The bestselling author of *The Particular Sadness of Lemon Cake* returns with a wondrous collection of dreamy, strange, and magical stories. Truly beloved by readers and critics alike, Aimee Bender has become known as something of an enchantress whose lush prose is “moving, fanciful, and gorgeously strange” (*People*), “richly imagined and bittersweet” (*Vanity Fair*), and “full of provocative ideas” (*The Boston Globe*). In her deft hands, “relationships and mundane activities take on mythic qualities” (*The Wall Street Journal*). In this collection, Bender's unique talents sparkle brilliantly in stories about people searching for connection through love, sex, and family—while navigating the often painful realities of their lives. A traumatic event unfolds when a girl with flowing hair of golden wheat appears in an apple orchard, where a group of people await her. A woman plays out a prostitution fantasy with her husband and finds she cannot go back to her old sex life. An ugly woman marries an ogre and struggles to decide if she should stay with him after he mistakenly eats their children. Two sisters travel deep into Malaysia, where one learns the art of mending tigers who have been ripped to shreds. In these deeply resonant stories—evocative, funny, beautiful, and sad—we see ourselves reflected as if in a funhouse mirror. Aimee Bender has once again proven herself to be among the most imaginative, exciting, and intelligent writers of our time.

The bestselling book revealing why Americans are so fearful, and why we fear the wrong things--now updated for the age of Trump In the age of Trump, our society is defined by fear. Indeed, three out of four Americans say they feel more fearful today than they did only a couple decades ago. But are we living in exceptionally perilous times? In his bestselling book *The Culture of Fear*, sociologist Barry Glassner demonstrates that it is our perception of danger that has increased, not the actual level of risk. Glassner exposes the people and organizations that manipulate our perceptions and profit from our fears: politicians who win elections by heightening concerns about crime and drug use even as rates for both are declining; advocacy groups that raise money by exaggerating the prevalence of particular diseases; TV shows that create a new scare every week to garner ratings. Glassner spells out the prices we pay for social panics: the huge sums of money that go to waste on unnecessary programs and products as well as time and energy spent worrying about our fears. All the while, we are distracted from the true threats, from climate change to worsening inequality. In this updated edition of a modern classic, Glassner examines the current panics over vaccination and "political correctness" and reveals why Donald Trump's fearmongering is so dangerously effective.

Music and dyslexia is of particular interest for two reasons. Firstly, research suggests that music education can benefit young dyslexics as it helps them focus on auditory and motor timing skills and highlights the rhythms of language. Secondly, dyslexic musicians at a more advanced level face particular challenges such as sight-reading, written requirements of music examinations and extreme performance nerves. This is a sequel to the highly successful *Music and Dyslexia: Opening New Doors*, published in 2001. The field of dyslexia has developed rapidly, particularly in the area of neuropsychology. Therefore this book focuses on these research advances, and draws out the aspects of music education that benefit young dyslexics. The contributors also discuss the problems that dyslexic musicians face, and several chapters are devoted to sight-reading and specific strategies that dyslexics can use to help them sight-read. The book offers practical techniques and strategies, to teachers and parents to help them work with young dyslexics and dyslexic musicians.

Soap operas and telenovelas are watched by millions of people around the world every day. As cultural, social, and economic phenomena, examining them will further our understanding of the role of global media content in the digital age. Moreover, as these programs continue to be exported and transformed at regional levels, and through digitalization, it is more important than ever to analyze where the genre has been, where it is now, and where it is going.
 This collection brings together original scholarship from an international and trans-disciplinary perspective. Chapters address timely issues, theories, and debates that are inextricably linked to soap operas and telenovelas as global industries, as sites for new audiences, and as hybrid cultural products within the digital landscape. Bringing depth and originality to the subject area, each chapter demonstrates the richness of these genres and their long-term significance as the televisual landscape evolves and becomes increasingly reliant on technological and creative innovations.

CTS's classic prayer book in a beautiful and durable binding (includes the Mass).

A true story that is both uniquely moving and exceptionally inspiring, Emergence is the first-hand account of a courageous autistic woman who beat the odds and cured herself. As a child, Temple Grandin was forced to leave her "normal" school and enroll in a school for autistic children. This searingly honest account captures the isolation and fears suffered by autistics and their families and the quiet strength of one woman who insisted on a miracle.

When Paul Collins's son Morgan was two years old, he could read, spell, and perform multiplication tables in his head...but not answer to his own name. A casual conversation-or any social interaction that the rest of us take for granted-will, for Morgan, always be a cryptogram that must be painstakingly decoded. He lives in a world of his own: an autistic world. In Not Even Wrong, Paul Collins melds a memoir of his son's autism with a journey into this realm of permanent outsiders. Examining forgotten geniuses and obscure medical archives, Collins's travels take him from an English churchyard to the Seattle labs of Microsoft, and from a Wisconsin prison cell block to the streets of Vienna. It is a story that reaches from a lonely clearing in the Black Forest into the London palace of King George I, from Defoe and Swift to the discovery of evolution; from the modern dawn of the computer revolution to, in the end, the author's own household. Not Even Wrong is a haunting journey into the borderlands of neurology - a meditation on what "normal" is, and how human genius comes to us in strange and wondrous forms.

WINNER OF 'BEST NON FICTION' IN THE GOODREADS CHOICE AWARDS 2013 It's estimated that one in almost a hundred people are diagnosed as being on the autistic spectrum but there is far more hope for them today than ever before thanks to groundbreaking new research. In this fascinating and highly readable book, Temple Grandin offers her own experience as an autistic person alongside remarkable new discoveries about the autistic brain, as well as genetic research. She also highlights long-ignored sensory problems as well as the need to treat autism symptom by symptom, rather than with an umbrella diagnosis. Most exciting of all, she argues that raising and educating children on the autistic spectrum needs to be less about focusing on their

weaknesses, and more about fostering their unique contributions.

De tragische gebeurtenissen in Rwanda, Srebrenica en Kosovo hebben geleid tot een herbezinning over de rol en verantwoordelijkheid van de internationale gemeenschap. In het beginsel Responsibility to Protect (R2P), dat in 2005 door de wereldleiders werd omarmd, hebben individuele staten nog steeds de primaire verantwoordelijkheid voor de bescherming van hun inwoners. Maar als ze die verantwoordelijkheid niet kunnen of willen nemen, komt de verantwoordelijkheid bij de internationale gemeenschap te liggen. R2P heeft de ambitie om herhaling van Rwanda, Srebrenica en Kosovo te voorkomen, maar er bestaat nog grote onduidelijkheid over inhoud en potentieel van dit beginsel. Deze bundel verkent R2P als moreel, politiek en juridisch beginsel en onderzoekt hoe de Verenigde Naties, de Europese Unie, individuele staten en NGO's R2P kunnen gebruiken om ernstige mensenrechtenschendingen te voorkomen.
