A boy learns what it means to give and receive love in this beautifully refreshed edition of Lottery Rose from Newbery Award-winning author Irene Hunt. Georgie Burgess doesn't talk about the abuse that he receives from his mother and her boyfriend. Even though he's constantly getting into trouble at school, he continues to hide his hurt, refusing to tell anyone what life is like at home. Instead, he finds escape between the pages of books depicting beautiful gardens and flowers. When Georgie wins a small rosebush in a supermarket lottery, he gives it all the love and caring he's never had. Soon after, his life begins to change when child services remove him from his mother's care and look for a new, safe home for him. But all the while, Georgie still needs to find a home for his rosebush, and through the people he meets, he slowly learns what it means to be loved and accepted.

The book follows a first edition published in 1989, which focused on the severe economic crisis Ghana faced during the late 1970s and the early 1980s. In this second edition, the authors extend the review up to the mid-2010s, covering the entire period since independence, with a special focus on shifts in economic policy, starting with the adoption of the Economic Recovery Programme in 1983. Huq and Tribe provide systematic coverage of Ghanaian economic development since its independence, reviewing the two main modes of development that have been practiced; and offer an updated, rich data bank. By analyzing the wider macroeconomy of Ghana; its individual sectors; money, banking and trade; infrastructure and environmental policies; and Ghana's poverty, welfare and income distribution, the authors are able to draw vital lessons from the country's economic development. ?

Provides an overview of the political, social, and cultural development of Ghana from precolonial times to the present. "A good read for anyone who wants to understand what actually determines whether a developing economy will succeed" (Bill Gates, "Top 5 Books of the Year"). An Economist Best Book of the Year from a reporter who has spent two decades in the region, and who The Financial Times said "should be named chief myth-buster for Asian business." In How Asia Works, Joe Studwell distills his extensive research into the economies of nine countries—Japan, South Korea, Taiwan, Indonesia, Malaysia, Thailand, the Philippines, Vietnam, and China—into an accessible, readable narrative that debunks Western misconceptions, shows what really happened in Asia and why, and for once makes clear why some countries have boomed while others have languished. Studwell's in-depth analysis focuses on three main areas: land policy, manufacturing, and finance. Land reform has been essential to the success of Asian economies, giving a kick-start to development by utilizing a large workforce and providing capital for growth. With manufacturing, industrial development alone is not sufficient, Studwell argues. Instead, countries need "export discipline," a government that forces companies to compete on the global scale. And in finance, effective regulation is essential for fostering, and sustaining growth. To explore all of these subjects, Studwell journeys far and wide, drawing on fascinating examples from a Philippine sugar baron's stifling of reform to the explosive growth at a Korean steel mill. "Provocative . . . How Asia Works is a striking and enlightening book . . . A lively mix of scholarship, reporting and polemic." —The Economist Sustainability covers environmental, social and economic dimensions, and requires a multi-disciplinary approach in order to examine, explore and critically engage with issues and advances in its related areas. As we are aware, climate change is a certainty and it affects many economic sectors, including agriculture, particularly production of crop and livestock enterprises. Vast regional differences in these impacts are expected for various parts of the world, culminating in changes in trade patterns, and perhaps eventually even threatening the food security in certain parts of the world. Agricultural sustainability may be especially threatened by climate extremes, such as heat waves, droughts, and floods. However, not all changes induced by climate change would be negative; some may even be positive. Undoubtedly, there would be winners and losers within a nation, as well as among countries. Achieving sustainability would require changes in the way we manage agriculture. Equally important in this discourse is to find solutions to achieve sustainability in the wake of climate change, one of the major threats to sustainability. This book is devoted to various aspect of sustainable agriculture and climate change and their interplay.

"Palast is astonishing, he gets the real evidence no one else has the guts to dig up." Vincent Bugliosi, author of None Dare Call it Treason and Helter Skelter Award-winning investigative journalist Greg Palast digs deep to unearth the ugly facts that few reporters working anywhere in the world today have the courage or ability to cover. From East Timor to Waco, he has exposed some of the most egregious cases of political corruption, corporate fraud, and financial manipulation in the US and abroad. His uncanny investigative skills as well as his no-holds-barred style have made him an anathema among magnates on four continents and a living legend among his colleagues and his devoted readership.

This exciting collection, now revised and updated, brings together some of Palast's most powerful writing of the past decade. Included here are his celebrated Washington Post exposé on Jeb Bush and Katherine Harris's stealing of the presidential election in Florida, and recent stories on George W. Bush's payoffs to corporate cronies, the payola behind Hillary Clinton, and the faux energy crisis. Also included in this volume are new and previously unpublished material, television transcripts, photographs, and letters.

Ever heard the story of the giant ship engine that failed? The ship's owners tried one expert after another, but none of them could figure out how to fix the engine. Then they brought in an old man who had been fixing ships since he was a youngster. He carried a large bag of tools with him, and when he arrived, he immediately went to work. He inspected the engine very carefully, top to bottom. Two of the ship owners were there, watching this man hoping he would know what to do. After looking things over, the old man reached into his bag and pulled out small hammer. He gently tapped something. Instantly, the engine lurched into life. He carefully put his hammer away. The engine was fixed! A week later, the owners received a bill from the old man for ten thousand dollars.. What?! The owner exclaimed. He hardly did anything!" "An elegant and amusing account" of how gambling has been reshaped by the application of science and revealed the truth behind a lucky bet (Wall Street Journal). For the past 500 years, gamblers-led by mathematicians and scientists-have been trying to figure out how to pull the rug out from under Lady Luck. In *The Perfect Bet*, mathematician and award-winning writer Adam Kucharski tells the astonishing story of how the experts have succeeded, revolutionizing mathematics and science in the process. The house can seem unbeatable. Kucharski shows us just why it isn't. Even better, he demonstrates how the search for the perfect bet has been crucial for the scientific pursuit of a better world. *The Magic Goat* won the 1999 Toyota/Children's Literature Foundation Best Picture Story Book Illustrator's Award. Beautifully produced and illustrated on art paper, the story tells of a time long ago when there were two great kingdoms in the world: the mighty Animal Kingdom and the Kingdom of People. But Goat and Sheep find in their search for salt, that not all the animals in their kingdom are friendly and well-intentioned. Meshack Asare is one of Africa's top children's writers and illustrators, and won The Noma Award for Publishing in Africa 1982.

The first edition of this book-*Taxation in Ghana: A Fiscal Policy Tool for Development*- is the product of considerable tax research from 1943 to 2018, spanning a period of 75 years and grounded in knowledge and concepts; as well as, applications through an extended period of tax practice, teaching and learning; combined with international exposure. A lot of insights have been illuminated based on lessons learned and drawn from other countries, including the United States of America to enrich the contents. Against the backdrop of the dynamic nature of taxation and fiscal policy. Most of the existing taxation books in Ghana focused on tax practice. So, the purpose of this book is to bridge the taxation scholarship gap. In addition to traditionally-treated topics in most taxation books in Ghana, the novelty in this book is the inclusion of important topics on tax planning, tax reforms, and tax administration, and many more. As a result, specific recommendations have been proffered for the consideration of policy makers in developing countries. References and Acts of Parliament; supported by appendices have been provided for further studies on the subject. A true story of the first major oil discovery in Ghana by Mr. George Yaw Owusu with M. Rutledge McCall published 2017 in the United States of America: *In Pursuit of JUBILEE* was used to enrich the discussion on petroleum (Oil and Gas) in Chapter 48 of this textbook. Additionally, Apostle Professor Opoku Onyinah of the Church of Pentecost has been presented for his phenomenal transformational leadership in Africa in Chapter 66. The book has been designed for: (1) Individual study, (2) Group study, (3) Lecture material, (4) Policy Manual, and (5) library or reference.

This is the fictional story of how Gary Whitemore, a forty-something school teacher, won the lottery in 2012 and what happens to him after his win, including trying to keep it a secret and how it impacts on his life. Just what do you do with all that money and who do you tell?

"Through the lens of personal experience, Dr. Armah walks us through the scholarly research on culture, corruption and economics as it applies to the Ghanaian experience. We are left with a partially disappointing picture of a country wealthy in people and resources, but poor in growth but cannot help but imagine that Ghana has turned a corner and that history may well turn out to be kind to the country Dr. Armah clearly loves." –Kenneth Leonard, Associate Professor, University of Maryland at College Park "Management consultants and corporate leadership experts have often verified Peter Drucker's observation that 'culture eats strategy for breakfast.' This book represents a heartfelt effort to recognize and grapple with the power of culture over economic strategy and development policy. Stephen Armah's reflections on Ghanaian experiences reveal how a deeper appreciation of culture and mindset can help us understand the persistence of corruption and elements of a path forward." –Alex Winter-Nelson, Director of ACES Office of International Programs, University of Illinois at Urbana-Champaign "This book is an interesting introduction to the ways in which culture influences economic growth and productivity in Ghana. Using a combination of revealing anecdotes and citations from the literature Dr. Armah explores the ways that culture can positively, and negatively, impact the institutions that are necessary to allow a country to thrive. Aspects of culture that are a hindrance cannot be changed immediately, but can, over time, adapt to improve the country." –Erik Cheever, Professor, Department of Engineering, Swarthmore College "An easy and thought provoking read! It contains a bold message that I expect will facilitate an important conversation not only in Ghana but across Africa." –Saweda Liverpool-Tasie, Associate Professor of Agricultural, Food, and Resource Economics, Michigan State University "Armah's thesis is that corruption, economic inefficiency, and weak formal institutions are culturally rooted in Ghana, and that the real work of development involves changing the worldviews that give life events their meaning and determine how people respond to formal policies and institutions. This is a controversial argument that will provoke lively debate. Armah's book puts the literature on economic development and culture into dialogue with stories of life in post-independence Ghana." –Stephen A. O'Connell, Gil and Frank Mustin Professor of Economics, Swarthmore College Using Ghana as a case study, this book argues that local culture and tradition play a role in shaping economic institutions that operate in a country. This book focuses on how certain cultural practices lead to an environment more susceptible to cronyism and corruption. The book then discusses the relationship between culture and rampant corruption, and how these in sum have harmed Ghana's economic development. "I have no doubt that culture, in terms of attitudes, values, norms and behavior, is the single most important explanatory factor in Ghana's underdevelopment. It explains the widespread corruption, poor work ethic and indiscipline. These are the issues Stephen Armah courageously takes on in this book as needing to be addressed in Ghana's development." -Stephen Adei, Professor Emeritus, Ashesi University "Stephen Armah's *Nurturing Sustainable Prosperity in West Africa* explores and interprets the economics, transnational organizations, socio-cultural politics as contexts and processes for understanding corruption in Ghana, in particular and Africa as a whole. Focusing on the continuous transactions among Ghanaians with reference to their social and personal obligations against the backdrop of the pervasive corruption exemplified in his case studies, Armah clearly explains the process of constructing socio-political mores and policies to remedy or root out chronic corruption. Armah examines the institutionalized and non-formal customary practices that engender nepotism, absenteeism, lawlessness and general malaise that hamper development. The book provides an important analysis and solutions to corruption. It will be of interest to not only to scholars of economics but also, to the general reader, policymakers and servant-leaders in contemporary Africa." -Pashington Obeng, Dean of the Faculty of Arts and Science, Ashesi University

This is the first book to provide winning strategies for the small buy-in (\$100 or less) no-limit hold'em tournaments that have exploded in poker rooms all over the country-and on the Internet. The strategies for small buy-in no-limit hold'em tournaments are similar to the big-money games, but the important factors-hand value, position, aggression and others, and speed of play-cause a radical change of strategy.

Snyder recounts his own experience with these methods at a win rate of almost 300% and gives readers specific strategies for winning the big money available in prizes at the hundreds of small buy-in no-limit hold'em tournaments taking place weekly around the country and on the Internet.
