This is the third book in the Lehi's Dream series, a dramatic retelling of the Book of Mormon as historical fiction. While it is first and foremost a dramatization of the original Book of Mormon, complete with compelling character personalities, description of lifestyles and settings, and can be read to learn more about the book, in a more exciting style, it can also be read by a reader who only wants to be entertained. For anyone who knows nothing about the Book of Mormon, this could simply be a wonderful tale of mighty heroes, delightful villains, and a saga that spans centuries, by the end of the series. This individual book in the series may best be described using the text from the back cover: They call it the Rub al Khali. Hundreds of miles of sand, rock, and devastation. Red dunes of sand. Yellow dunes of sand. Some stand six hundred above the valley floor. To cross this forsaken land will take all of the courage and strength that a people can possess. Crossing it with women and children is almost unheard of. And yet the people of Lehi, on command from a God they cannot even see, turn east from the Red Sea, and toward the Rub al Khali, also known as the "Empty Quarter," they point their faces. Haunted by rebellious sons, oven-like days, and death-cold nights, Lehi leads his family in one of the greatest tales of faith ever told. Forbidden to use fire, night camps have little comfort. Meat, when it can be found, is eaten raw. The water itself can be filled with poison. Suffering and death await Lehi's people in the Empty Quarter. Yet on the other side awaits a green land filled with fruit, a land that borders a magnificent sea. A land called Bountiful.

Most macroeconomists agree that we live in the age of microfoundations. The recent worldwide financial crisis may have emboldened critics of this microfoundational orthodoxy, but it remains the dominant view that macroeconomic models must go beyond supply and demand functions to the level of individual decision-making, taking into account the general dynamic environment where agents live. Microfoundations Reconsidered seeks to reassess how the relationship of micro and macroeconomics evolved over time. The highly regarded contributors to the book argue that the standard narrative of microfoundations is likely to be unreliable. They therefore re-examine the history of the relationship of microeconomics and macroeconomics, starting from their emergence as self-consciously distinct fields within economics in the early 1930s. They seek to go beyond the conventional history that is often told and written by practicing economists. From different perspectives they challenge the association of microfoundations with Robert Lucas and rational expectations and offer both a more complete and a deeper reading of the relationship between micro and macroeconomics. Microfoundations Reconsidered is a valuable addition to the macroeconomic research literature. It is ideally suited to students, scholars, researchers, and practitioners with an interest in macro and microeconomics and the history of economics.

Last year, author Lysa TerKeurst released the book Made to Crave, providing the Biblical answer to why people diet, regain the weight they lose, and continue to find themselves stuck in this vicious cycle. Made to Crave helped thousands of people finally achieve victory in their weight loss journey. But, according to TerKeurst, “We need more than 19 chapters to stay motivated and on track. That’s why I wrote this daily devotional with 60 inspirational entries. There is plenty of new material not in the original book. Rest assured, I also included your favorite nuggets of wisdom from Made to Crave.” Just like the Made to Crave book, this Made to Crave Devotional is not a how-to get healthy book.

It is the road to finding the lasting ‘want to’ that extends far beyond the surface issues of weighing less and wanting to wear a smaller clothes size. Says TerKeurst: “There’s a spiritual battle going on. It’s real. And it’s amazing how perfectly the Bible gives us specific ways to find victory with our food struggles. “Even for girls who don’t crave carrots.”

As he did so brilliantly in his bestselling book, Jewish literacy, Joseph Teluslikin once again mines a subject of, Jewish history and religion so richly that his book becomes an

inspiring companion and a fundamental reference. In *Biblical Literacy*, Telushkin turns his attention to the Hebrew Bible (also known as the Old Testament), the most influential series of books in human history. Along with the Ten Commandments, the Bible's most famous document, no piece of legislation ever enacted has influenced human behavior as much as the biblical injunction to "Love your neighbor as yourself." No political tract has motivated human beings in so many diverse societies to fight for political freedom as the Exodus story of God's liberation of the Israelite slaves--which shows that God intends that, ultimately, people be free. The Bible's influence, however, has conveyed as much through its narratives as its laws. Its timeless and moving tales about the human condition and man's relationship to God have long shaped Jewish and Christian notions of morality, and continue to stir the conscience and imagination of believers and skeptics alike. There is a universality in biblical stories: The murder of Abel by his brother Cain is a profound tragedy of sibling jealousy and family love gone awry (see pages 11-14). Abraham's challenge to God to save the lives of the evil people of Sodom is a fierce drama of man in confrontation with God, suggesting the human right to contend with the Almighty when it is feared He is acting unjustly (see pages 32-34). Jacob's deception of his blind father, Isaac raises the timeless question: Do the ends justify the means when the fate of the world is at stake (see pages 46-55). Encyclopedic in scope, but dynamic and original in its observations and organization, *Biblical Literacy* makes available in one volume the Bible's timeless stories of love, deceit, and the human condition; its most important laws and ideas; and an annotated listing of all 613 laws of the Torah for both layman and professional, there is no other reference work or interpretation of the Bible quite like this Stunning volume.

The tension between trade liberalisation and environmental protection has received remarkable attention since the establishment of the WTO. It has been the subject of a wide-ranging debate, and is one of the central themes of the anti-globalisation movement. This book explores that debate. It argues that by focusing on the WTO, the debate has failed to recognise the institutional and discursive complexity in which the trade-environment conflict is embedded. A legal investigation of this nexus requires a framework of inquiry, in which this complexity can be elucidated - a model of global legal pluralism. The first theoretical part of the book (Chapters One and Two) responds to this challenge by developing a pluralistic model, which recognises the trade and environment conflict as the product of multiple dilemmas, constituted and negotiated by a myriad of institutional and discursive networks. As such, this conflict cannot be understood or addressed through one-dimensional models. Viewing the trade-environment conflict through a pluralistic perspective yields important practical insights. It means that this conflict cannot be resolved by uniform economic or legal formulae. Dealing with this conflict requires, rather, polycentric and contextual strategy. The empirical part of the book (Chapters Three to Seven) explicates this thesis by examining several global legal domains, ranging from the WTO to 'private' transnational regimes such as transnational litigation, international construction law and international financial law. This part demonstrates how the different discursive and institutional structures of these domains have influenced the contours of the trade-environment conflict, and considers the policy implications of this diversity from a pro-environmental perspective.
