"A young child refuses to try a bite of broccoli until her mom guides her through a careful exploration of the new food"--

Lisa Wheeler and Caldecott Honor-winning illustrator Molly Idle remind overeager little biters that biting is for food in this hysterical read-aloud picture book. Learning good behavior has never been so fun! It's good to bite a carrot. It's good to bite a steak. It's bad to bite your sister! She's not a piece of cake. Cause... People don't bite people! That's what this book's about. So if you find you're tooth-inclined—you'd better check it out!

Little Dino learns to use his strong hands and arms for helping instead of hitting.

"Biting is for food." Tiny Tiger has big, sharp teeth, and he discovered he could bite. However, Tiny Tiger must learn to use his teeth in the right way. This book will teach your child positive behavior patterns and good manners. Perfect examples will demonstrate that biting is not meant for clothes, toys, or friends. Biting is for tasty food. "Tiny Tigers Don't Bite" has funny illustrations and light rhymes that are great for children who have just discovered the power of biting.

Munch, crunch! 'This is the dinosaur looking for lunch!'. It's a dinosaur-eat-dinosaur (and other treats) world out there. But when 'bite, snap, crunch!' leads to a buzz, the buzz leads to a hop, and the hop leads to a wriggle, mealtime has surprising and hilarious results.

Humorous Illustrations, easy-to-read text, and dinosaurs introduce young children to good manners and prosocial behavior.

Dinosaurs don't just take, take, take; dinosaurs do share. When they are mad, they don't hit or bite; instead they use words to express their feelings. They shout and run outdoors; they don't shout at a wedding or run in the china shop. Illustrating this book with funny pictures of dinosaurs, Steve Björkman helps young children learn the benefits of being considerate toward others and the secret to making friends. An I Like to Read® book. Guided Reading Level E.

Millipedes do it. Dinosaurs did it. You do it. I do it. Octopuses don't (and nor do octopi). Spiders might do it: more research is needed. Birds don't do it, but they could if they wanted to. Herrings do it to communicate with each other. In 2017 zoologist Dani Rabaiotti's teenage brother asked her a most teenaged question: Do snakes fart? Stumped, Rabaiotti turned to Twitter. The internet did not disappoint. Her innocent question spawned the hashtag #doesitfart and it spread like a noxious gas. Dozens of noted experts began weighing in on which animals do and don't fart, and if they do, how much, how often, what it's made of, what it smells like, and why. Clearly, the public demands more information on animal farts. Does it Fart? fills that void: a fully authoritative, fully illustrated guide to animal flatulence, covering the habits of 80 animals in more detail than you ever knew you needed. What do hyena farts smell especially bad? What is a fossa, and does it fart? Why do clams vomit but not fart? And what is a fart, really? Pairing hilarious illustrations with surprisingly detailed scientific explanations, Does it Fart? will allow you to shift the blame onto all kinds of unlikely animals for years to come.
