No issue is more fateful for civilization than moral relativism. History knows not one example of a successful society which repudiated moral absolutes. Yet most attacks on relativism have been either pragmatic (looking at its social consequences) or exhorting (preaching rather than proving), and philosophers' arguments against it have been specialized, technical, and scholarly. In his typical unique writing style, Peter Kreeft lets an attractive, honest, and funny relativist interview a "Muslim fundamentalist" absolutist so as not to stack the dice personally for absolutism. In an engaging series of personal interviews, every conceivable argument the "sassy Black feminist" reporter Libby gives against absolutism is simply and clearly refuted, and none of the many arguments for moral absolutism is refuted.

Life for Irene Spencer was a series of devastating disappointments and hardships. Irene's first book, Shattered Dreams, is the staggering chronicle of her struggle to provide for her children in abject poverty and feelings of abandonment each time her husband left to be with one of his other wives. Irene was raised to believe polygamy was the way of life necessary for her ticket to heaven. The hard knocks of her environment were just the beginning of Irene's shocking tale. Insanity ran rampant in her husband's family and was the source of inconceivable events that unfolded throughout Irene's adult life. Cult Insanity takes readers deeper into her story to uncover the outrageous behavior of her brother-in-law Ervil -- a self-proclaimed prophet who determined he was called to set the house of God in order -- and how he terrorized their colony. Claiming to be God's avenger and to have a license to kill in the name of God, Ervil ordered the murders of friends and family members, eliminating all those who challenged his authority. For those who were gripped by Shattered Dreams, the rest of the story will blow them away. Cult Insanity is a riveting, terrifying memoir of polygamist life under the tyranny of a madman.

If you are considering this book, you already know how important it is for your child to get a good start in learning math. This book will assist you in teaching your child fundamental number concepts at an early age. Given the importance of early learning, Marshmallow Math begins with number concepts that young children can master before they learn to read and write numbers. The book follows a natural progression of skills that begins with simple counting. Addition, subtraction, multiplication, division, and other mathematical concepts are introduced gradually with each new skill building upon mastered skills. The book also explores other important concepts including sorting and comparing, telling time, spatial awareness, pattern recognition, geometry, measurement, and reasoning. Marshmallow Math provides many quick, simple, and fun activities for you and your child to do together. Hands on learning and mental math are emphasized over written work and traditional exercises. Many of the activities involve the use of counting objects such as marshmallows, pennies, or jellybeans. Having physical objects to look at, pick up, and count helps to make abstract concepts more real for your child. The unique approach set out in Marshmallow Math will help to ensure that your child truly comprehends fundamental number concepts and masters basic math skills. This will give your child both the ability and the confidence to excel in math.

"The portrayal of Islamic movements as a tide of religious fanaticism threatening the West, and major participants in the coming "clash of civilizations", has provoked a multifaceted debate of great significance to the future of international relations. This text argues that political Islam's desire to restore a culture distorted by colonization does not necessarily compromise its progress to more democracy and greater tolerance. From Rabat to Gaza, through Algiers and Cairo, the author carried out his enquiry through interviews with prominent Islamists, and he allows them to speak for themselves in the book. Among the issues addressed are the relationship between Islam and modernity, Islamism and women, and questions of violence."--Bloomsbury Publishing.

Here, for the first time, Christopher Kul-Want brings together twenty-five texts on art written by twenty philosophers. Covering the Enlightenment to postmodernism, these essays draw on Continental philosophy and aesthetics, the Marxist intellectual tradition, and psychoanalytic theory, and each is accompanied by an overview and interpretation. The volume features Martin Heidegger on Van Gogh's shoes and the meaning of the Greek temple; Georges Bataille on Salvador Dalí's *The Lugubrious Game*; Theodor W. Adorno on capitalism and collage; Walter Benjamin and Roland Barthes on the uncanny nature of photography; Sigmund Freud on Leonardo Da Vinci and his interpreters; Jacques Lacan and Julia Kristeva on the paintings of Holbein; Freud's postmodern critic, Gilles Deleuze on the visceral paintings of Francis Bacon; and Giorgio Agamben on the twin traditions of the Duchampian ready-made and Pop Art. Kul-Want elucidates these texts with essays on aesthetics, from Hegel and Nietzsche to Badiou and Rancière, demonstrating how philosophy adopted a new orientation toward aesthetic experience and subjectivity in the wake of Kant's powerful legacy.

From the avant-garde design of the Islamic Cultural Center in New York City to the simplicity of the Dar al-Islam Mosque in Abiquiu, New Mexico, the American mosque takes many forms of visual and architectural expression. The absence of

a single, authoritative model and the plurality of design nuances reflect the heterogeneity of the American Muslim community itself, which embodies a whole spectrum of ethnic origins, traditions, and religious practices. In this book, Akel Ismail Kahera explores the history and theory of Muslim religious aesthetics in the United States since 1950. Using a notion of deconstruction based on the concepts of "jamal" (beauty), "subject," and "object" found in the writings of Ibn Arabi (d. 1240), he interprets the forms and meanings of several American mosques from across the country. His analysis contributes to three debates within the formulation of a Muslim aesthetics in North America—first, over the meaning, purpose, and function of visual religious expression; second, over the spatial and visual affinities between American and non-American mosques, including the Prophet's mosque at Madinah, Arabia; and third, over the relevance of culture, place, and identity to the making of contemporary religious expression in North America.

The past two decades have seen a revival in the popularity and availability of British hand-made cheeses. Sarah Freeman set out in the spirit of discovery to write a companion guide to this unique industry, in the belief that knowing the cheeses and understanding how they are made can only enhance our enjoyment of them. **THE REAL CHEESE COMPANION** is the result of her extensive research. During her visits to cheesemakers - from Southeast England to the Scottish Highlands - she watched, asked questions, tasted and then went away to develop a unique collection of recipes and serving suggestions. Using an enormously varied selection of cheeses - from goat to cow, soft and creamy to hard and crumbly, white to blue-veined - she presents a mouth-watering selection of dishes such as 'Cerney' and Haddock Fish Cakes, 'Somerset Brie' and Garlic Mushrooms, Poached Chicken Breasts with 'Harbourne Blue' and Brandy Sauce. Long awaited, this textbook fills the gap for convincing concepts to describe amorphous solids. Adopting a unique approach, the author develops a framework that lays the foundations for a theory of amorphousness. He unravels the scientific mysteries surrounding the topic, replacing rather vague notions of amorphous materials as disordered crystalline solids with the well-founded concept of ideal amorphous solids. A classification of amorphous materials into inorganic glasses, organic glasses, glassy metallic alloys, and thin films sets the scene for the development of the model of ideal amorphous solids, based on topology- and statistics-governed rules of three-dimensional sphere packing, which leads to structures with no short, mid or long-range order. This general model is then concretized to the description of specific compounds in the four fundamental classes of amorphous solids, as well as amorphous polyethylene and poly(methyl) methacrylate, emphasizing its versatility and descriptive power. Finally, he includes example applications to indicate the abundance of amorphous materials in modern-day technology, thus illustrating the importance of a better understanding of their structure and properties. Equally ideal as supplementary reading in courses on crystallography, mineralogy, solid state physics, and materials science where amorphous materials have played only a minor role until

now.

The vitality of our culture is still often measured by the status Shakespeare has within it. Contemporary readers and writers continue to exploit Shakespeare's cultural afterlife in a vivid and creative way. This fascinating collection of original essays shows how writers' efforts to imitate, contradict, compete with, and reproduce Shakespeare keep him in the cultural conversation. The essays: * analyze the methods and motives of Shakespearean appropriation * investigate theoretically the return of the repressed author in discussions of Shakespeare's cultural function * put into dialogue theoretical and literary responses to Shakespeare's cultural authority * analyze works ranging from nineteenth century to the present, and genres ranging from poetry and the novel to Disney movies.

Horn OK Please (HOP) depicts India from the perspective of an unusual individual, one who is a successful executive in the Indian corporate sector. The book is targeted toward the educated urban class, young working professionals, NRIs, and anyone who wants to know what the outlook and life of the urban working professional is in India today. It offers hope, portraying a movement beyond the mere struggle for existence, a freedom from the mundane and an aspiration for a better society underlined with a passion for driving coupled with a lust for life. It delves into the joys of crass commercialism, a dream of long drives lived through the book and culminating in a positive view of India as a nation that will be an eye-opener for the world. Although not a travelogue in the true sense, the book illustrates a journey of sorts with a large part of the book actually written on a road trip while also including reflections from various stages of Kartik's life. Every chapter begins with a sarcastic poetic snippet, goes on to set the context, present his points of view and culminates in a warped moralistic end from a virtual community. Through the book Kartik uses techniques like feigned ignorance, unacceptable slang (mostly understood only by a handful of social media geeks) to ask rudimentary, thought provoking and sometimes merely provoking questions. The hopefulness is, however evident in every kilometer of the book which looks at the goodness and prosperity that is clearly visible across a booming India. The second book is already in progress and is titled "Horn OK Please The SCROTUM Scrolls".The narratives range from his experiences in adventure sports to incidents involving hospital visits. There are many accounts from foreigners who have traveled across the country. In contrast there is an

account of someone who portrays himself as a moron with a low IQ, also addressing readers in the same vein while taking them on a journey that shows them his perspective of the country, eloquently disproving moronic notions along the way. This book will shatter the illusion of docile corporate workers in a nation that is considered to be humorless, self-effacing and living in its past glory.

In this “charming” and melancholic novel, a former child sleuth “investigates the hard-to-crack case of Lost Innocence” (Entertainment Weekly). A Chicago Tribune, Kirkus Reviews, and Booklist Book of the Year In the twilight of a mysterious childhood full of wonder, Billy Argo, boy detective, is brokenhearted to find that his younger sister and crime-solving partner, Caroline, has committed suicide. Ten years later, Billy, age thirty, returns from an extended stay at St. Vitus’ Hospital for the Mentally Ill to discover the world full of unimaginable strangeness: office buildings vanish without reason, small animals turn up without their heads, and cruel villains ride city buses to complete their evil schemes. Lost within this unwelcoming place, Billy befriends two lonely, extraordinary children—one a science fair genius, the other a charming, silent bully. With a nearly forgotten bravery, he experiences the unendurable boredom of a telemarketing job; encounters a beautiful, desperate pickpocket; and confronts the nearly impossible solution to his sister’s case. Along a path laden with hidden clues and codes, the boy detective may learn the greatest secret of all: the necessity of the unknown. “Haunted by the mystery of his sister’s death and feeling that a lapse in his sleuthing may be to blame, Billy is determined to find out the reason for her suicide and to punish those responsible . . . The story of Billy’s search for truth, love and redemption is surprising and absorbing. Swaddled in melancholy and gentle humor, it builds in power as the clues pile up.” —Publishers Weekly “The author gives Billy a gallery of rogues to combat and even sends him to investigate the Convocation of Evil at a local hotel (‘Featured Panel: To Wear a Mask?’). Meno sets himself a complicated task, marooning his straight-arrow, pulp-fiction protagonist in a world uglier than the Bobbsey Twins ever faced but refusing to go for satire. Instead, the author takes his compulsive investigator at face value.” —Kirkus Reviews, starred review “Comedic, imaginative, empathic . . . investigates the precincts of grief [and] our longing to combat chaos with reason.” —Booklist

Antonio Allegri da Correggio was the foremost painter of the Parma school of the Italian Renaissance, who was responsible for some of the most forceful and sensuous works of the 16th century. In his use of dynamic composition, perspective and dramatic foreshortening, Correggio prefigured the Rococo art of the 18th century. He had little immediate influence in terms of apprenticed successors, but his works are now considered to have been revolutionary and influential on subsequent artists. A half-century after his death Correggio's work was well known to Vasari. In the 18th and 19th centuries, his works were often noted in the diaries of foreign visitors to Italy, which led to a re-evaluation of his art during the period of Romanticism. Correggio had no direct disciples outside of Parma, where he was influential on the work of Giovanni Maria Francesco Rondani, Parmigianino, Bernardo Gatti, Francesco Madonnina, and Giorgio Gandini del Grano.

In this powerfully argued book, Knasas engages a debate at the heart of the revival of Thomistic thought in the twentieth century. Richly detailed and illuminating, his book calls on the tradition established by Gilson, Maritain, and Owen, to build a case for Existential Thomism as a valid metaphysics. *Being and Some Twentieth-Century Thomists* is a comprehensive discussion of the major issues and controversies in neo-Thomism, including issues of mind, knowledge, the human subject, free will, nature, grace, and the act of being. Knasas also discusses the Transcendental Thomism of Maréchal, Rahner, Lonergan, and others as he builds a carefully articulated case for completing the Thomist revival.

Whereas previous eras had celebrated beauty as the central aim of art, the modernist avant-garde were deeply suspicious of beauty and its perennial symbols, woman and ornament, preferring instead the thrill and alienation of the sublime. They rejected harmony, empathy, and femininity in a denial still reverberating through art and social relations today. Exploring this casting of Venus, with all her charms, into exile, Wendy Steiner's brilliant, ambitious, and provocative analysis explores the twentieth

century's troubled relationship with beauty. Tracing this strange and damaging history, starting from Kant's aesthetics and Mary Shelley's horrified response in *Frankenstein*, Steiner untangles the complex attitudes of modernists toward both beauty and the female subject in art. She argues that the avant-garde set out to replace the impurity of woman and ornament with form -- the new arch-symbol of artistic beauty. However, in the process of controlling desire and pleasure in this way, artists admitted the exotic fetish objects of "primitive" cultures -- someone else's power and allure that surely would not overmaster the sophisticated modernist. A century of pornography, shock, and alienation followed, and this rejection of feminine and bourgeois values -- domesticity, intimacy, charm -- kept the female subject an impossible and remote symbol. Ironically, as Steiner reveals, the feminist hostility to the "beauty myth" had a parallel result, leaving Western society alienated from desire and pleasure on all sides. In the course of this elegantly constructed and accessibly written argument, Steiner explores the cultural history of the century just ended, from Dada to Futurism, T. S. Eliot's *Wasteland* and Picasso's *Les Femmes d'Alger (O. J. R. M.)* to *Pumping Iron II: The Women* and *Deep Throat*, Jean-Michel Basquiat and *Outsider Art*, Naomi Wolf and Cindy Sherman, Thomas Pynchon and Don DeLillo, ranging across art and architecture, poetry and the novel, feminist writing and pornography. Only in recent years, Steiner demonstrates, has our culture begun to see a way out of this damaging impasse, revising the reputations of neglected artists such as Pierre Bonnard, and celebrating pleasure and charm in the arts of the present. By disentangling beauty from a misogynistic view of femininity -- as passive, narcissistic, sentimental, inefficacious -- Western culture now seems ready to return to the female subject and ornament in art, and to accept male beauty as a possibility to explore and celebrate as well. Steiner finds hints of these developments in the work of figures as varied as the painter Marlene Dumas, the novelist Penelope Fitzgerald, and the choreographer Mark Morris as she leads us to a rediscovery and a reclamation of beauty in the Western world. From one of our most thoughtful and ambitious cultural critics, this important and thought-provoking work not only provides us with a searching analysis of where we have been in the last century but reveals the promise of where we might be going in the coming one. Why doesn't P. Zonka, an imaginative hen whose head is always in the clouds, lay eggs? Extraordinary hen P. Zonka spends her time taking in the beauty around her: the shiny green of the grass, the buttery yellow of the dandelions, the deep blue of the sky. The other hens can't understand why she never lays eggs like they do—they think she's just plain lazy. But when P. Zonka finally decides to give egg-laying a try, the other chickens are in for a spectacular surprise! Award-winning author and illustrator Julie Paschkis is sure to delight readers with this lovely story, inspired by the Ukrainian tradition of *pysanky*, about enriching the imagination and appreciating the beauty of the world.

"For the rare Jews of Poland who managed to survive the Holocaust, the very idea of a return to what had been one's homeland might seem both physically and psychologically impossible, perhaps even absurd. Yet it is precisely this paradoxical journey that Mira Kimmelman undertakes with great dignity and generosity. In words that are both direct and intimate, she exposes the ambivalence of what it means to learn to live again after Auschwitz—to experience love, raise a family, and assume a steadfast place in the Jewish community of a new land. At the same time, she acknowledges the abyss of losses that can never be

retrieved. Perhaps even more importantly, Mira reveals how the pain of a return is transformed into a new adventure of discovery and reconciliation to be shared with her sons, their families, and her readers for generations to come.”—Karen D. Levy Professor of French Studies University of Tennessee “This book is written with intelligence, sensitivity, and eloquence. As a post-Holocaust memoir, it is an excellent volume, inasmuch as it brings out the scope of the Holocaust, its impact on future generations, and how it affects our understanding of past generations. The author explores and elucidates the problems of liberation from death and the return to life that forever confront Holocaust survivors.”—David Patterson Bornblum Chair in Judaic Studies University of Memphis “Life beyond the Holocaust brings to mind in its power to document painful memories Primo Levi’s *The Reawakening*. Ms. Kimmelman’s memoir is, above all, a beautiful love story of herself and her husband, Max. She writes in a vernacular style that evokes her experiences with specific details. Her book is alive ... and celebrates in good prose human values triumphing over radical evil.” —Hugh Nissenson

"The editors of *Treating Young Veterans* and the authors of the individual chapters [provide] practitioners with essential information about the needs, desires, and possibilities for veterans and their families. This book represents a thoughtful, sensitive, and sensible approach to working with military personnel and veterans who have been deployed to wars in the Persian Gulf, Iraq, and Afghanistan." Each section includes an introduction highlighting the chapters, and an epilogue delineating important steps in practice, outreach, and advocacy. Key Features: Targets the specific needs of veterans of the Iraqi and Afghani conflicts Includes chapters on women and sexual trauma in the military and homeless combat veterans Addresses the special needs of children of veterans and the nature of ambiguous loss as "veteran-by-proxy," employment issues, and equity issues related to reservists Authored by recognized experts including military officers, attorneys, and Veterans Affairs administrators Designed for both general and scholarly readers

Hillbilly Tales from the Smoky Mountains includes several short stories based on the folklore of the Appalachian Mountains. Before the time of cell-phones, computers and television, family members would gather on the front porch and offer up stories through simple oral traditions. These stories were to provide simple forms of entertainment to their children. With each generation, the stories become more elaborate and creative. These yarns became known as Appalachian folklore. Mountain people have always

led a difficult life; but how they dealt with their struggles is a unique perspective on Appalachian people. Also, in this book you will find a small section on mountain medicinal treatments and hillbilly proverbs, which were carried over from mother to daughter down the family line. Knowledge of apothecary, or also known as mountain medicine, was necessary to treat family members who became ill while the local doctor was away visiting two towns over. Most importantly, no decent self-respecting mountain folk would ever go unprepared without offering up advice to help their fellow neighbor. Wise sayings or hillbilly proverbs go hand-in-hand with mountain medicine and is given to anyone who might need guidance in their daily life. The second part of the book includes a special story written by one of the original descendants of the Crowe Family, Ms. Verna Humphrey. This short piece of fiction centers around a light romance based right after the end of the Civil War. The setting takes place in Green Cove and it presents a time of struggle and death while a young girl, Charlotte, struggles to regain her birthright during these trying times. When a young lawyer enters upon the scene, Charlotte's interpretation of birthright takes on a whole new meaning. Now she must make some hard decisions that will alter the course of her life.

This book is the definitive study of the life and works of one of Britain's most important inventors who, due to a cruel set of circumstances, has all but been overlooked by history. Alan Dower Blumlein led an extraordinary life in which his inventive output rate easily surpassed that of Edison, but whose early death during the darkest days of World War Two led to a shroud of secrecy which has covered his life and achievements ever since. His 1931 Patent for a Binaural Recording system was so revolutionary that most of his contemporaries regarded it as more than 20 years ahead of its time. Even years after his death, the full magnitude of its detail had not been fully utilized. Among his 128 Patents are the principle electronic circuits critical to the development of the world's first electronic television system. During his short working life, Blumlein produced patent after patent breaking entirely new ground in electronic and audio engineering. During the Second World War, Alan Blumlein was deeply engaged in the very secret work of radar development and contributed enormously to the system eventually to become 'H2S'-blind bombing radar. Tragically, during an experimental H2S flight in June 1942, the Halifax bomber in which Blumlein and several colleagues were flying, crashed and all aboard were killed. He was just days short of his 39th birthday. For many years there have been rumours about a biography of Alan Blumlein, yet none has been forthcoming. This is the world's first study of a man whose achievements should rank among those of the greatest Britain has produced. This book provides detailed knowledge of every one of his patents and the process behind them, while giving an in depth study of the life and times of this quite extraordinary man. A behind-the-scenes view of the power struggles within the Vatican and “a look inside the byzantine halls of the institutional Catholic Church.”—Publishers Weekly A journalist who has long covered the Vatican, Marco Politi takes us deep inside the struggle roiling the Roman Curia and the Catholic Church worldwide, beginning with Benedict XVI, the pope who famously resigned in 2013, and intensifying with the unexpected election of Jorge Mario Bergoglio, archbishop of Buenos Aires, now known as Pope Francis. Politi's account balances the perspectives of Pope Francis's supporters, Benedict's sympathizers, and those disappointed members of the laity who feel alienated by the institution's secrecy, financial corruption, and refusal to modernize. Politi dramatically recounts the sexual scandals that have rocked the church and the accusations of money laundering and other financial misdeeds swirling around the Vatican and the Italian Catholic establishment, and how Pope Francis's attempts to address these crimes has been met with resistance from entrenched factions. He writes of the decline in church attendance and vocations to the priesthood as the church continues to prohibit divorced and remarried Catholics from receiving Communion. He visits European parishes where women perform the functions of missing male priests—and where the remaining parishioners would welcome the ordination of women, if the church would allow it. Pope Francis's emphasis on pastoral compassion for all who struggle with the burden of family life has also provoked the ire of traditionalists. He knows from experience what life is like for the poor in South America and elsewhere, and highlights the contrast between the vital, vibrant faith of these parishioners and the disillusionment of European Catholics. As Pope Francis and his supporters are locked in battle with the defenders of the traditional hard line and with ecclesiastical corruption, the future of Catholicism is at stake—and it is far from certain Francis will succeed in saving the institution from decline.
