we hold dear…" Ten teenagers broke behavioral law. Sentenced to be reeducated on the moon of Jerem, they were placed in stasis on the automated ship Phetteron for their six day journey. They never reached their destination. "Home looks after its own…" Thrown off course by a computer malfunction, the Phetteron is damaged in an asteroid belt and crash lands on the uninhabited ice planet of Valkrys. Home will send a rescue party long before their meager supplies run out. "No contrary positions are viable…" Sola was a roamer. She wandered the city after curfew, reveling in the freedom of being disconnected from the techgrid and embracing the joy of physical activity. For those actions, Home declared her deviant. But on Valkrys, her deviance is an asset that may be the teens' only hope for survival. As Sola explores their strange new world, she discovers that she and her shipmates are linked by something more frightening than their subversive behaviors—and uncovers a truth about the planet the authorities at Home wanted buried. Cathy Campbell has both illustrated and long tested the exercises in this guide with her 9th grade students in The Woodlands, Texas. It's a lighthearted and ludicrous guide to the essential elements of language and grammar (with a few writing tips tossed into the mix). It's Shel Silverstein meets Strunk and White and the results are both hilarious and instructive. Tried and true, and everyone a delight, there isn't a serious sentence in the group. But this is a dead-serious grammar book with the heart of a

The Deluxe Teacher's Guide has a CD-Rom that includes a full answer set, posters for the classroom and a set of transparency-ready exercises for each of the chapters.

In Lessons near-death expert Kenneth Ring extracts the pure gold of the NDE and with a beautiful balance of sound research and human insight reveals the practical wisdom held within these experiences. As Stanley Krippner states, "In this remarkable book, Ring presents evidence that merely learning about the near-death experience has similar positive effects to those reported by people who actually have had near-death experiences. Kenneth Ring is one of the few authors whose gifts include the capacity to transform their readers' lives."

In most of the developed countries of the,World, significant efforts to control the pollution of surface waters have been underway for decades, and particularly the last 10-15 years. These efforts have focused mainly on eliminating or mitiga ting the effects of point sources of pollution. In many ca ses, however, it is clear that we have achieved only limited improvement in water quality, and that non-point sources of pollution are going to control any further improvement. It has long been known that urban runoff is a major non-point source, and much research has been done in an attempt to un derstand the mechanisms and processes which govern this source and to reduce or eliminate its impacts. Many urban jurisdic tions have adopted urban runoff pollution control measures, in spite of the fact that there is a great deal that we still do not know, and without really being able to quantify the benefits achieved. A major problem is that while a great deal of work is being done, both in Europe and North America, it is very difficult to

keep abreast of new developments. The Urban Water Resources Research Council of the American Society of Civil Engineers has for many years had as one of its major objectives the transfer of urban runoff technology among researchers and practitioners in the field, as well as to those engineers who are not in the forefront but who nonetheless need the information on the latest developments.
