Catalina Island—the name conjures images of a pristine tropical island. Located twenty-six miles off the coast of Southern California, Catalina Island is known as the “island of romance” for good reason. A popular destination for boaters, fishermen, and tourists, it’s a recreational mecca at sea—a place where people come to escape from the reality of urban life. Boasting 86,000 square miles of unspoiled and undeveloped natural beauty, Catalina is an island paradise with wild animals, surrounded by an ocean teeming with fish. For thirty-two years, Charles Douglas “Doug” Oudin lived a fantasy life on this secluded oasis. As the former harbormaster, he saw it all—harrowing storms, dramatic ocean rescues, traumatic accidents, and the tragic death of actress Natalie Wood. Encounters with sharks, buffalo, wild boar, and even a “sea serpent” are just a few of the strange and unique experiences he had while living on the island. Now, in this memoir, he shares his story. For those who know and love Catalina—and those who have always wanted to visit—Between Two Harbors reveals a glimpse of what life on the island is really like.

With the help of his new teammates, Paul begins to discover what lies beneath the surface of his strange new hometown. And he also gains the courage to face up to some secrets his family has been keeping from him for far too long. In Tangerine, it seems, anything is possible.

A landmark new history from design journalist Nick Hull, Land Rover Design – 70 years of Success offers a detailed insight to the company's design story, from the early days of Land Rover in Solihull to the latest generation of the Range Rover Velar in 2018. The Land Rover was born from a desperate need by the Rover Company to develop a stop-gap model to provide cashflow in the post-war years. The original aim of a simple 4x4 agricultural tool soon developed into a multi-purpose vehicle that became the mainstay of the British Army and produced numerous offshoots for the emergency services, police, forestry and aid agencies worldwide. This book details the personalities involved in the various projects since the late 1940s up to today: the designers, modellers and studio engineers. It charts the development of Land Rover and Range Rover projects in the UK, particularly those designed in the Gaydon studio that opened in 1996, and is still a key part of JLR’s design resource. From the early days of chalk drawings and wooden models to today’s digital renderings and milled clays for the latest Range Rover Evoque, Land Rover’s designers and technicians have never been short of creativity. This book tells their story, in their own words, and is a fitting tribute to the spirit and ethos of Land Rover design and engineering.

In 1992 Ineke Bosman founded the PCC-Hand in Hand Community with three other Ghanaians. This is an inter-religious community that gives shelter and rehabilitation to abandoned and mentally handicapped children in Ghana. "I was moved by the plight of the mentally handicapped children who were abandoned and had nowhere to stay, literally nowhere. By 1992 I started to take some in my home and later this grew into the community as it is now, in the year 2006: a large and beautiful village in Nkoranza where 41 mentally handicapped children find a home and where 15 other youngsters find a new life by learning skills in the sheltered workshop." In the past few years Ineke Bosman has written down stories of Ghanaian emigrants. Looking for a way out of poverty, Libye, Europe, calls to them. Some are stories of success, but there are also stories of failures.

Son of the Native Soil is a work whose quiet maturity glows in both subject and style. Here, love heals but the force of hate is very real. The hero, Lucas Achamba, by charisma and love undertakes to unite Dudum clan which politicking and egotism have split. His quick success stirs bitter rivalry and heartless cruelty that decide his fate. Nature is jumpy and even hysterical at this, and Ambanasom exposes it with fine evocative mastery. The style is refined and honeyed by sonal devices and visual tropes that half conceal subtle slashes at human foibles.

The Sinai peninsula holds a unique strategic and political significance for Egypt and its neighbors. Enclosed by the Suez Canal and bordering Gaza and Israel, Egypt's rugged eastern province has been the cornerstone of the Egyptian-Israeli peace accords, yet its internal politics and security have remained largely under media blackout. While the international press descended on the capital Cairo in January 2011, Sinai's armed rebellion was largely ignored. The regime lost control of the peninsula in a matter of days and, since then, unprecedented chaos has reigned. In this crucial analysis, Mohannad Sabry argues that Egypt's shortsighted security approach has continually proven to be a failure.
