Drama (the Journal of National Drama) Review of 'Drama in Primary English teaching' Teaching Primary English through Drama builds on the success of the classic text Drama in Primary English, inspiring ideas and techniques for teaching English skills through the medium of drama. demonstrates how reading, writing, speaking and listening skills may be developed in ways that will motivate and engage pupils. She uses specific examples from the English curriculum, and also makes links to other areas of the curriculum. In addition, the book explains how assessment during drama can help teachers to evaluate pupils' progress in English. Further guidance is given on how drama can enrich studying for pupils who are learning English as a foreign language. The book also provides a chapter on developing drama as an art form in its own right, with simple ideas and practical suggestions on how to enhance performances. Teaching Primary English through Drama presents a wide range of drama approaches from ten-minute starter activities to stimulate ideas such as fun ways to practise reading, through to longer projects that can provide contexts for extended writing or help with presentation and performance. The chapters show how drama can help to bring lessons alive in imaginative ways that not only promote enjoyment but also enhance achievement. This comprehensive and practical guide offers essential reading for primary teachers and other practitioners, and is a valuable resource to trainees. It also provides an excellent foundation for those who wish to extend their expertise further towards drama as a subject specialism. Children learn best when they follow their own interests. They have a natural desire to explore, communicate, create and learn. Anna Ephgrave has developed her practice to ensure this is possible. Children thrive when a setting is organised and managed by the adults, but led by the children. They learn and develop if they are in a stimulating environment which is carefully organised and when observations are used to support their "next steps". They take risks and surpass expectations when they have clear routines and boundaries, combined with a supportive staff and an enabling environment. The Reception Year in Action offers a unique insight into the workings of a highly successful reception class as it

progresses through a complete academic year. Covering all aspects of working with young children, the book clearly explains how the classroom and garden are organised and the boundaries that are in place to keep children safe, happy and free to explore and learn. It then sets out the examples of learning and development that occurred during each month, as well as any surprises, activities and examples of "next steps" that came about as a result of events. At each stage Anna Ephgrave gives the reason behind the decisions and shows what the outcomes have been for the children. Key features include: explanation of a system of spontaneous planning detailed advice on how to use different environments to support play and learning guidance on the role of the adult and working with parents ways to support children's individual interests, circumstances and talents including those with special needs and English as an additional language photocopiable pages of planning sheets, record keeping sheets, sample letters to parents and role play resources over 150 full-colour photographs to illustrate practice list of resources and materials examples of recorded observations and planning for next steps foreword by Helen Bilton. This is a second edition of the highly popular volume used by clinicians and students in the assessment and intervention of aphasia. It provides both a theoretical and practical reference to cognitive neuropsychological approaches for speech-language pathologists and therapists working with people with aphasia. Having evolved from the activity of a group of clinicians working with aphasia, it interprets the theoretical literature as it relates to aphasia, identifying available assessments and published intervention studies, and draws together a complex literature for the practicing clinician. The opening section of the book outlines the cognitive neuropsychological approach, and explains how it can be applied to assessment and interpretation of language processing impairments. Part 2 describes the deficits which can arise from impairments at different stages of language processing, and also provides an accessible guide to the use of assessment tools in identifying underlying

impairments. The final part of the book provides systematic summaries of therapies reported in the literature, followed by a comprehensive synopsis of the current themes and issues confronting clinicians when drawing on cognitive neuropsychological theory in planning and evaluating intervention. This new edition has been updated and expanded to include the assessment and treatment of verbs as well as nouns, presenting recently published assessments and intervention studies. It also includes a principled discussion on how to conduct robust evaluations of intervention within the clinical and research settings. The book has been written by clinicians with hands-on experience. Like its predecessor, it will remain an invaluable resource for clinicians and students of speech-language pathology and related disciplines, in working with people with aphasia.

Reception, it's a funny old term, rather like a waiting room, a foyer, or a gathering place before the main event. The main event here being the start of Key Stage One and school life. Reception has in many ways been seen as a 'holding pen', a preparation for 'school readiness' rather than a stage and age in its own right. Neil Farmer draws upon his experience of working with and supporting schools and leaders up and down the country and abroad – in many instances going right back to the basics – and putting forward suggestions and strategies that will assist teachers in gaining an ownership of their classroom and a true understanding of their vital role as a facilitator, mediator and coach. It is not a 'one cap fits all solution', but rather some practical tips that Reception teachers may decide to employ, alter and make their own.

How does a young child begin to make sense out of squiggles on a page? Is learning to read a process of extending already acquired language abilities to print?

Online Library Letters And Sounds Phase 2 Decodable Words

What comprises this extension? How children learn to read, and especially how children are taught to read, are problems of sustained scientific interest and enduring pedagogical controversy. This volume presents conceptual and theoretical analyses of learning to read, research on the very beginning processes of learning to read, as well as research on phonological abilities and on children who have problems learning to read. In so doing, it reflects the important discovery that learning to read requires mastering the system by which print encodes the language. The editors hope that some of the work offered in this text will influence future research questions and will make a difference in the way instructional issues are formulated.

Designed to help preservice and inservice teachers use assessments to identify problems and employ appropriate strategies to help their students become better readers, this text includes 12 case studies that detail children's literacy struggles. The core chapters of the book are organized around six essential elements in learning to read—emergent literacy, word identification, fluency, vocabulary, comprehension, and engagement—and include a review of the literature, assessment strategies, instructional interventions, a section on Intervening With Technology, and two detailed case reports.
