Lesson study is a professional development process that teachers engage in to systematically examine their practice, with the goal of becoming more effective. Originating in Japan, lesson study has gained significant momentum in the mathematics education community in recent years. As a process for professional development, lesson study became highly visible when it was proposed as a means of supporting the common practice of promoting better teaching by disseminating documents like standards, benchmarks and nationally validated curricula. While the body of knowledge about lesson study is growing, it remains somewhat elusive and composed of discrete research endeavors. As a new research area there is no coherent knowledge base yet. This book will contribute to the field bringing the work of researchers and practitioners together to create a resource for extant work. This book describes several aspects of Lesson Study, amongst others: it gives an historical overview of the concept, it addresses issues related to learning and teaching mathematics, it looks at the role of the teacher in the process. The last two sections of the book look at how lesson Study can be used with preservice mathematics teachers and at university mathematics methods teaching.

Fire and Life Safety Educator: Principles and Practice, Second Edition Includes Navigate 2 Advantage Access, meets the objectives of NFPA 1035 (2015) for FLSE Levels I, II, III, Public Information Officer, Youth Firesetter Intervention Specialist, and Youth Firesetter Program Manager. It is written for practitioners, managers, and supervisors, as well as for those who are new to

the FLSE field, covering fire behavior and prevention, code compliance, community risk reduction, risk assessment, and working with the public. Based solidly on research and proven tactics, it describes community outreach methods, how to effectively teach fire and life safety, and how to market prevention and preparedness messages to all age groups. In-depth instruction advises on developing fire and life safety curricula, objectives, lesson plans, and presentations. This second edition covers all aspects of designing, budgeting for, and managing a fire and life safety program; public relations and persuasion tactics; legal considerations; and best professional practices. The importance of program evaluation and how to conduct evaluation is explained. New chapters are included to address the public information officer role and specific responsibilities, Youth Firesetter intervention strategies, and Youth Firesetter program implementation.

Worth offers an adapted study guide to accompany *Transitions Throughout the Life Span*, a new telecourse produced by Coast Learning Systems. Kathleen Stassen Berger was closely involved in the development of the telecourse, and *The Developing Person Through the Life Span* is the sole text accompanying the telecourse. The telecourse study guide draws clear connections between the text and telecourse.
