Positing a radically new understanding of the root of conflict—unmet needs—this analysis boldly directs students and teachers to recognize feelings as important messengers of those needs. Refocusing attention from feelings to the needs behind the feelings addresses the underlying problem rather than the symptom; with this objective, the concept of the “No–Fault Zone” is introduced. It is a place in the classroom free from criticism or blame where students learn trust and respect for one another, develop successful conflict-resolution skills, and the responsibility for resolution shifts from teacher to students. The complete conflict resolution curriculum is included, providing step-by-step guidance and making this classroom kit a time-saver for busy teachers. After Katie gets caught teasing a schoolmate, she's told to meet with Mrs. Petrowski, the school counselor, so she can make right her wrong and learn to be a better friend. Bothered at first, it doesn't take long before Katie realizes that bullying has hurt not only the people around her, but her, too. Told from the unusual point of view of the bullier rather than the bullied, *Confessions of a Former Bully* provides kids with real life tools they can use to identify and stop relational aggression.

Making Things Right is designed to be used in several ways: 1. To train students to become mediators and peacemakers in their classroom and at home and as peer mediators for their school. 2. To train students to understand and participate in a restorative justice/discipline structure in the classroom based on the book *Discipline That Restores: Strategies to Create Respect, Cooperation, and Responsibility in the Classroom* by Ron and Roxanne Claassen. 3. To train parents who want to understand and use a constructive conflict management strategy in their families. Making Things Right is divided into three sections. The first section consists of the lesson plans for each of thirty-two activities. The second section is called Projections and Handouts (larger print makes them easier to read when projected). The third section consists of the Student Folder Items. The time listed for each activity is an approximation and provided to help the teacher determine how they want to combine or use individual activities to fit their time frames. Making Things Right is designed to be used both for whole-class trainings in which lessons are taught on a daily basis spread over several days for one to two weeks, and for two-day student mediator training seminars. Our preference is to use the lessons with the entire class so all have the skills and strategies to be peaceful problem solvers. It is especially helpful for educating students about the theory, skills and strategies used in *Discipline That Restores*, also by Ron and Roxanne Claassen. *Discipline That Restores* gives teachers and administrators the knowledge and skills for implementing restorative justice discipline in the classroom and school. It is important for students to have as much knowledge of this structure and process as their teachers and school administrators so all are better able to constructively resolve conflicts together. Lessons are designed to help students learn and become equipped to understand and implement conflict and peacemaking theory, skills and strategies. Students will learn some theory and be encouraged to develop their own theories for why we are interested in learning about new strategies for problem solving, and they will participate in lessons that will teach a specific process to use for problem solving and peacemaking as individuals in relationship with others and as mediators. Making Things Right provides activities that build student understanding

of the mediation process and gives students a chance to practice the process through roleplay. This training will enable students to develop practical skills that will help them respond constructively to conflicts in many areas of their own lives as well as help others. Punishment for misbehavior causes resentment to grow, and what appears as evil intent is a consequence of that resentment. Punishment damages relationship at least a little and sometimes a lot. We have discovered that the most effective way to respond to misbehavior is to gain the cooperation of each person involved - it is rare that misbehavior involves only one person -then to sit down with them and help them solve the problem. Responding this way transforms an otherwise destructive event into a teaching and learning situation for everyone involved and builds relationship.

Personal experience has shown that students, kindergarten and above, can understand and respond constructively; students grade four and above can readily understand and use these concepts in their own interpersonal conflicts and as mediators. Roxanne used this curriculum for many years with her 8th grade students and with parents. Many have used this curriculum to train high school students. All teachers make some adaptations to best use it with their audience.

Have you been searching for a way to resolve conflict that doesn't involve a series of ten or more steps? Do you think that perhaps a key to conflict resolution must come from within? How can teachers and pre-service teachers help their students learn and use strategies for conflict resolution? Tools for Conflict Resolution is a practical method for teaching conflict resolution skills to students in grades K-12. Conflict is a part of everyone's life. It is the authors' belief that if each student is given tools for handling conflict, and these tools are used each time conflict arises that soon students become proficient conflict managers. This book begins with a chapter, which introduces Peter Senge's five disciplines: Personal Mastery, Mental Models, Shared Vision, Team Building, and Systems Thinking. After reading this chapter, the reader is able to embrace the five disciplines and begin practicing the adult level. As teachers, we teach from who we are. The rest of the book is filled with actual lesson plans, which are directly tied to the Multiple Intelligences Theory and are developmentally appropriate for students. Case studies, role- plays, skits, literature, songs, and co-operative learning activities are the primary instructional methods used to teach students conflict resolution skills. An annotated bibliography is included to assist teachers in extending lessons. These lessons may be taught during Social Studies as a unit on character education or could be used during a guidance class.

The Butter Battle Book, Dr. Seuss's classic cautionary tale, introduces readers to the important lesson of respecting differences. The Yooks and Zooks share a love of buttered bread, but animosity brews between the two groups because they prefer to enjoy the tasty treat differently. The timeless and topical rhyming text is an ideal way to teach young children about the issues of tolerance and respect. Whether in the home or in the classroom, The Butter Battle Book is a must-have for readers of all ages.

Discusses how students may be taught the procedures and skills they need to resolve conflicts constructively.

It's the Grouchy Ladybug's 20th birthday. To celebrate, we are introducing a new, larger format edition with brighter, more colorful pages created from Eric Carle's original artwork using the latest reproduction technology. The Grouchy Ladybug is bigger and brigher, as irascible but irresistible as ever and will surely delight new generations of

readers, as well as her devoted fans of all ages. Happy Birthday, Grouchy Ladybug! Every time a heart-wrenching display of violence in the schools or an appalling act of childhood aggression achieves its '15 minutes of fame' in the media, we all shake our heads in dismay, despair over what should have been done and feel deeply grateful that it happened somewhere else. But, of course, there's no guarantee. These things can and do happen anywhere. And it is not what we do after, but what we can do before that matters. Teaching our children, in the early grades, about resolving conflicts is an urgently needed step in that direction.

When Tyler is teased by the other boys, his good friend, Danae, encourages him to give the boys A Bug and a Wish. A modern fable with an urgent message for young environmentalists. Lynne Cherry journeyed deep into the rain forests of Brazil to write and illustrate this gorgeous picture book about a man who exhausts himself trying to chop down a giant kapok tree. While he sleeps, the forest's residents, including a child from the Yanomamo tribe, whisper in his ear about the importance of trees and how "all living things depend on one another" . . . and it works. Cherry's lovingly rendered colored pencil and watercolor drawings of all the "wondrous and rare animals" evoke the lush rain forests. Features stunning world maps bordered by detailed illustrations of fascinating rainforest creatures. An IRA Teacher's Choice (1991), ABA's Pick of the Lists, Reading Rainbow Review Book, NSTA-CBC Outstanding Trade Book for Children. After having a bad start to the morning, Otto struggles to have positive interactions with his friends at school. During the day, he learns that he's having these difficulties because he is doing things backwards compared to what a true friend would do. He's being a "Dneirf." With the help of a school counselor and some friends, Otto turns his day, and himself, in the right direction, becoming a true forward friend once again. This story is a fantastic resource to teach children that social conflict is normal and can and will occur within friendships due to backwards behavior, not necessarily bullying. Sometimes friends just need a little help to turn those backwards behaviors forward again. Be A Friend, Not a Dneirf!

resorting to verbal or physical aggression, this empathy-based program provides a foundation for resolving problems without the intervention of mediators or adults and for providing written documentation of the solution for parents, administrators, and teachers. The program is designed to be introduced to a class in three to four 30-minute lessons. Children learn to write or draw why they are upset, exchange papers and learn why the other person is upset, write or draw a possible solution, share solutions with the other person, and mark the other person's paper to indicate what they agree to do to help end the conflict. Chapters 1 and 2 of the book explain how the process works. Chapter 3 shows how to use the process in the classroom. Chapter 4 illustrates how to set up basic conflict resolution centers that can be used in a variety of locations within a school. Chapters 5 and 6 tell how to use the process in group or individual counseling and at home. Included in this guide are lesson plans, reproducible worksheets, and posters that illustrate the conflict resolution process. Appended are samples showing how the technique works and answers to commonly asked questions. (KB)

Based on the view that making social concepts and feelings concrete would help children in primary grades to take turns, cooperate, and solve their problems respectfully, this curriculum uses a story about the Rainbow Kids, an imaginary community of children, to introduce children to social concepts and conflict resolution skills. The Rainbow Kids experience emotions that are conveyed by the weather around them. These simple "sunny" and "cloudy" metaphors turn abstract notions of behavior into physical expressions young children can easily comprehend. Part 1 of the curriculum guide describes the impetus for the program, discusses how the program works, summarizes the story, and details the procedures involved in presenting the program. Part 2 contains the seven lessons and two activities comprising the program; this part includes sample program materials in six appendices, and lists selected resources for elementary school teachers. Part 3 is a separate booklet for students containing "The Rainbow Kids" story. (Contains 15 references.) (KB)

With a view to deepening our understanding of sources of hatred and prejudice, this book uses a developmental and evolutionary perspective to explore and explain the process by which our beliefs are conveyed to the youngest members of society. Discussing the psychological obstacles to peaceful relations between groups, the authors focus on the developmental processes by which we can work to diminish ethnocentrism, prejudice, and hatred, which children learn from a very early age. Until now, scholarship and practice in international relations have gravely neglected crucial psychological aspects of these terrible problems and have not yet explored the educational opportunities related to them. Addressing these promising lines of inquiry and innovation, this book fosters a more humane and less violent development in childhood and adolescence. Educators, religious leaders, developmental and social psychologists, will find this a valuable resource, as will a socially concerned segment of the public who are looking for practical ways to work for peace.

From one of America's most popular short story writers and an Academy Award nominee: the O. Henry Award-winning tale that inspired the movie *The Hunt*. But unknown to the big-game hunter, a predator lurked in its lush jungles—one more dangerous than any he had ever encountered: a human.
