Financial Management for Non-Financial Managers is an accessible, practical and easy to understand guide that will allow any manager to gain confidence in understanding financial matters, managing a budget and dealing with bankers, accountants and finance professionals. A source of invaluable expert advice on all the essential aspects of financial management within the context of running a business, it covers: business structures, accounting and financial statements, analysis and ratios, planning, budgeting, product and service costing, setting selling prices, investment appraisal, finance and working capital, taxation and international transactions. This book explains financial literacy in the context of management, showing how improved awareness of finances can lead to increased value creation and protection for your business. Aimed at the practicing business manager, Financial Management for Non-Financial Managers includes case studies, spreadsheets and worked examples to accompany key skills and practices explained in the book.

This guide is designed to assist all those who are responsible for providing or overseeing formal education or practical experience that forms part of the initial professional development of aspiring professional accountants, or the continuing professional development of professional accountants. It is particularly relevant to professional accountancy organizations. It is also intended for policy makers and regulators who determine which organizations are licensed to certify professional accountants and related specializations, for example, audit professionals. The purpose of the guide is to • increase understanding of the gap between the current skills of many accountants in some regions and the skills that are relevant in increasingly digitized and globalized economies; • convey the essential features of Competency-Based Accounting Education, Training, and Certification (CBAETC); • provide a common reference framework for organizations pursuing CBAETC and the consultants working with them; • assist countries in developing in-country plans and implementing in-country processes that produce accountants with higher-order skills relevant to their economy's rapidly evolving needs; and • improve financial reporting, auditing, and regulation. This guide complements and builds on International Education Standards (IES™) of the International Accounting Education Standards Board™ (IAESB™).

It is now accepted that IT functions are a fundamental part of the competitive business model. Instead of simply offering services IT must 'create value' for the business. This practical title describes the strong financial skills that IT managers must have in order to support: Operations: Finance departments rely heavily on IT managers being able to identify, track and measure costs – sometimes at a very granular level Budgeting: the very technical nature of IT operations means that budgeting can be more complex than many other areas Project Delivery: large technical project deliveries means that costs can be correspondingly complex to account for Business Modeling; pricing models rely heavily on IT managers skills and accuracy. Where one service supports many commercial offerings a strong model is needed to apportion costs appropriately Investment and business cases: a sound understanding of the financial contribution the IT assets make to the overall business is critical to gain support for ongoing investment This outstanding title covers the main financial concepts that managers need to be familiar with in order for IT to take its proper senior place as a contributor to the business. It assumes a basic level of financial understanding and builds on the techniques required almost daily; therefore it is overwhelmingly practical and based on real world scenarios. Not only are the techniques fully described but issues such as - roles, - implementation, - daily management and even - tooling are detailed. This book fills the need for a communication-based, public sector framed book. The authors combine just enough basic theory about communication with specific skill development in areas of immediate interest to those who work in the public sector. It also features a strong "practice" orientation, with plentiful boxed applications (Insights from the Field, Skill Development boxes, Case Studies). It concludes with an especially useful summary chapter that describes the ten essential skills for successful communication.

The study aims to investigate the financial management competency of college principals from the Further Education and Training institutions in the North-West Province of South Africa. Among the main findings and recommendations of the study are that (1) college principals received minimal orientation, induction and training in financial management at assumption of duty, (2) college principals have acquainted themselves with financial management policies and procedures, (3) college management has a greater influence of financial management than all other stakeholders or structures, etcetera. It is recommended that finance offices should be sufficiently staffed with relevantly qualified personnel.

As organizations face a loss of people due to retirement, resignation, or disability, leaders are paying more attention to their talent management strategies, from grooming internal successors to aggressively recruiting from their competitors. The need is most acute in technical and other "knowledge" areas, where the loss of a particular skill set demands an equally focused response. Invaluable Knowledge clarifies the unique (and urgent) issues of attracting, developing, retaining, and transferring the knowledge of IT professionals, engineers, accountants, analysts, and other specialists. The book's structure follows a typical talent cycle, from identifying recruitment challenges, to hiring and training top talent, to building career development initiatives, and finally, to laying the groundwork for the next generation. Invaluable Knowledge makes an indisputable case for the importance of this specific facet of talent management, and offers practical examples, repeatable processes, and a multitude of specific tips to help any organization's talent strategists create seamless transitions and maintain critical knowledge functions indefinitely. Jan Brinckmann analyzes how competencies of founders of new technology-based firms affect the development of their ventures. The research is grounded in competence-related literature and combines insights from entrepreneurship and management research.

"So how do you tell stories that stick-- in your own mind and in the minds of your family, friends, colleagues, and clients? That's precisely what you'll learn in *The Art of Storytelling: From Parents to Professionals*, an enthralling course that reveals the tried-and-true methods experienced storytellers use to develop and tell engaging, entertaining, and memorable tales. In 24 lectures, Professor Hannah B. Harvey of East Tennessee State University demonstrates how to master the art form's basic principles with the same witty, dynamic energy that has made her an internationally recognized professional storyteller and award-winning educator. Even if you never plan to set foot on a stage, knowing what a professional storyteller does in the process of crafting and delivering a tale allows you to enhance the stories you tell everyday-- to your children at bedtime, in your conversational anecdotes, and in your presentations at work. Teachers, lawyers, clergy, coaches, parents, and anyone who wants to understand the power of stories to capture hearts and minds will benefit from the lessons presented in this course"--Publisher's web site.
