"Endoscopic Repair of Abdominal Wall Hernias" crystallizes the enormous experience of a team of minimal access surgeons who are leaders in the field of laparoscopic hernia repair. Written in an easy-to-read format, this full-colour book equips the general surgeon with do-it-yourself techniques using a step-by-step approach to endoscopic repair of hernias of the groin and abdominal wall. This edition has been revised and updated in view of the recognition accorded to herniology in the past decade. The highlights of the book include: A new, simple and practical classification for abdominal wall hernias; line diagrams as well as corresponding operative photographs to delineate the endoscopic anatomy; innovations to reduce the cost of surgery; anaesthetic implications for endohernia repair; and sterilization techniques.

The classic step-by-step atlas of general surgery procedures – now in color and updated with the latest laparoscopic operations A Doody's Core Title for 2011! 1615 color-highlighted illustrations "...a beautifully illustrated atlas of modern surgical procedures...While in other atlases line drawings may simplify and operative photographs may add realism, the illustrations in this atlas allow the surgeon to visualize both the anatomy and the operation. Beyond this, the softly colored illustrations are aesthetically pleasing and invite reading of the accompanying narrative....In sum, while the ninth edition of Zollinger's Atlas of Surgical Operations

differs from the early editions in many ways, it nonetheless evokes the enduring qualities of its predecessors and will guide yet another generation of surgeons."--JAMA

For more than half-a-century, Zollinger's Atlas of Surgical Operations has been the gold-standard reference for learning how to perform the most common surgical procedures using safe, well-established techniques. The ninth edition continues this tradition of excellence with the addition of color illustrations and coverage of more than 230 procedures, including many of the most important laparoscopic operations. Following the proven effective design of previous editions, each procedure is fully explained on two pages. The right page contains beautifully rendered line drawings with color highlights that depict every important action a surgeon must consider while performing the operation. The facing page includes consistently formatted coverage of indications, preoperative preparation, anesthesia, position, operative preparation, incision and exposure, procedure, closure, and postoperative care. Features Coverage of gastrointestinal, hepatobiliary, pancreatic, vascular, gynecologic, and additional procedures, including hernia repair, vascular access, breast procedures, sentinel lymph node biopsy, thyroidectomy, and many more New: coverage of the latest laparoscopic procedures, including right and left colectomy, distal pancreatectomy with splenic preservation, right and left adrenalectomy, bariatric roux-en-Y gastric bypass and adjustable gastric banding, and more Time-tested, updated, and enhanced by color, Zollinger's remains the ultimate teaching atlas of surgery.

Maingot's Abdominal Operations, 12th Edition McGraw Hill Professional

This new edition of a popular book remains the standard for all general surgeons and surgeons in training. It has been completely revised, expanding its focus on operative procedures and drawing on internationally recognized contributors. An extensive artwork program includes over 750 halftones, and more than 700 line drawings - 80% redrawn for a consistent, easy-to-follow illustration of surgical procedure.

Americans are living longer, and the elder population is growing larger. To meet the ongoing need for quality information on elder health, the Encyclopedia of Aging and Public Health combines multiple perspectives to offer readers a more accurate and complete picture of the aging process. The book takes a biopsychosocial approach to the complexities of its subject. In-depth introductory chapters include coverage on a historical and demographic overview of aging in America, a guide to biological changes accompanying aging, an analysis of the diversity of the U.S. elder population, legal issues commonly affecting older adults, and the ethics of using cognitively impaired elders in research. From there, over 425 entries cover the gamut of topics, trends, diseases, and phenomena:

- Specific populations, including ethnic minorities, custodial grandparents, and centenarians
- Core medical conditions associated with aging, from cardiac and pulmonary diseases to Parkinson's and Alzheimer's
- Mental and emotional disorders
- Drugs/vitamins/alternative medicine
- Disorders of the eyes, feet, and skin
- Insomnia and sleep disorders; malnutrition and eating disorders
- Sexual and

gender-related concerns -And a broad array of social and political issues, including access to care, abuse/neglect, veterans' affairs, and assisted suicide Entries on not-quite-elders' concerns (e.g., midlife crisis, menopause) are featured as well. And all chapters and entries include references and resource lists. The Encyclopedia has been developed for maximum utility to clinicians, social workers, researchers, and public health professionals working with older adults. Its multidisciplinary coverage and scope of topics make this volume an invaluable reference for academic and public libraries. Abdominal Wall Hernias is the most up-to-date, comprehensive reference available on all aspects of hernia repair. It includes state-of-the-art approaches to conventional open repairs using tissue-to-tissue techniques, the use of prosthetic mesh, minimally invasive approaches, the repair of recurrent and massive hernias, pertinent anatomy, basic science, and emerging biomaterials. The authors present a full spectrum of procedures to enable readers to gain a broad knowledge of the multifaceted repair of hernias. Richly illustrated, this book is a vital resource for all general surgeons and surgeons-in-training.

Master Techniques in Surgery: Hernia is a volume in a new series that presents common and advanced procedures in the major subspecialties of general surgery. The series is overseen by Josef E. Fischer, MD, editor of the classic two-volume reference Mastery of Surgery. Master Techniques in Surgery: Hernia is written by acknowledged master surgeons, emphasizes surgical procedures, and is lavishly illustrated with

original full-color drawings. The contributors fully explain their preferred techniques in step-by-step, thoroughly illustrated detail, assess indications and contraindications, offer guidelines on preoperative planning, and discuss outcomes, complications, and follow-up. This volume covers open and laparoscopic hernia repairs, including open and laparoscopic ventral hernia repairs. Many other topics are covered, including sports hernia, diaphragmatic hernia, spigelian hernia, and hernia in infants. A companion website will offer the fully searchable text and select procedural videos.

A new, comprehensive review of the radiographic examination of the post-operative GI tract. Organized on an organ-by-organ basis, emphasis is placed on conventional studies, supplemented by cross-sectional imaging. Operative techniques and normal post-operative anatomy are depicted with many schematic line drawings. Normal changes, as well as early and late complications are discussed and abundantly illustrated. A must-have reference for general radiologists, specialists in gastrointestinal surgery and radiology medical libraries.

This book will help the reader to recognize, diagnose, and treat most of the acute abdominal disorders that may be encountered in the pregnant patient, whether associated with or incidental to the pregnancy. A wide range of conditions are addressed, including some which are very rare as well as those more frequently seen, such as acute appendicitis and acute cholecystitis. The principles underlying diagnosis and therapy are clearly explained. Particular features in the

especially since it was established that it plays a central role as an immune system organ and consequentially has a huge impact on causation, impact and transmission of most human ailments. New diseases such as the Acquired Immunodeficiency Syndrome, hepatitis and tumours of the gastrointestinal tract have emerged and they are currently subjects of intensive research and topics of scientific papers published worldwide. Old diseases like diarrhea have become extremely complex to diagnose with new and old pathogens, drugs, tumours and malabsorptive disorders accounting for the confusion. This book has set out algorithms on how to approach such conditions in a systematic way both to reach a diagnosis and to make patient management cheaper and more efficient.

"Current Concepts in Colonic Disorders" attempts to put all the new information into proper perspective with emphasis on aetiopathogenesis and providing rational approach to management of various old and new diseases. As the book editor, I have found this first edition extremely interesting and easy to understand. Comments on how to improve the content and manner of presentation for future editions are extremely welcome.

This book is a comprehensive guide to the surgical repair of inguinal and abdominal wall hernias that not only describes all potential approaches, but also places them in the context of the anatomy of the region, the pathology, and the advances in scientific knowledge over the past decade. It documents in detail the individual techniques applicable in each region (inguinal, femoral, and ventral), highlighting tips and tricks and focusing on indications, potential complications, and outcomes. In addition, it presents cases of incisional hernia and examines less frequent and rare cases and complex situations. Written for surgeons from around the globe, it includes procedures used in wealthy, developed countries and those without mesh more commonly employed in developing countries. With a format designed to facilitate use in daily practice, it is

invaluable for residents seeking step-by-step guidance on procedures ranging from repair of simple inguinal hernias to complex reconstruction; for general surgeons who frequently perform hernia repairs; and for hernia specialists aiming to achieve optimal results. It also appeals to researchers with an interest in the scientific background to hernia surgery.

The current medical literature contains ample text addressing the topics of trauma and critical care. However, there are few texts existing that specifically address the common surgical problems encountered by practicing acute care surgeons. *Common Problems in Acute Care Surgery* provides a comprehensive, evidence-based review of the most common clinical problems encountered by acute care surgeons. Focusing on the clinical care of the patient, this volume explores the general principles of acute care surgery and the specific disease states that are commonly encountered by acute care surgeons. The work also touches upon the ethical issues and systems development behind acute care surgery, including practical considerations for establishing an acute care surgery program, ethical considerations in acute care surgery, and the role of palliative care. Authored by respected experts in the field and illustrated throughout with detailed photographs, *Common Problems in Acute Care Surgery* is of great value to resident surgeons in training, fellows, and practicing surgeons in acute care surgery. Market-leading *SURGICAL TECHNOLOGY FOR THE SURGICAL TECHNOLOGIST: A POSITIVE CARE APPROACH*, 5e, delivers the most trusted, up-to-date, and

This book provides a comprehensive and contemporary discussion about the three key areas of acute care surgery; trauma, surgical critical care, and surgical emergencies. The 65 chapters are arranged by organ, anatomical site and injury type, and each includes a case study with evidence-based analysis of diagnosis, management, and outcomes. Unless stated otherwise, the authors used the GRADE evidence classification system established the American College of Chest Physicians. Trauma, Critical Care and Surgical Emergencies is essential reading for all surgeons, fellows, residents and students, especially those working in trauma, emergency, and critical care environments.
