The "must-have" book for loom knitters by the top expert on the subject is now updated to reflect the newer looms on the market. Like the previous edition this new edition still contains everything you need to know about loom knitting, like gauge, yarn thickness, increasing, decreasing, color work, different cast on and off methods, and more. Additionally, it includes Isela's precise and easy how-to instructions, now newly updated, for making basic stitches and variations, and for using all the different types of looms, round and long looms, currently in the market. The project section is also updated to include more specific information about the looms used, with a handy chart of all the looms, with their gauges, currently on the market. But what hasn't changed is the straightforward information and the need for this book, making it the one to have for all loom knitters. If you only purchase one loom knitting book, this is the one to get!

Easy to learn, portable, and lots of fun--that's weaving on peg looms and weaving sticks! This book introduces you to the craft and answers all of your questions.

If you're like most developers, you rely heavily on JavaScript to build interactive and quick-responding web applications. The problem is that all of those lines of JavaScript code can slow down your apps. This book reveals techniques and strategies to help you eliminate performance bottlenecks during development. You'll learn how to improve execution time, downloading, interaction with the DOM, page life cycle, and more. Yahoo! frontend engineer Nicholas C. Zakas and five other JavaScript experts—Ross Harmes, Julien Lecomte, Steven Levithan, Stoyan Stefanov, and Matt Sweeney—demonstrate optimal ways to load code onto a page, and offer programming tips to help your JavaScript run as

efficiently and quickly as possible. You'll learn the best practices to build and deploy your files to a production environment, and tools that can help you find problems once your site goes live. Identify problem code and use faster alternatives to accomplish the same task Improve scripts by learning how JavaScript stores and accesses data Implement JavaScript code so that it doesn't slow down interaction with the DOM Use optimization techniques to improve runtime performance Learn ways to ensure the UI is responsive at all times Achieve faster client-server communication Use a build system to minify files, and HTTP compression to deliver them to the browser
