Removing an at-risk child from a troubled environment brings on a host of new concerns and is not always a panacea. *Endangered Children: Homicide, and Other Crimes, Second Edition* focuses on the myriad threats facing children and provides insight into possible solutions. The shooting at Columbine High School riveted national attention on violence in the nation's schools. This dramatic example signaled an implicit and growing fear that these events would continue to occur and even escalate in scale and severity. How do we make sense of the tragedy of a school shooting or even draw objective conclusions from these incidents? Deadly Lessons is the outcome of the National Research Council's unique effort to glean lessons from six case studies of lethal student violence. These are powerful stories of parents and teachers and troubled youths, presenting the tragic complexity of the young shooter's social and personal circumstances in rich detail. The cases point to possible causes of violence and suggest where interventions may be most effective. Readers will come away with a better understanding of the potential threat, how violence might be prevented, and how healing might be promoted in affected communities. For each case study, Deadly Lessons relates events leading up to the violence, provides quotes from personal interviews about the incident, and explores the impact on the community. The case studies center on: Two separate incidents in East New York in which three students were killed and a teacher was seriously wounded. A shooting on the south side of Chicago in which one youth was killed and two wounded. A shooting into a prayer group at a Kentucky high school in which three students were killed. The killing of four students and a teacher and the wounding of 10 others at an Arkansas middle school. The shooting of a popular science teacher by a teenager in Edinboro, Pennsylvania. A suspected copycat of Columbine in which six students were wounded in Georgia For everyone who puzzles over these terrible incidents, Deadly Lessons offers a fresh perspective on the most fundamental of questions: Why?

Most studies of international negotiations take successful talks as their subject. With a few notable exceptions, analysts have paid little attention to negotiations ending in failure. The essays in *Unfinished Business* show that as much, if not more, can be learned from failed negotiations as from successful negotiations with mediocre outcomes. Failure in this study pertains to a set of negotiating sessions that were convened for the purpose of achieving an agreement but instead broke up in continued disagreement. Seven case studies compose the first part of this volume: the United Nations negotiations on Iraq, the Middle East Peace Summit at Camp David in 2000, Iran-European Union negotiations, the Cyprus conflict, the Biological Weapons Convention, the London Conference of 1830–33 on the status of Belgium, and two hostage negotiations (Waco and the Munich Olympics). These case studies provide examples of different types of failed negotiations: bilateral, multilateral, and mediated (or trilateral). The second part of the book analyzes empirical findings from the case studies as causes of failure falling in four categories: actors, structure, strategy, and process. This is an analytical framework recommended by the *Processes of International Negotiation*, arguably the leading society dedicated to research in this area. The last section of *Unfinished Business* contains two summarizing chapters that provide broader conclusions—lessons for theory and lessons for practice.
