The iconographic people, The 'Bushmen' or 'San' of the Kalahari, have been the subject of abundant social research over the years. Keyan Tomaselli and his research team from the University of KwaZulu-Natal reflect critically on the way the San have been represented. He uncompromisingly and aptly illustrates the many ethical contradictions in doing fieldwork among the San.

Why Not? After all, no-one had ever done it before. It would be one of the longest of all overland journeys – half way round the world, from the English Channel to Singapore. They knew that several expeditions had already tried it. Some had got as far as the deserts of Persia; a few had even reached the plains of India. But no one had managed to go on from there: over the jungle clad mountains of Assam and across northern Burma to Thailand and Malaya. Over the last 3,000 miles it seemed there were 'just too many rivers and too few roads'. But no-one really knew ... In fact, their problems began much earlier than that. As mere undergraduates, they had no money, no cars, nothing. But with a cool audacity, which was to become characteristic, they set to work – wheedling and cajoling. First, they coaxed the BBC to come up with some film for a possible TV series. They then gently persuaded the manufacturers to lend them two factory-fresh Land Rovers. A publisher was even sweet-talked into giving them an advance on a book. By the time they were ready to go, their sponsors (more than 80 of them) ranged from whiskey distillers to the makers of collapsible buckets. In late 1955, they set off. Seven months and 12,000 miles later, two very weary Land Rovers, escorted by police outriders, rolled into Singapore – to flash bulbs and champagne. Now, fifty years on, their book, 'First Overland', is republished – with a foreword by Sir David Attenborough. After all, it was he who gave them that film.

The Land Rover has become an icon across the world, famed for its classic design, its practicality and its longevity. In this revised edition of his acclaimed book, first issued as Land Rover - 60 Years of the 4 x 4 Workhouse, James Taylor charts sixty-five years of Land Rover development in comprehensive detail, bringing the story right up to date with the latest Defender variants. Contents include: Prototypes and development vehicles; Standard production models; The special editions; Land Rovers built outside the UK; Special conversions; Military variants; The Land Rovers that never were. The first book to look at the story of the Land Rover's gradual evolution. Comprehensively researched, extensively illustrated and accessibly presented, this will be an indispensable read for all those who have an interest in the legend that is Land Rover. Superbly illustrated with 476 colour photographs. James Taylor's major specialization is the Rover company and its descendants, and he is widely acknowledged as the pre-eminent historian of the Land Rover.

Six days ago, astronaut Mark Watney became one of the first people to walk on Mars. Now, he's sure he'll be the first person to die there. After a dust storm nearly kills him and forces his crew to evacuate while thinking him dead, Mark finds himself stranded and completely alone with no way to even signal Earth that he's alive--and even if he could get word out, his supplies would be gone long before a rescue could arrive. Chances are, though, he won't have time to starve to death. The damaged machinery, unforgiving environment, or plain old "human error" are much more likely to kill him first. But Mark isn't ready to give up yet. Drawing on his ingenuity, his engineering skills--and a relentless, dogged refusal to quit--he steadfastly confronts one seemingly insurmountable obstacle after the next. Will his resourcefulness be enough to overcome the impossible odds against him?

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters.

Chronicles the history and archaeological study of Lake George, New York's sunken bateaux of 1758. In Ghost Fleet Awakened, Joseph W. Zarzynski reveals the untold story of a little-recognized sunken fleet of British warships, bateaux, from the French and Indian War (1755–1763). The story begins more than 250 years ago, when bateaux first plied the waters of Lake George, New York. Zarzynski enlightens readers with a history of these utilitarian vessels, considered the most important vessels that transported armies during eighteenth-century wars in North America, and includes their origins and uses. By infusing the book with underwater archaeology doctrine, Zarzynski shows the nautical significance of these colonial craft. In the autumn of 1758, the British command at Lake George made a daring decision to deliberately sink two floating batteries (radeaux), some row galleys
