In 1970, President Richard Nixon created the Environmental Protection Agency (EPA) to confront environmental pollution and protect the health of the American people. One of the EPA's top priorities was consolidating numerous state offices to more efficiently carry out its goal of "working for a cleaner, healthier environment for the American people." But there was one area in which the EPA--like many government agencies of the time--was terribly inefficient: their graphic design and communications department. Millions of dollars were being wasted annually due to nonstandardized formats, inefficient processes and almost everything being designed from scratch. In 1977 the EPA began working with the legendary New York design firm Chermayeff & Geismar (now Chermayeff & Geismar & Haviv, or CGH), responsible for some of the most recognizable visual identities in the world, such as Chase Bank, PBS, National Geographic, the Smithsonian Institution, Mobil Oil and NBC. Partners Ivan Chermayeff, Tom Geismar and Steff Geissbuhler set about tackling this problem. The result was the 1977 US Environmental Protection Agency Graphic Standards System. Forty years later, Jesse Reed & Hamish Smyth--creators of the NYCTA and NASA Graphics Standards Manual reissues--have partnered with CGH and AIGA, the US's oldest and

Technology has changed the world. Most of us love technology. It has evolved. It has become more complex. We now carry a combined computer, telephone and camera in the form of a smartphone. It's hard to believe that a smartphone contains, in addition to other technology, billions of transistors. In this fascinating book the author, George Gerstman, shares his story of technology that he has seen evolve over his lifetime. *Encountering Technology* takes you from the 1940s to the present, with photographs showing much of the technology that Gerstman used and enjoyed. The book includes scores of examples of the technology, such as digital computers that Gerstman programmed during the 1950s which weighed tons and weren't nearly as powerful as the computer in an iPhone, radios that he listened to before television became popular, the advent of video games, the evolution of the Internet, film cameras that he used before digital cameras were invented, and so much more. Gerstman describes how he personally encountered the digital revolution. *Encountering Technology* directs you through the most popular technology of the past 80 years. The book is a must-read for everyone with any interest in television, telephones, radios, computers, cameras, the Internet, watches, video, or other technology.
