No one has failed to notice that the current generation of youth is deeply--some would say totally--involved with digital media. Professors Howard Gardner and Katie Davis name today's young people The App Generation, and in this spellbinding book they explore what it means to be "app-dependent" versus "app-enabled" and how life for this generation differs from life before the digital era. Gardner and Davis are concerned with three vital areas of adolescent life: identity, intimacy, and imagination. Through innovative research, including interviews of young people, focus groups of those who work with them, and a unique comparison of youthful artistic productions before and after the digital revolution, the authors uncover the drawbacks of apps: they may foreclose a sense of identity, encourage superficial relations with others, and stunt creative imagination. On the other hand, the benefits of apps are equally striking: they can promote a strong sense of identity, allow deep relationships, and stimulate creativity. The challenge is to venture beyond the ways that apps are designed to be used, Gardner and Davis conclude, and they suggest how the power of apps can be a springboard to greater creativity and higher aspirations.

Juggling work and family can be... hell. Calvin & Hobbes meets Call of Cthulhu as the sensationally popular heavy metal webcomic Belzebubs comes to print in a grim, goofy, and gorgeous hardcover. Belzebubs is a "trve kvlt mockumentary" focusing on the everyday challenges of family life: raising kids, running a small business, and making time for worship. Except the kids are named Lilith and Leviathan, the business is a black-metal band, and the worship... isn't exactly aimed upstairs. In a few short years, what started out as improvised social-media doodles has now become a wildly successful webcomic with hundreds of thousands of fans. The irresistible cartooning of JP Ahonen (Sing No Evil) combines relatable slice-of-life humor with over-the-top occult antics and references from metal music to Lovecraftian horror, making Belzebubs a devil of a good time.

Quando si Parla del Garda si va a toccare sempre un tasto debole, il nostro gigante blu con una ottima reputazione, luogo intenso ove si respira la cultura Bresciana e la cultura celtica, in grado di affascinare, pittori, Romanzieri, artisti, del cinema oppure del mondo musicale. Un luogo magico dove le leggende prendono vita come ad esempio la leggenda di Benny, nome coniato da Bellelli Armando, che parla di un mostro simile a Nessie, tutti dicono di vederlo, tutti dicono di avere le prove di questo avvistamento, tutti dicono che Nessie esiste e di conseguenza esiste anche Benny, ma il caso vuole che nessuno sa della presenza della tartaruga a naso di porcello che si cela nelle acque del garda, oppure della fauna tropicale che non dovrebbe esserci, troppo impegnati a dare del pazzo drogato e ubriacone abbattendo la sua dignità, a quella persona che diceva di aver visto un coccodrillo in un laghetto che sfocia poi nel Garda, senza pensare che quel coccodrillo poteva essere tranquillamente una testuggine con la corazza armadillo, una tartaruga ben nota, ma come hanno fatto queste tartarughe ha entrare nel nostro lago? Come hanno fatto BMW, Moto e moltri altri inutili relitti a entrare nel algo? Ignoranza di chi scrive libri oppure monta documentari mostrando solo il lato negativo della nostra creatura, come dice Angelo Modina, della Deep Explorer dobbiamo non solo valorizzare il nostro lago ma il documentario o il libro che si va a preparare non dovrebbe gettare merda o fango sul suo nome ma mostrarlo per la meraviglia che è per ciò che rappresenta, non solo ai Bresciano ma hai molti Tedeschi, Inglesi e altri turisti che ogni anno lo popolano. Benvenuti nel mistero del Lago di Garda.

NEW YORK TIMES BESTSELLER • This official Minecraft novel is an action-packed thriller! When a new virtual-reality version of the game brings her dreams—and doubts—to life, one player must face her fears. Bianca has never been good at following the plan. She's more of an act-now, deal-with-the-consequences-later kind of person. But consequences can't be put off forever, as Bianca learns when she and her best friend, Lonnie, are in a terrible car crash. Waking up in the hospital, almost paralyzed by her injuries, Bianca is faced with questions she's not equipped to answer. She chooses instead to try a new virtual-reality version of Minecraft that responds to her every wish, giving her control over a world at the very moment she thought she'd lost it. As she explores this new realm, she encounters a mute, glitching avatar she believes to be Lonnie. Bianca teams up with Esme and Anton, two kids who are also playing on the hospital server, to save her friend. But the road to recovery isn't without its own dangers. The kids are swarmed by mobs seemingly generated by their fears and insecurities, and now Bianca must deal with the uncertainties that have been plaguing her: Is Lonnie really in the game? Stax Stonecutter has lived a peaceful--if unremarkable--life in his small town in the Overworld. He prefers leisure to work, choosing to tend to his gardens and play with his cats all day rather than expand his family's mining business. But when a mysterious stranger arrives, he takes everything from Stax, stranding him in the middle of nowhere and with nothing to his name. Now, Stax must learn not only how to survive, but how to live.

Linus Hoppe has always lived in Realm One, an ideal world. Now, at 14, he must be tested by the Great Processor to determine where he deserves to live from here on. If he achieves a high score, nothing in his life will change. But if he scores too low, he'll be relegated to an inferior realm, possibly far from his family and friends. An official tie-in to the globally popular video game traces the story of a new hero stranded in the world of Minecraft who must survive a harsh environment while unraveling the secrets of a mysterious island. Floating Islands in science, history, the arts and any number of sightings elsewhere

"Dove sono? Chi sono? E perché tutto ciò che mi circonda è fatto di blocchi?" Queste le domande di un naufrago che approda su un'isola misteriosa, dove il paesaggio e le creature che lo popolano gli appaiono interamente costituiti da forme squadrate. Un mondo stupefacente e pieno di insidie dove la priorità è trovare del cibo. La seconda è non diventare cibo per le altre creature che si aggirano nell'isola, come lo zombi che si fa vivo appena cala la notte, i creeper esplosivi e gli scheletri armati. Senza alcun aiuto a parte alcuni strumenti improvvisati e i saggi consigli di un amico improbabile: una mucca. In questo mondo non sempre le regole hanno un senso, ma il coraggio e la fantasia la fanno da padroni. Ci sono foreste da esplorare, tunnel sotterranei da saccheggiare e masse di non morti da sconfiggere. Solo allora il segreto dell'isola potrà essere rivelato.

In the thrilling sequel to the New York Times bestselling novel Minecraft: The Island, a stranded hero stumbles upon another castaway—and discovers that teamwork might just be the secret to survival.

So many questions, and no time to ponder—not when dark is falling and dangerous mobs are on the horizon. Gurgling zombies and snarling wolves lurk in the night, and they're closing in. With nowhere to hide, the lone traveler flees up a mountain, trapped and out of options . . . until a mysterious figure arrives, fighting off the horde singlehandedly. The unexpected savior is Summer, a fellow castaway and master of survival in these frozen wastes. Excited to find another person in this strange, blocky world, the explorer teams up with Summer, whose impressive mountain fortress as a safe haven . . . for now. But teamwork is a new skill for two people used to working alone. If they want to make it home, they will have to learn to work together—or risk losing everything.

A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published Last Letters from Hav in 1985, it was short-listed for the Booker Prize. Here it is joined by Hav of the Myrmidons, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.

Ghoulia lives in Crumbling Manor with her Auntie Departed and spends most of her time playing with Tragedy, her beloved albino greyhound. But things aren't as easy as they seem for this little zombie girl—all she wants is a real friend. She tries to venture past the manor's walls, but she can't hide her pale green skin or the deep purple circles under her eyes. The other children will be afraid of her, and no one will want to be her friend. But when Halloween rolls around, Ghoulia hatches a brilliant plan. All the other, ordinary children will be dressed up like monsters, so Ghoulia can go out into the town and be entirely herself. (Piano Solo Songbook). "I think there is a similarity between the infinite big and the infinite smallness of everything," says Yann Tiersen. "It's the same experiment looking through a microscope as it is a telescope." Named after a chapel in a small village on the island of Ushant, Kerber marks a new chapter in critically-acclaimed composer Yann Tiersen's career. A chapter still true to Tiersen's nuanced and subtle approach but one that sets out with his most overtly electronic material to date. Beautifully textured, highly immersive and thoughtfully constructed, Tiersen creates an electronic world, providing an environment in which the piano source exists. A sense of place has often been a central theme in Tiersen's work and here that is no different. Each track is tied to a place mapping out the immediate landscape that surrounds Tiersen's home, linking back to his thoughts on the possibilities of the infinite smallness. This official, exclusive folio is beautifully printed on high-quality, uncoated paper with striking graphic artwork. All seven pieces are presented for solo piano and follow an exclusive introduction to the project.

Just a few years ago, Markus Persson was a bored IT-developer in Stockholm. In the evenings, he toiled away on a labour of love: a game with a tiny but dedicated online following. It was called Minecraft and Markus released it to the world in early 2009. The game itself looks deceptively simple. It resembles a digital version of Lego "bricks stacked on top of each other, giving players a world where they build whatever structures their mind can conjure. A breath of fresh air compared to the industry giants' shooter games. In the space of a few years, Minecraft has become one of the most astonishing success stories of the internet age, attracting millions of players and proving how a single great idea can topple empires in the digital, post-industrial world. This is the story of the man behind the game. Here Markus opens up for the first time about his life. About his old Lego-filled desk at school, the first computer his father brought home one day and also about growing up in a family marked by drug abuse and conflict. But above all it is the story of the fine line between seeming misfit and creative madman, and the birth of a tech visionary.

A comprehensive exploration of Earth's ancient past, the evolution of humanity, the rise of civilization, and the effects of global catastrophes • Explores biological evidence for the aquatic ape theory and 20-million-year-old evidence of pre-human cultures from which we are not descended • Traces the genesis of modern human civilization to Indonesia and the Central Pacific 75,000 years ago after a near-extinction-level volcanic eruption • Examines the profound similarities of megaliths around the world, including Nabta Playa and Gobekli Tepe, to reveal the transoceanic civilization that built them all Exploring emerging and suppressed evidence from archaeology, anthropology, and biology, Frank Joseph challenges conventional theories of evolution, the age of humanity, the origins of civilization, and the purpose of megaliths around the world. He reveals 20-million-year-old quartzite tools discovered in the remains of extinct fauna in Argentina and other evidence of ancient pre-human cultures from which we are not descended. He traces the genesis of modern human civilization to Indonesia and the Central Pacific 75,000 years ago, launched by a catastrophic volcanic eruption that abruptly reduced humanity from two million to a few thousand individuals worldwide. Further investigating the evolutionary branches of humanity, he explores the mounting biological evidence supporting the aquatic ape theory--that our ancestors spent one or more evolutionary phases in water--and shows how these aquatic phases of humanity fall neatly into place within his revised timeline of ancient history. Examining the profound similarities of megaliths around the world, including Nabta Playa, Gobekli Tepe, Stonehenge, New Hampshire's Mystery Hill, and the Japanese Oyu circles, the author explains how these precisely placed monuments of quartz were built specifically to produce altered states of consciousness, revealing

the spiritual and technological sophistication of their Neolithic builders--a transoceanic civilization fractured by the cataclysmic effects of comets. Tying in his extensive research into Atlantis and Lemuria, Joseph provides a 20-million-year timeline of the rise and fall of ancient civilizations, both human and pre-human, the evolutionary stages of humanity, and the catastrophes and resulting climate changes that triggered them all--events that our relatively young civilization may soon experience.

Un romanzo che intreccia il pulp horror di Joe R. Lansdale, sci-fi di Philip K. Dick e le atmosfere di Stephen King. Una storia dai confini di genere sfumati e dallo stile incalzante e adrenalinico. Nulla è come appare e nulla si può dare per scontato nella realtà raccontata da Iannaccone, una quotidianità forse immaginifica o che forse stiamo vivendo in questo momento... Michele e Giulio, padre e figlio, sono mondi distanti, isole allontanate da un tempo scandito da pochi momenti condivisi. Ma la vita ti sorprende sempre, "regalando" a un giorno qualunque, durante una banale corsa in metro, un risvolto inaspettato. All'improvviso, le persone attorno ai due cominciano a morire senza un motivo apparente, fin quando dal sottosuolo, non si scatena l'inferno. Una forza sconosciuta si manifesta dalle viscere della Terra e sembra intenzionata a distruggere la razza umana. Una potenza mostruosa, che si autoalimenta delle onde elettromagnetiche prodotte dalla tecnologia. Prigionieri del vagone, la realtà che ha circondato Giulio e Michele fino a quel momento potrebbe non essere altro che una menzogna, la parte di un ciclo infinito che, inesorabilmente, porta a una nuova genesi. L'umanità è destinata a scomparire o c'è una salvezza? E cosa c'entra un ragazzino di sedici anni e il rapporto con suo padre in questo disegno? Genesi, horror urbano dai tratti fantasy, ci accompagna così per mano nella sua personalissima visione della fine dell'umanità. E nell'altrettanto astrusa ancora di salvezza che potrebbe concederci una rinascita.
