Written by one of ANZ's premier sustainability and social accounting academics, An Introduction to Accounting: Accountability in Organisations and Society brings today's accounting hot topics of corporate accountability, sustainability and social responsibility to life with the only complete textbook created from the ground up for these modern accounting teaching and learning concepts. An Introduction to Accounting: Accountability in Organisations and Society takes a unique approach in embracing from the start the notion of accountability for the environment and sustainability in accounting; the structure, content and learning activities provide students with an understanding of accounting's pervasive and transformative role as a social practice and organisational driver. It shows that environments, ideas and values change; the interconnectivity of society; that the planet must be respected as a resource; and that people are affected/influenced by the information they receive and the way it is presented. It is emphasised that accounting and accountability are key aspects of every person's life and that the practice of accounting, while often being seen as very technical in nature, has many social implications. Learning accounting through the lens of sustainability and the environment embeds this perspective in students' minds so that in their careers they will actively seek and use accounting information to make decisions that take into consideration accountability for the environment. “At the time it was first published in 1962, it framed such an urgent appeal to the American conscience that it actually prompted the creation of the Appalachian Regional Commission, an agency that has pumped millions of dollars into Appalachia. Caudill’s study begins in the violence of the Indian wars and ends in the economic despair of the 1950s and 1960s. Two hundred years ago, the Cumberland Plateau was a land of great promise. Its deep, twisting valleys contained rich bottomlands. The surrounding mountains were teeming with game and covered with valuable timber. The people who came into this land scratched out a living by farming, hunting, and making all the things they need-including whiskey.

The quality of life in Appalachia declined during the Civil War and Appalachia remained “in a bad way” for the next century. By the 1940s, 50s, and 60s, Appalachia had become an island of poverty in a national sea of plenty and prosperity. Caudill’s book alerted the mainstream world to our problems and their causes. Since then the ARC has provided millions of dollars to strengthen the brick and mortar infrastructure of Appalachia and to help us recover from a century of economic problems that had greatly undermined our quality of life.”-Print ed.
