

Leapfrog Baby Little Leaps Parent Instruction Guide

Standards-Based Connections Reading for kindergarten offers focused skill practice in reading comprehension. A skill assessment will point out students' learning gaps. This allows teachers to choose appropriate student pages for individualized remediation. The student pages emphasize five important reading comprehension skills: summarizing, inferring, story elements, comparing and contrasting, and cause and effect. The book includes high-interest fiction and nonfiction, with texts about baby foxes, getting ready for school, bugs, jungle animals, and more. --Each 96-page book in the Standards-Based Connections Reading series includes a skill assessment, an assessment analysis, targeted practice pages, and an answer key, making this series an ideal resource for differentiation and remediation. The skill assessments and assessment analyses help teachers determine individualized instructional needs. And, the focused, comprehensive practice pages and self-assessments guide students to reflection and exploration for deeper learning!

Buy, Buy BabyHow Consumer Culture Manipulates Parents and Harms Young MindsHoughton Mifflin Harcourt

An investigative journalist analyzes the diverse ways in which marketers and promoters exploit infants and toddlers and the potentially damaging impact of that exploitation on the family and society as a whole.

A global study of modern adaptations for readers of all ages of Little Red Riding Hood.

Provides lists of selling prices of items found on eBay in such categories as antiques, boats, books, cameras, coins, collectibles, dolls, DVDs, real estate, stamps, tickets, and video games.

A young girl who loves Double Dutch is caught in the crossfire of the secrets she, her best friend, and the school bullies are keeping in this emotional middle grade novel. Delia loves Double Dutch more than just about anything, and she's really good at it—so good she and her teammates have a shot at winning the World Double Dutch Championships. Delia would die if she couldn't jump—but she's hiding something could keep her off the team next year. Delia's friend Randy has a secret too, one that has him lonely and scared. And while Delia and Randy struggle to hide parts of themselves, their school is abuzz with rumors about what malicious mischief the terrible Tolliver twins—who just may have a hidden agenda of their own—are planning. Delia and Randy's secrets collide on what should be the happiest day of Delia's life, and the collision threatens to destroy their friendship. Why can't life be as easy for Delia as Double Dutch?

Learn about unusual shapes along with the alphabet in ABC Shapes, a fun and educational board book that combines the ABCs with fun and unconventional shapes. Going beyond the typical preschool shapes like circles and squares, ABC Shapes introduces arches and ellipses, cubes and wedges, and even helixes and nanagons. Each page highlights an unusual shape, one for every letter of the alphabet, and features a colorful illustration. The beautiful and engaging illustrations of animals, people, and objects prominently feature each shape, ensuring parents and children love learning the fundamentals of shapes and the alphabet together.

All parents want their children to read well and to succeed—and experts agree that improving literacy begins at birth.

Reading aloud to your child, sharing simple games and wordplay, and developing letter knowledge start your child off on the right foot for school and life. Now the esteemed Lee Pesky Learning Center has created this easy, accessible reference for parents to help foster better literacy skills in children. Topics are individually tailored for three age ranges—infant, toddler, and preschool—and include • the best read-aloud books to develop sound awareness • the perfect picture books for encouraging letter knowledge • ways to promote verbal language and build vocabulary • the benefits of symbolic play • fun (and educational) games for car trips • helping youngsters “write” at home • great gift ideas for kids • warning signs of a learning disability The fundamentals of reading start at home. Every Child Ready to Read helps parents motivate their children to learn, and to become confident readers who will always enjoy reading.

A collection of more than 200 short poems by both known and anonymous American and English authors.

What's that noise? The jungle can be a scary place for a tiny tree frog like Felix, and all the strange noises are making him a little bit jumpy. Help Felix find a safe place -- and perhaps a special someone -- so he can nod off for a peaceful sleep.

Introduces counting using simple words and item counting.

Designed to help babies, toddlers, and preschoolers learn to read. Includes over 50 new and familiar key words.

In Charles Fuge's I Know a Rhino you'll get to have tea with a rhino, dance with an orangutan, and more!

Exemplary stories of innovation from around the world In an age of rising inequality, getting a good education increasingly separates the haves from the have nots. In countries like the United States, getting a good education is one of the most promising routes to upper-middle-class status, even more so than family wealth. Experts predict that by 2030, 825 million children will reach adulthood without basic secondary-level skills, and it will take a century for the most marginalized youth to achieve the educational levels that the wealthiest enjoy today. But these figures do not even account for the range of skills and competencies needed to thrive today in work, citizenship, and life. In a world where the ability to manipulate knowledge and information, think critically, and collaboratively solve problems are essential to thrive, access to a quality education is crucial for all young people. In Leapfrogging Inequality, researchers chart a new path for global education by examining the possibility of leapfrogging—harnessing innovation to rapidly accelerate educational progress—to ensure that all young people develop the skills they need for a fast-changing world. Analyzing a catalog of nearly 3,000 global education innovations, the largest such collection to date, researchers explore the potential of current practices to enable such a leap. As part of this analysis, the book presents an evidence-based framework for getting ahead in education, which it grounds in the here-and-now by narrating exemplary stories of innovation from around the world. Together, these stories and resources will inspire educators, investors, leaders of nongovernmental organizations, and policymakers alike to rally around a new vision of educational progress—one that ensures we do not leave yet another generation of young people behind.

The magazine that helps career moms balance their personal and professional lives.

As a mother, Lisa Guernsey wondered about the influence of television on her two young daughters. As a reporter, she resolved to find out. What she first encountered was tired advice, sensationalized research claims, and a rather draconian mandate from the American Academy of Pediatrics: no TV at all before the age of two. But like many parents, she wanted straight answers and realistic advice, so she kept digging: she visited infant-perception labs and child development centers around the country. She interviewed scores of parents, psychologists, cognitive scientists, and media researchers, as well as programming executives at Noggin, Disney, Nickelodeon, Sesame Workshop, and PBS. Much of what she found flies in the face of conventional wisdom and led her to conclude that new parents will be best served by focusing on “the three C’s”: content, context, and the individual child. Advocating a new approach to television and DVDs, Guernsey focuses on infants to five-year-olds and goes beyond the headlines to explore what exactly is “educational” about educational media. She examines how play and language development are affected by background and foreground television and how to choose videos that are age-appropriate. She explains how to avoid the hype of “brain stimulation” and focus instead on social relationships and the building blocks of language and literacy. Along the way, Guernsey highlights independent research on shows ranging from Dora the Explorer to Dragon Tales, and distills some surprising new findings in the field of child development. Into the Minds of Babes is a fascinating book that points out how little credible research exists to support the AAP’s dire recommendation. Parents, teachers, and psychologists will be relieved to learn positive approaches to using videos with young children and will be empowered to make their own informed choices.

Learn key preschool math skills with Leap as you roller-skate through town visiting friends and solving problems along the way.

Introduces musical notation and melodies on interactive paper piano.

This engaging collection features popular Bible stories from the Old and New Testaments. Features whimsical illustrations and simple text, ideal for young readers.
