The most effective method of mastering any language is to get involved in real practice of the language rather than memorizing and doing tests. Thus, why do not we change our attitude and learn naturally? All the tools and materials are available starting with videos and ending with travel and reading. And the most effective type of reading is the one that makes you more interested and entertained. Nothing like jokes can interest and amuse us. They create an enjoyable atmosphere and put a smile on our faces. And above all, they stick in our memory forever because our memories save data which is related to some feelings or emotions. (for example, when we are shocked by some news we will remember this news for years - when we go on an exciting vacation with our loved ones, we will remember all of the details for years ... ). Jokes usually make us overjoyed and happy every time we hear or tell them. They can stick in memory without any effort, giving us a great deal of grammar, nouns, verbs, adjectives, idioms in a way that makes them present in our mind and ready to use. For this reason, I truly recommend jokes as a natural method of learning the language in a funny and interesting manner. And in this book, I will show how to make use of every joke and develop your language without being fed up or stressed.

In their book, Othman and Senom provide a unique insight into the challenges faced by novice English as a Second Language (ESL) teachers and establish how mentoring can provide effective support for new teachers' professional development. The book demonstrates the theoretical background for viewing

mentoring as a process crucial to novice teachers' development, particularly to the teachers' ability to succeed and grow in a specific workplace environment. Using case studies from a Malaysian context, this book provides a comprehensive understanding of how mentoring can serve as a strategy to facilitate the transition of novice ESL teachers from a teacher education programme to life in real classrooms. Through its case studies, the book will examine both theoretical and practical issues for mentors, teacher educators, policymakers, and administrators when mentoring new ESL teachers. This book will be valuable to researchers who are particularly interested in exploring novice teachers' identity development, and experienced teachers to help guide new teachers through the socialization process in their schools.

This volume brings together articles based on experimental and theoretical research from teachers working in diverse teaching backgrounds with varying experience, from research scholars to school teachers, from college and university teachers in India to a British native teaching in China. The contributions here provide a mix of global and local teaching scenarios, addressing the need for diagnostic tests, developing need-based material, using the mother tongue to ensure active participation of the masses, and re-examining the language policies in Asian countries. The papers collected here also explore the

implementation of Task-based Language Teaching, the integration of technology in developing language skills, and the use of games and activities to engage the interest of low level learners while teaching both literature and language, further linking them with their culture and society. The book offers a reflection of the changes that have taken place in the teaching environment in the last two decades, with the introduction of Communicative Language Teaching, and, as such, will be of immense help for policy framers and educators in South-Asian countries and in countries where English is a second or foreign language.

Furthermore, the volume offers valuable information for researchers working in the field of English Language Teaching (ELT), which can be used for reviewing literature and exploring the directions in which the new teaching methods and approaches are leading, and establishing the validity of research.

buzzer through the first weeks, months, and semesters of teaching English in China, sharing numerous stories, laughs, interesting facts, and many effective ways of teaching ESL. A Manual for Teaching English in China is packed with Bill Burkett's practical ideas, methods, and teaching techniques that can actually be used to teach ESL anywhere. Bill Burkett recently returned from a seven year stint of teaching English in the universities and training schools of Henan, China. An internationally renowned public speaker, Burkett has lived in 46 nations in the last 43 years. He developed a strong interest in linguistics which was fueled by his close association with interpreters. In Chinese classrooms where he taught English, he conducted active research, experimenting and taking student polls. He concentrated on eliminating speech impediments and strong accents. His education, experiences, and research shaped his philosophy of teaching English as a Second Language and formed the basis of his first ESL book, A Manual for Teaching English in China. Following the manual is Secrets to Better English which reveals a proven method of teaching ESL without accent. Although Burkett's doctorate is in philosophy, his love is making a difference in his students' lives by teaching diction and the skills of speech.

Knock-Knock Jokes for Kids is an all-new collection of knock-knock jokes that will have kids and kids-at-heart rolling in the aisles. Jokes like Knock knock. Who's there? Ben. Ben who? The history of modern European languages has been largely determined by the range of functions they have acquired, particularly after 1500. This development necessitated a notable expansion of their syntax and lexis, but is most characteristically reflected in the conventionalization of text types. Starting from the German concept of Textsorte as developed from the 1960s onwards, the present account is a first comprehensive attempt at charting the field for the history and present-day situation of the English language. In text types, a designation is linked with a more or less stable form which guides the writer's production as well as the reader's expectation, permitting one to recognize

straightforward uses as well as deliberate misuses. Some two thousand of such designations are here listed with minimal definitions and dates for first occurrences. The discussion then concentrates on selected types, which are seen as especially illustrative for English: book dedications, cooking recipes, advertisements, church hymns, lexical entries, and jokes. Their functions and development over time are treated in correlation with their specific linguistic characteristics and adaptations to different period styles and social changes in the readership. The functional range of text types in traditions outside England and the consequences of the export of English categories are exemplified by the history of Scots/Scottish English and of English in India. The arguments are accompanied by a lavish supply of textual excerpts and more than fifty pages of facsimiles, which are especially relevant for insights derived from typographical features. A full bibliography and indices are provided at the end. The book will prove useful for decisions on the constitution of representative text corpora and stimulate research into a greater number of individual text types as well as contrastive analyses at least among European languages.

Humor in the Classroom provides practical, research-based answers to questions that educational researchers and language teachers might have about the social and cognitive benefits that humor and language play afford in classroom discourse and additional language learning. The book considers the ways in which humor, language play, and creativity can construct new possibilities for classroom identity, critique prevailing norms, and reconfigure particular relations of power.
