This is a text for introductory courses on cost and management accounting. It provides coverage of the elementary principles and techniques of costing and management accounting, and concentrates on the typical syllabus of a first year BA course.

Aimed at non-accounting management students, this textbook offers a thorough introduction to management accounting, approaching the subject from a managerial perspective, without sacrificing accuracy or detail.

Fundamentals of Cost Accounting provides a direct, realistic, and efficient way to learn cost accounting, integrated with new technology learning tools. Fundamentals is short (approximately 700 pages) making it easy to cover in one semester. The authors have kept the text concise by focusing on the key concepts students need to master. The Decision opening vignettes and Business Application boxes show realistic applications of these concepts throughout. All chapters conclude with a Debrief that links the topics in the chapter to the decision problem faced by the manager in the opening vignette. Comprehensive end-of-chapter material provides students with all the practice they need to fully learn each concept. McGraw-Hill Connect Accounting a digital teaching and learning platform for homework completion and review that helps improve student performance over a variety of critical outcomes while aiding instructor grading and assessment efficiency. Housed within Connect, SmartBook is an adaptive study tool that helps identify specific topics and learning objectives individual students need to study. As students read, SmartBook assesses comprehension and dynamically highlights where they need to focus more. The result is that students are more engaged with course content, can better prioritize their time, and come to class ready to participate. End-of-Chapter Material helps you apply the concepts in accounting and, in more comprehensive material, analyze the information to form business decisions. Assignable material includes exercises, problems and test bank material. Based on your instructor settings, you can receive instant feedback on your work either while working on an assignment or after the assignment is submitted for a grade.

This book deals comprehensively with the elements of cost accounting, their application to costing methods, and their significance for management through budgetary control, short term decision-making, and capital budgeting. It is an extensive revision of the author's well-known costing text, and provides the student with a complete introduction to cost accounting. Relevant exercises are included at the end of each chapter, with solutions at the end of the book. These include many from recent examinations of the major professional accountancy bodies. Teachers are thus able to use their own favourite examples in lecture or class, and to refer students to other exercises for further practice. Students who are unable to attend a regular course will be able to check their work against the solutions. A series of multiple choice questions throughout the book provides a further opportunity for the student to check personal progress. Other features of the book include: a complete introduction to cost accounting; new material on capital budgeting and cost accounting for service activities; an explanation of budgetary control including behavioural aspects; and graded questions and MCQs throughout (definitions follow CIMA terminology).
