompanied by useful notes providing information on authors, works, translators, and how the translations were received. Among the works by over 1,500 authors represented in this volume are hundreds of editions by Italy's most translated authors - Dante Alighieri, [Niccoláo] Machiavelli, and [Giovanni] Boccaccio - and other hundreds which represent the author's only English translation. A significant number of entries describe works originally published in Latin. Together with Healey's Twentieth-Century Italian Literature in English Translation, this volume makes comprehensive information on translations accessible for schools, libraries, and those interested in comparative literature."--Pub. desc.

The book is the second volume of a series of studies dealing with the Submerged literature in ancient Greek culture (s. vol. 1: G. Colesanti, M. Giordano, eds., *Submerged Literature in Ancient Greek Culture. An Introduction*, Berlin-Boston, de Gruyter, 2014). It is a peculiar starting point of the research in the field of Greek culture, since it casts a light on many case studies so far not yet analyzed as literary products subjected to the process of submersion: e.g. oracles, philosophy, phlyax play, epigrams, Aesopic fables, periplus, sacred texts, mysteries, medical treatises, dance, music. Therefore the book investigates the complex and manifold dynamics of 'emergence' and 'submersion' in ancient Greek literary culture, dealing especially with matters as the interaction between orality and literacy, the authorship, the cultural transmission, the folklore. Moreover, the book offers the reader new stimulating approaches in order to reconstruct the wide frame which contained the overall cultural processes, including the literary products subjected to the submersion, in a chronological span going from Greek archaic age to the Imperial age.
