Jeanette, Marchioness of Tavistock, endured six years of wedded purgatory before earning the independence of widowhood. She's admittedly attracted to Sycamore. He's refreshingly blunt, unconventional, and loyal to those he cares about. When trouble stalks her, she turns to Sycamore for help, because she would trust him with her life. But will she trust him with her heart?

This book chronicles the history of Sarasota, Florida's African American community - Newtown - that celebrated its 100-year anniversary in 2014. It answers questions about many aspects of community life: why the earliest African Americans who came to Sarasota, then a tiny fishing village, first settled in areas near downtown called -Black Bottom- and -over town;- their transition from there to Newtown; how they developed Newtown from swampland into a self-contained community to ensure their own survival during the Jim Crow era; the ways they earned a living, what self-help organizations they formed; their religious and educational traditions; residents' military service, the

strong emphasis placed on education; how they succeeded in gaining political representation after filing a federal lawsuit; and much more. Newtown residents fought for civil rights, endured and triumphed over Jim Crow segregation, suffered KKK intimidation and violence, and currently are resisting the stealthy gentrification of their community. Whether you are new to the area, a frequent visitor, an educator, historian or a longtime resident trying to connect the dots in your family tree, you will find these stories of courage, dignity and determination enlightening and empowering!

From the abundance of Post-Modern photographic strategies currently in use this book focuses upon what is surely the most spectacular: the "constructed" photograph. The term refers to works of photography in which the motif has been staged especially for the picture and in which the respective artist, in addition to his role as a photographer, also plays the part of director, stage and costume designer, make-up artist and from

time to time of performer as well. The main section of the book is followed by a selection of works that recapitulates the pre-history of the "arranged and staged" photograph beginning in the late 1960s and recreates the climate in which the photographer-stagecrafters of the 1980s found their point of departure.

It is the second year of the ninety-third Olympiad and the Theatre at Athens is full, for the great dramatic season is at its height, and to-day there is to be performed a new play by Aristophanes, the special favorite of the Athenian public. It is a brilliant scene, but a keen observer, who happened to see the same gathering some five and twenty years ago, must now notice a certain falling off in its splendor. For these five and twenty years have been years of war, and latterly, years of disaster. Eleven years ago, the City wild with the pride of power and wealth, embarked on the mad scheme of conquering

Sicily, and lost the finest fleet and army that it ever possessed. Since then it has been a struggle for life with it, and year by year it has been growing weaker and weaker. This has told sadly on the glories of its great festivals. The furnishing of the stage, indeed, is as perfect as ever, and the building itself has been pushed on several stages towards completion. However scarce money may be in the public treasury, the theatre must not be starved. But elsewhere there are manifest signs of falling off. The strangers' gallery is almost empty. All the Greek world from Massilia in Gaul to Cyrene among the sands of Africa used to throng it in happier days. Now more than half that world is hostile, and the rest has little to hope or fear from the dispossessed mistress of the seas. Dionysius of Syracuse, has sent an embassy, and the democracy, which once would have treated with scant courtesy the representatives of a tyrant, is fain to flatter so powerful a prince. There are some Persian Envoys too, for the Persians are still following their old game of playing off one great state against another. A few Greeks from Sinope and from one of the Italian cities, persons of no importance, who would hardly have found a place in the gallery during the palmy times of Athens, make up the company of visitors. Look at the body of the theatre, where the citizens sit, and the spectacle is deplorable indeed. The flower of Athens' sons has perished, and their successors are puny and degenerate. Examine too the crowd that throngs the benches, and you will see that the slaves, distinguished by their unsleeved tunics, fill up no small portion of space. And boys form an unusually large proportion of the audience. Altogether the theatre is a

dispiriting sight to a patriotic Athenian.

"You can be lonely anywhere, but there is a particular flavor to the loneliness that comes from living in a city, surrounded by thousands of strangers. The Lonely City is a roving cultural history of urban loneliness, centered on the ultimate city: Manhattan, that teeming island of gneiss, concrete, and glass. What does it mean to be lonely? How do we live, if we're not intimately involved with another human being? How do we connect with other people, particularly if our sexuality or physical body is considered deviant or damaged? Does technology draw us closer together or trap us behind screens? Olivia Laing explores these questions by travelling deep into the work and lives of some of the century's most original artists, among them Andy Warhol, David Wojnarowicz, Edward Hopper, Henry Darger and Klaus Nomi. Part memoir, part biography, part dazzling work of cultural criticism, *The Lonely City* is not just a map, but a celebration of the state of loneliness. It's a voyage out to a strange and sometimes lovely island, adrift from the larger continent of human experience, but visited by many - millions, say - of souls"--
