

## Lehnes Pharmacology Online For Pharmacology For Nursing Care Access Card 9e

"Have a chew of dulse," said Crubog . . . "What is it?" asked Potter, half-suspiciously. "Seaweed. " "Is it good for the virility? . . . " "And what is the virility?" asked the old man. "Does it make you more attractive to women?" Potier shouted in his ear. "No. " "What is it good for then?" "WortnS. " "Worms?" "Intestinal worms. You'll never again pass a worm if you eat a fistful of dulse first thing in the morning and last thing at night. " "If it's an anthelmintic, I'll try a spot of it," said Potter. - From Bogmail, a novel by Patrick McGinley (1981) With modern techniques of chemical isolation and structure determination, the old distinction between herbal and chemical remedies has largely been broken down. By chemotherapy we now mean simply the treatment of disease by drugs (the word medicines has unhappily been eclipsed). The distinction made between chemotherapy and non chemical therapy (e. g. , radiation, physiotherapy, surgical intervention, immu nomodulation) remains useful despite some minor overlapping. The present work thus deals with drugs and their use in parasitic disease. (Since we are dealing with the treatment of incipient as well as established infection, chemotherapy subsumes chem oprophylaxis as well as chemotherapeusis per se. ) Definition of parasitism as a biological modus vivendi, although important in itself, need not concern us here. We need simply delimit the scope of the book, and that is easily done.

Diskette contains: (1) NCLEX-style review questions plus (2) a data base of the 200 most commonly used drugs, from which students can generate their own drug card. Information on the diskette comes from Saunders nursing drug handbook.

Get hands-on practice applying your knowledge of nursing pharmacology with Pharmacology Online for Lehne's Pharmacology for Nursing Care, 9th Edition. This interactive, visually engaging online course features self-study modules, interactive case studies, videos, animations, NCLEX® Examination-style quizzes, and interactive activities to help you master key principles in nursing pharmacology and perfect your critical thinking and clinical reasoning skills. 110 NCLEX Examination-style practice quizzes prepare users for the pharmacology questions that will be encountered on the NCLEX exam and provide rationales and textbook page references to streamline remediation. 21 self-study modules provide a thorough introduction to the basic principles of pharmacology, drug calculations, and several major drug content areas using an interactive combination of media: text, animations, illustrations, integrated active learning exercises, and dynamic hyperlinks. 28 interactive case studies with quizzes immerse users in true-to-life clinical scenarios and enable hands-on learning in the safety of a virtual setting, accompanied by rationales and remediation tools to help improve understanding of correct and incorrect choices. UNIQUE! Roadside Assistance video clips hosted by renowned pharmacologist and speaker Alan P. Agins, PhD, infuse difficult content with humor and relevance for easier understanding. 275 interactive learning activities test users' knowledge of critical drug content in a fun, game-like format. 20 care planning activities challenge users to apply what they've learned to the planning of patient care. 42 animations accompanied by voiceover narrations are integrated into the self-study modules to clarify concepts. Audio glossary helps users master definitions and pronunciations for more than 1,400 terms and drug names. Discussion questions facilitate virtual classroom conversations on current issues in pharmacology. NEW! Updated self-study modules, interactive case studies, and content coordinates with the 9th Edition of the Lehne text and includes the latest information on major new drugs, drug classes, therapeutic uses, and discontinued drugs. NEW! Section 508 compliance maximizes that accessibility and utility of the course for all potential users by incorporating narration and descriptive text for all visual content, including video, animations, and images. NEW! Updated online drug handbook provides hands-on practice in consulting an up-to-date drug reference for clinical decision-making.

With a clear explanation of drug prototypes and how they work, Lehne's Pharmacology for Nursing Care, 10th Edition gives you the background you need to understand drugs currently on the market, and those not yet released. This perennial favorite of students and teachers simplifies complex concepts while distinguishing need-to-know content from the material that's merely nice to know. The 10th edition includes updated drug content to reflect the very latest FDA approvals, withdrawals, and therapeutic uses, as well as corresponding updated nursing content. It also includes an updated prototype drugs section, summarizing their major uses, and an updated table detailing care throughout the lifespan of the patient. Additionally, each chapter ends with a nursing implications summary to help you fully understand the material and apply it to clinical nursing practice. Prototype Drugs features serve as a quick-reference learning aid so you can apply your understanding to related drugs currently on the market as well as drugs that will be released in the future. UNIQUE! Engaging writing style with clear explanations makes difficult pharmacology concepts easy to grasp and even enjoyable to learn. Nursing implications of drug therapy are integrated throughout the text to reinforce the integral relationship between drug therapy and nursing care. UPDATED Special Interest Topic boxes focus on currently trending issues in pharmacology, eliminating out-of-date content. Large print highlights essential, need-to-know information, and small print indicates nice-to-know information. QSEN focus includes Patient-Centered Care Across the Life Span features highlighting safe and appropriate patient care during different phases of life. Safety Alert features emphasize the QSEN competency relating to patient safety. Student-friendly features make learning easier with concise drug summary tables, chapter outlines, key points, and a visual guide to the prototype drugs in each class. Concise drug summary tables present detailed information for individual drugs, including drug class, generic and trade names, dosages, routes, and indications. Selected Canadian drug names are indicated with a maple-leaf icon throughout the text. Separate Bioterrorism chapter discusses the clinical manifestations and treatment of biological weapon attacks. NEW! Thoroughly updated drug content reflects the very latest FDA drug approvals, withdrawals, and therapeutic uses, as well as corresponding updated nursing content NEW! Additional images included to accompany difficult concepts. NEW! Inclusion of more student practice questions provide additional help for learning the material.

Get hands-on practice applying your knowledge of nursing pharmacology! Pharmacology Online for Lehne's Pharmacology for Nursing Care, 10th Edition is a unique, hybrid online course, containing self-study modules along with interactive case studies. This visually engaging course has been thoroughly updated to reflect changes to the 10th edition of the textbook. It features entertaining videos, animations, NCLEX® examination-style quizzes, and additional activities to help you master key principles in nursing pharmacology and perfect your critical thinking and clinical reasoning skills.

Highly praised for its clear organization and approachable presentation, Abrams' Clinical Drug Therapy, Twelfth Edition continues a long tradition of guiding students and instructors through the practice of safe and effective medication administration. Expert pharmacology educators and clinicians explain the "why" behind each nursing action and emphasize individualized nursing care and drug therapy to promote optimal outcomes in every care setting. This updated edition is filled with case studies, concept maps, and other engaging features, and is complemented by robust online resources that reinforce understanding and establish a solid foundation for success from the classroom to the NCLEX® to clinical practice.

Pharmacology for Pharmacy and the Health Sciences introduces pharmacology in a way that is tailored to the needs of pharmacy and health care students. It provides an understanding of drug action at the cellular and molecular level, which is interfaced seamlessly with an explanation of the clinical use of drugs to treat common conditions. Taking a novel patient-centred approach, the book features a series of embedded workbooks which explore clinical topics in the context of individual patients and their experience of illness, and so relate the scientific basis of pharmacology to real-life pharmacy practice. The workbooks help you to interpret presenting symptoms, hospital clinical clerking, and patient history notes, and to understand the therapeutic strategy and clinical outcome, all within a simple reader-friendly

format. Pharmacology for Pharmacy and the Health Sciences is the perfect course companion for anyone needing to develop a solid understanding of pharmacology and its impact on pharmacy and clinical practice. Online Resource Centre The Online Resource Centre to accompany Pharmacology for Pharmacy and the Health Sciences features: For registered adopters: - Figures from the book, available to download - PDF versions of all workbooks appearing in the text - Suggested answers to questions posed within the workbooks

Pharmacology made manageable. Assure your mastery of pharmacology nursing knowledge while improving your critical-thinking and test-taking skills. Over 1,200 NCLEX®-style questions on medication administration provide the practice you need to build your confidence. Rationales for both correct and incorrect answers as well as Medication Memory Joggers for select questions.

Complex pharmacologic information is simple to learn with this complete study resource! Designed to accompany Lehne's Pharmacology for Nursing Care, 9th Edition, this robust workbook features critical thinking study questions, case studies, and patient teaching scenarios that help you connect pharmacology concepts with their impact on patient care. Plus, an emphasis on priority nursing care with NCLEX examination-style review questions prepares you for success on the exam. NCLEX Examination-style questions are included in each chapter. NEW! NCLEX-style alternate format questions including prioritization questions, bolster your readiness for the NCLEX Exam while supporting review of core pharmacology content NEW! Increased emphasis on patient safety features questions on safe patient care that challenge you to select appropriate actions to prevent or remediate medication errors. NEW! Detailed rationales for all prioritization questions are included in the answer key and encompass explanations for both correct and incorrect responses.

The only book featuring nursing care plans for all core clinical areas, Swearingen's All-In-One Nursing Care Planning Resource, 4th Edition provides 100 care plans with the nursing diagnoses and interventions you need to know to care for patients in all settings. It includes care plans for medical-surgical, maternity/OB, pediatrics, and psychiatric-mental health, so you can use just one book throughout your entire nursing curriculum. This edition includes a new care plan addressing normal labor and birth, a new full-color design, new QSEN safety icons, new quick-reference color tabs, and updates reflecting the latest NANDA-I nursing diagnoses and collaborative problems. Edited by nursing expert Pamela L. Swearingen, this book is known for its clear approach, easy-to-use format, and straightforward rationales. NANDA-I nursing diagnoses are incorporated throughout the text to keep you current with NANDA-I terminology and the latest diagnoses. Color-coded sections for medical-surgical, maternity, pediatric, and psychiatric-mental health nursing care plans make it easier to find information quickly. A consistent format for each care plan allows faster lookup of topics, with headings for Overview/Pathophysiology, Health Care Setting, Assessment, Diagnostic Tests, Nursing Diagnoses, Desired Outcomes, Interventions with Rationales, and Patient-Family Teaching and Discharge Planning. Prioritized nursing diagnoses are listed in order of importance and physiologic patient needs. A two-column format for nursing assessments/interventions and rationales makes it easier to scan information. Detailed rationales for each nursing intervention help you to apply concepts to specific patient situations in clinical practice. Outcome criteria with specific timelines help you to set realistic goals for nursing outcomes and provide quality, cost-effective care. NEW! Care plan for normal labor and birth addresses nursing care for the client experiencing normal labor and delivery. UPDATED content is written by practicing clinicians and covers the latest clinical developments, new pharmacologic treatments, patient safety considerations, and evidence-based practice guidelines. NEW full-color design makes the text more user friendly, and includes NEW color-coded tabs and improved cross-referencing and navigation aids for faster lookup of information. NEW! Leaf icon highlights coverage of complementary and alternative therapies including information on over-the-counter herbal and other therapies and how these can interact with conventional medications.

Study Guide for Pharmacology for Nursing Care - E-BookElsevier Health Sciences

For nursing courses covering drugs or drug administration. A long-trusted reference guide for safe, effective drug administration Current and comprehensive, Pearson Nurse's Drug Guide 2020 helps clinicians administer drugs safely in any healthcare setting. Drugs are listed alphabetically by generic name and indexed by both generic and trade name - enabling quick, easy lookup. Students can get clinical information for hundreds of drugs, including adverse reactions, interactions, side effects, and the impact on lab results. The 2020 edition features 15 new monographs for drugs recently approved by the FDA.

"Pharmacology for Health Professionals provides a comprehensive introduction to important pharmacology principles and concepts, with a strong focus on therapeutics." "The text has been extensively updated to reflect the latest information on the clinical use of drugs, local aspects of scheduling, drug legislation and ethics." -- Book Jacket.

Reinforce your understanding of nursing pharmacology! Corresponding to the chapters from the main text, the Study Guide for Clayton's Basic Pharmacology for Nurses, 18th Edition provides you with additional practice to help prepare for and succeed on the NCLEX®. Each exercise is linked to a chapter objective and various patient scenarios encourages you to use your knowledge of clinical pharmacology - further developing your critical thinking skills. Plus, a wide range of question formats reflects the question types you'll encounter on the latest NCLEX. Additional question formats allow you to practice with the new question types found on the NCLEX® exam. Clinical patient scenarios help you to develop critical thinking skills and apply your knowledge of nursing pharmacology. Medication administration handling and practice questions emphasized to reinforce safe medication administration practice. NEW! Exercises and review questions correspond with updated content from the text.

Emphasizing safe and effective drug administration, Introduction to Clinical Pharmacology, 10th Edition, helps you understand the principles of pharmacology and prevent medication errors. It promotes safety by showing how drugs and drug classes work, so you can understand why drugs are given, as well as the adverse effects and drug interactions that may occur. A thorough nursing process section with each drug class outlines the nurse's role when administering drugs. The updated Get Ready for the Next

Generation NCLEX® Examination! feature offers case studies with Next Generation NCLEX-format questions to help you prepare for the new licensure examination. Ideal scope of content and readability for LPN/LVN programs includes basic, need-to-know pharmacology content. Safety Alert boxes highlight important nursing considerations for safe medication administration and monitoring. Lifespan Considerations boxes for children and older adults draw attention to information that would be especially important when giving a specific drug to patients of those age groups. A focus on understanding drug classes helps students understand the actions and uses of drug classes and provides a framework for safe, effective practice as new drugs are introduced to the market. Video clips on medication administration procedures provide students with a visual reference for safe medication administration. Key terms with phonetic pronunciations and text page references help improve students' terminology and language skills before they enter clinical practice. Essential content is highlighted throughout the text, as in all of Elsevier's LPN Threads textbooks, with features such as Top Tips for Safety, Memory Joggers, and Lifespan Considerations boxes. NEW! Get Ready for the Next Generation NCLEX® Examination! section includes key points, review questions, and case studies with Next Generation NCLEX-format questions to prepare students for the new licensure examination. NEW! Reorganized chapters break up lengthy content and more logically present pharmacological content by body system or major disorder. UPDATED! Coverage of newly approved and updated pharmaceutical treatments and drugs prepares students for practice.

The AJN Book of the Year award-winning textbook, *Psychiatric Nursing: Contemporary Practice*, is now in its thoroughly revised, updated Fourth Edition. Based on the biopsychosocial model of psychiatric nursing, this text provides thorough coverage of mental health promotion, assessment, and interventions in adults, families, children, adolescents, and older adults. Features include psychoeducation checklists, therapeutic dialogues, NCLEX® notes, vignettes of famous people with mental disorders, and illustrations showing the interrelationship of the biologic, psychologic, and social domains of mental health and illness. This edition reintroduces the important chapter on sleep disorders and includes a new chapter on forensic psychiatry. A bound-in CD-ROM and companion Website offer numerous student and instructor resources, including Clinical Simulations and questions about movies involving mental disorders.

Previous edition has subtitle: "a nursing process approach."

A strikingly effective, one-of-a-kind learning resource This one-of-a-kind learning resource for neonatal nurse practitioner/clinical nurse specialist students in both academic and clinical settings uses complex case studies to reinforce the best practices in treating vulnerable neonatal patients. Based on applications and outcomes, the case study approach develops critical thinking and clinical decision making and fosters effective role transition in practice-based disciplines. Authored by leading neonatal nurse practitioner (NNP) educators nationwide, these multifaceted, unfolding case studies address and synthesize the most important content covered throughout the NNP curriculum. Additional audiences for this book include interprofessional staff working in Level II and Level III nursery settings. Beginning with case studies for identifying maternal risk factors, and culminating in case studies for communicating with parents, this text shows a holistic view of caring for neonatal patients. Chapters organized by body system address diseases and disorders and prompt the reader for diagnosis and treatment. Progressing from basic to complex, case studies include objectives, clinical pearls, and critical thinking questions. A robust instructor tool kit contains pedagogical strategies for facilitating online discussion, chapter conclusion quizzes, a variety of simulation experiences, and more. Key Features: Uses a complex case-based learning approach for neonatal advanced practice nursing-the first book to do so Authored by leading NNP educators nationwide Provides case studies synthesizing key content areas Helps prepare students for effective role transition Includes a robust instructor toolkit and can be used in online courses Always a student favorite, *Pharmacology for Nursing Care* offers a clear approach explaining drug prototypes and how they work. It provides the background needed to understand related drugs currently on the market, as well as drugs yet to be released. In simplifying a complex subject, this text focuses on the essentials of pharmacology. Large print is used to show "need-to-know" information, and small print is used for "nice to know" material. At the end of each chapter, a summary of major nursing implications helps in applying the material to real-world situations. This edition includes a new companion CD-ROM featuring NCLEX® examination-style review questions, a variety of electronic calculators, and animations depicting drug mechanisms and effects. Uses a prototype drug approach that places a strong emphasis on understanding over memorization - equipping students with the knowledge to learn not only about related drugs currently on the market, but also about those drugs that will be released once the student begins practice. Summaries of Major Nursing Implications at the end of each chapter provide an in-depth look at assessment, implementation, and ongoing evaluations. Utilizes large print for essential information and small print for "nice-to-know" information to help both faculty and students focus their limited classroom and study time on understanding the essentials. Concise drug summary tables present detailed information on individual drugs, including class, generic and trade names, dosages, routes, and indications. Key Points at the end of each chapter summarize content in a bulleted format to help students review important concepts. Prototype drug discussions employ a clear and consistent format with separate headings for Mechanism of Action; Pharmacologic Effects; Pharmacokinetics; Therapeutic Uses; Adverse Effects; Drug Interactions; and Preparations, Dosage, and Administration. An attractive full-color design adds visual interest, highlights key information, and facilitates student learning. Drugs for Multiple Sclerosis and Drugs for Hemophilia chapters. Drugs for Erectile Dysfunction and Benign Prostatic Hyperplasia chapter covers newsworthy drugs such as Viagra and Levitra. Special Interest Topics boxes on current issues in pharmacology, such as Medication-Overuse Headache: Too Much of a Good Thing and Face Time with Botox. Adult Immunization appendix summarizes the latest information on immunizations. Numerous new illustrations show drug mechanisms and effects, and depict topics such as histologic changes in Alzheimer's

disease and the movement of drugs following GI absorption.

Physical Assessment of the Newborn, 5th Edition, is a comprehensive text with a wealth of detailed information on the assessment of the newborn. This valuable and essential resource illustrates the principles and skills needed to gather assessment data systematically and accurately, and also provides a knowledge base for interpretation of this data. Coverage addresses: gestational assessment, neurologic assessment, neonatal history, assessment of the dysmorphic infant, and systemic evaluation of individual body systems, as well as key information on behavioral and pain assessment, including the use of specific tools with various groups ranging from term to extremely preterm infants. Numerous tables, figures, illustrations, and photos, many of them in full color, are a major strength that enhances the book's usefulness as a clinical resource. The text is an excellent teaching tool and resource for anyone who performs newborn examinations including nurses, neonatal and pediatric nurse practitioners, nurse-midwives, physicians and therapists. It can also serve as a core text for any program preparing individuals for advanced practice roles in neonatal care. KEY FEATURES: An authoritative and renowned text that comprehensively addresses all key aspects of newborn assessment Provides a well-ordered evaluation of individual body systems. Assists the practitioner in identifying infant state, behavioral clues, and signs of pain, facilitating individualized care. Comprehensively addresses the tremendous range of variation among newborns of different gestational ages. The content is amplified by numerous photos and illustrations, many in full color Includes Power Point slides and an Image Bank

The well respected textbook Pathophysiology: Concepts of Altered Health States has now been fully adapted for Canadian undergraduate nursing and health professions students. Like the original text, this Canadian edition includes a review of anatomy and physiology and treatment information for commonly occurring disease states. Pediatric, geriatric, and pregnancy deviations are integrated throughout and highlighted with icons for easy identification. Canadian content includes Canadian healthcare statistics regarding incidence; cultural variations, with a focus on native population and largest immigrant populations; Canadian research and researchers; Canadian treatment protocols and guidelines; and commonly occurring disease concerns based on Canadian statistics.

Master the Pharmacology Concepts You'll Encounter on Your Licensure Exam! Reinforce your understanding and ready yourself for success with this comprehensive review of critical pharmacology content covered on the NCLEX-RN®. Lippincott® Pharmacology Review for NCLEX-RN® summarizes core medication classes and their associated conditions in an easy-to-use format accompanied by ample practice questions to help you excel on your exams and make a confident transition to clinical practice. Streamlined, bulleted format reinforces key information at a glance. NCLEX-style review questions test your retention of essential concepts and familiarize you with the exam experience. Detailed answer key offers instant remediation including full rationales, Bloom's Taxonomy levels and Client Need categories for each question. Free 7-day Lippincott® PassPoint trial provides personalized, adaptive online test preparation to enhance your test-taking confidence.

Get a unique, conceptual approach to nursing care in this rapidly changing healthcare environment. Lewis's Medical-Surgical Nursing, 11th Edition gives you a solid foundation in medical-surgical nursing. This thoroughly revised text includes a more conversational writing style, an increased focus on nursing concepts and clinical trends, strong evidence-based content, and an essential pathophysiology review. Content covers all aspects of nursing care including health promotion, acute intervention, and ambulatory care. Helpful boxes and tables make it easy for you to find essential information, and a building-block approach makes even the most complex concepts simple to grasp. Key topics such as interprofessional care, delegation, safety, and prioritization are integrated throughout. Additionally, extensive drug therapy information and diagnostic studies tables give you a full picture of care. Best of all — a complete collection of learning and study resources helps you learn more effectively and offers valuable, real-world preparation for clinical practice. The Seventh Edition of this nursing-focused nutrition text has been updated to reflect the latest evidence-based practice and nutrition recommendations. Written in a user-friendly style, the text emphasizes what the nurse really needs to know in practice. Maintaining its nursing process focus and emphasis on patient teaching, this edition includes features to help readers integrate nutrition into nursing care such as sample Nursing Process tables, Case Studies in every chapter, and new Interactive Case Studies online. This is the tablet version which does not include access to the supplemental content mentioned in the text.

Corresponding chapter-by-chapter to Medical-Surgical Nursing, ?Assessment and Management of Clinical Problems, ?9th Edition, Elsevier Adaptive Quizzing is the fun and engaging way to focus your study time and effectively prepare for class, course exams, and the NCLEX exam. Elsevier Adaptive Quizzing is comprised of a bank of high-quality practice questions that allows you to advance at your own pace?- based on your performance?- through multiple mastery levels for each chapter. A comprehensive dashboard allows you to view your progress and stay motivated.

Learn to connect pharmacology concepts with their impact on patient care! Designed to accompany Lehne's Pharmacology for Nursing Care, 10th Edition, this robust workbook – study guide features critical thinking study questions, case studies, and detailed patient teaching scenarios. The 10th edition includes an increased emphasis on patient safety, with added questions to help you learn to spot and remediate medication errors. Plus, an emphasis on priority nursing care with NCLEX® examination-style review questions prepares you for success on the exam. NCLEX®-style alternate format questions, including prioritization questions, bolster your readiness for the NCLEX Exam while supporting review of core pharmacology content. Reinforcement of key information equips you for success on the NCLEX Examination and for patient safety (a QSEN core competency) in clinical practice. Three-part chapter organization separates content into study questions, NCLEX review and application questions, and dosage calculation questions. Detailed rationales for all prioritization questions are included in the answer key and encompass explanations for both correct and incorrect responses. Prioritization and delegation questions highlighted by special icons equip you to succeed on the NCLEX Exam and in the fast-paced clinical environment. Focus on implications of drugs and drug classes for patient care provides practice application of pharmacology content to the clinical setting. Application - and analysis-level questions highlighted by special icons help you integrate other nursing knowledge such as developmental considerations, laboratory values, and symptoms of adverse effects. Succinct question scenarios eliminate information that is not essential to answering the questions. Answer key is now included in the back of the printed study guide. NEW! Updated content has been thoroughly revised to ensure that the information is completely up-to-date and consistent with the textbook. NEW! Increased

emphasis on patient safety features questions on safe patient care that challenge you to select appropriate actions to prevent or remediate medication errors.

Effectively learning pharmacology requires students to clearly see the connection between pharmacology, disease and patient care. Pharmacology for Nurses, 3e (this is the standalone book) is structured to present pharmacology and pathology together, so students can more easily grasp the interrelationship between these subjects and provide a holistic perspective to patient care. A prototype approach, easy to follow presentation and extensive pedagogical aids enable students to understand key concepts and apply essential components of nursing care to drug therapy. If you want the book and access code you need to order: 0131392468 / 9780131392465 Pharmacology for Nurses: A Pathophysiologic Approach and MyNursingLab Student Access Code Card Package Package consists of 0135089816 / 9780135089811 Pharmacology for Nurses: A Pathophysiologic Approach 0135104319 / 9780135104316 MyNursingLab Student Access Code Card Pharmacology for Nurses: A Pathophysiologic Approach Rev. ed. of: Informatics and nursing / Linda Q. Thede, Jeanne P. Sewell. 3rd ed. c2010.

Preceded by Pharmacology for nursing care / Richard A. Lehne; in consultation with Linda A. Moore, Leanna J. Crosby, Diane B. Hamilton. 8th ed. c2013.

The time is now to get grounded in cannabis science and holistic care, with the evidence-based Cannabis: A Handbook for Nurses. This groundbreaking new guide addresses nursing skills and responsibilities in cannabis care, including the physiology of the human endocannabinoid system, cannabis care as it relates to specific disease processes, the history of cannabis, advocacy and ethics, and the ins and outs of cannabis dosing, delivery methods, side effects, and more. Essential for all practice areas, this is a timely, much-needed foundational resource for both students and practicing nurses who want to provide knowledgeable and effective medical cannabis care.

This concise, user-friendly text/study guide/CD-ROM package is designed to present students with a streamlined view of contemporary nursing pharmacology. Ideal when used as a companion to a handbook of current drug information, the text reviews previously-learned knowledge of physiology and pathophysiology and integrates it with the fundamentals of pharmacology to help readers understand and retain need-to-know information about each group of drugs discussed. A combination of line art, graphics, and comparative tables makes complex concepts easy to visualize and understand. A Study Guide is included at the back of the text. The CD-ROM, containing more than 700 drug monographs, is a reliable source for specific drug detail, as well as hyperlinks to relevant websites.

Advanced Health Assessment and Diagnostic Reasoning, Third Edition covers the diagnostic reasoning process that providers must follow when assessing an actual case. The text outlines each step of the health assessment process and further demonstrates the link between health history and physical examination. It also provides the healthcare professional with the essential data needed to formulate a diagnosis and treatment plan. New Online Course! Advanced Health Assessment and Diagnostic Reasoning, Third Edition features Navigate Premier Access, a robust online course complete with interactive lectures, eBook with health assessment videos and audio clips, syllabus, instructor resource guide, image bank, practice activities, discussion questions, and testing items. Key Features: • Outlines the health assessment and diagnostic reasoning process for a nurse practitioner assessing a new patient • Provides the essential data needed to formulate a diagnosis and treatment plan • Covers the anatomy and physiology of each system • Includes coverage of specific populations (pediatric, pregnancy, geriatric) • Navigate 2 Premier Access

This popular core nursing pharmacology textbook provides unique coverage of nursing interventions for drug therapy with related rationales. Highly praised for its organized and readable presentation, the text explains the "why" behind each nursing action, and emphasizes how drugs work differently in different patients. The 10th edition has a new fresh design and approach with an added focus on patient safety integrated into the text.

Dimensional Analysis for Meds: Refocusing on Essential Metric Calculations, Fifth Edition is a leading dosage calculation text for nursing students.

Mosby's Pediatric Drug Consult is a portable drug handbook that includes all essential data pediatric nurses need for administering the most commonly-used generic and trade name drugs. Extensive pediatric considerations are presented for each drug in a concise, practice-oriented framework. The information for this comprehensive pediatric drug source is derived from the extensive database maintained for Mosby's Drug Consult, containing the most current drug information. Quarterly online drug updates are available on a companion website. Full monographs on the most commonly used drugs in pediatric practice Functional order of headings that follow a logical clinical progression Outstanding consultant team of pediatric and pharmaceutical experts Extensive pediatric considerations in a concise, practice-oriented framework Detailed IV drug information for pediatric patients A quick reference with a listing and page references to commonly administered drugs Critical nursing considerations to identify situations that require special attention Functional two-color design that highlights key information for quick, easy reference Flexible, water-resistant cover that provides durability in the clinical setting Twenty full-color photographs of commonly prescribed medications to help in identifying drugs by their appearance Appendices include comparative drug charts, conversion tables, and other reference information. Free updates are available on a companion website.

Be ready to prescribe and administer drugs safely and effectively—and grasp all the vitals of pharmacology—with the fully updated Pharmacotherapeutics for Advanced Practice, 4th edition. Written by pharmacology nursing experts, this easy-to-read text offers proven frameworks for treating more than 50 common diseases and disorders. Learn how to identify disorders, review possible therapies, then prescribe and monitor drug treatment, accurately. Based on current evidence and real-life patient scenarios, this is the perfect pharmacology learning guide and on-the-spot clinical resource. Absorb the key principles and practical methods for accurate prescribing and monitoring, with . . . NEW chapter on Parkinson's disease, osteoarthritis, and rheumatoid arthritis NEW and updated therapies, and updated and additional case studies, with sample questions NEW content on the impacts of the Affordable Care Act Updated chapters on complementary and alternative medicine (CAM) and pharmacogenomics Updated evidence-based algorithms and drug tables – Listing uses, mechanisms, adverse effects, drug interactions, contraindications, and monitoring parameters, organized by drug class; quick access to generic and trade names and dosages Quick-scan format organizes information by body system Chapter features include: Brief overview – Pathophysiology of each disorder, and relevant classes of drugs Monitoring Patient Response section – What to monitor, and when Patient Education section – Includes information on CAM for each disorder Drug Overview tables – Usual dose, contraindications and side effects, and special considerations Algorithms – Visual cues on how to approach treatment Updated Recommended Order of Treatment tables – First-, second- and third-line drug therapies for each disorder Answers to Case Study Questions for each disorder – Strengthens critical thinking skills Selecting the Most Appropriate Agent section – The thought process for choosing an initial drug therapy Principles of Therapeutics unit – Avoiding medication errors; pharmacokinetics and pharmacodynamics; impact of drug interactions and adverse events; principles of pharmacotherapy for pediatrics, pregnancy/lactation, and geriatrics Disorders units – Pharmacotherapy for disorders in various body systems Pharmacotherapy in Health Promotion unit – Smoking cessation, immunizations, weight management Women's Health unit – Including contraception, menopause, and osteoporosis Integrative Approach to Patient Care unit – Issues to consider when presented with more than one diagnosis Standard pharmacotherapeutics text for nurse practitioners, students, and physician assistants Ancillaries – Case Study answers, multiple choice questions and answers for every chapter, PowerPoints, Acronyms List
