

Manuale Rda Lo Standard Di Metadattazione Per Lera Digitale

Based on research carried out during a five year classroom experiment. The basic underlying assumption is that language form is best learnt when students are concentrating on meaning rather than form.

Assistive Technology Assessment Handbook, Second Edition, proposes an international ideal model for the assistive technology assessment process, outlining how this model can be applied in practice to re-conceptualize the phases of an assistive technology delivery system according to the biopsychosocial model of disability. The model provides reference guidelines for evidence-based practice, guiding both public and private centers that wish to compare, evaluate, and improve their ability to match a person with the correct technology model. This second edition also offers a contribution to the Global Cooperation on Assistive Technology (GATE) initiative, whose activities are strongly focused on the assistive products service delivery model. Organized into three parts, the handbook: gives readers a toolkit for performing assessments; describes the roles of the assessment team members, among them the new profession of psychotechnologist; and reviews technologies for rehabilitation and independent living, including brain-computer interfaces, exoskeletons, and technologies for music therapy. Edited by Stefano Federici and Marcia J. Scherer, this cross-cultural handbook includes contributions from leading experts across five continents, offering a framework for future practice and research.

Master the programming language of choice among statisticians and data analysts worldwide Coming to grips with R can be tough, even for seasoned statisticians and data analysts. Enter R For Dummies, the quick, easy way to master all the R you'll ever need. Requiring no prior programming experience and packed with practical examples, easy, step-by-step exercises, and sample code, this extremely accessible guide is the ideal introduction to R for complete beginners. It also covers many concepts that intermediate-level programmers will find extremely useful. Master your R ABCs ? get up to speed in no time with the basics, from installing and configuring R to writing simple scripts and performing simultaneous calculations on many variables Put data in its place ? get to know your way around lists, data frames, and other R data structures while learning to interact with other programs, such as Microsoft Excel Make data dance to your tune ? learn how to reshape and manipulate data, merge data sets, split and combine data, perform calculations on vectors and arrays, and much more Visualize it ? learn to use R's powerful data visualization features to create beautiful and informative graphical presentations of your data Get statistical ? find out how to do simple statistical analysis, summarize your variables, and conduct classic statistical tests, such as t-tests Expand and customize R ? get the lowdown on how to find, install, and make the most of add-on packages created by the global R community for a wide variety of purposes Open the book and find: Help downloading, installing, and configuring R Tips for getting data in and out of R Ways to use data frames and lists to organize data How to manipulate and process data Advice on fitting regression models and ANOVA Helpful hints for working with graphics How to code in R What R mailing lists and forums can do for you

This book presents and develops the basic methods and models that are used by demographers to study the behaviour of human populations. The procedures are clearly and concisely developed from first principles and extensive applications are presented.

100.677

This workbook comprehensively covers the process of descriptive cataloging, using Resource Description and Access (RDA) and the MARC 21 Bibliographic Format. It is suitable as a text for cataloging students and as an introduction to new cataloging guidelines for experienced

practitioners transitioning to RDA

Complete with an updated bibliography pointing readers to essential books, articles, and web documents for deeper learning, in its new second edition this volume cements its relevance to current practitioners and students.

A NEW YORK TIMES NEW & NOTEWORTHY BOOK Good bookshops are questions without answers. They are places that provoke you intellectually, encode riddles, surprise and offer challenges ... A pleasing labyrinth where you can't get lost: that comes later, at home, when you immerse yourself in the books you have bought; lose yourself in new questions, knowing you will find answers. Picking up where the widely praised *Bookshops: A Reader's History* left off, *Against Amazon and Other Essays* explores the increasing pressures of Amazon and other new technologies on bookshops and libraries. In essays on these vital social, cultural, and intellectual spaces, Jorge Carrión travels from London to Geneva, from Miami's Little Havana to Argentina, from his own well-loved childhood library to the rosewood shelves of Jules Verne's *Nautilus* and the innovative spaces that characterize South Korea's bookshop renaissance. Including interviews with writers and librarians—including Alberto Manguel, Iain Sinclair, Luigi Amara, and Han Kang, among others—*Against Amazon* is equal parts a celebration of books and bookshops, an autobiography of a reader, a travelogue, a love letter—and, most urgently, a manifesto against the corrosive influence of late capitalism.

The third edition succeeds the fifth update of second edition. One of the main features has been the adoption of new and revised international standards, notably the International Standard Identifier for Libraries and Related Organizations, the ISBN 13 and the linking ISSN. New fields have been added for recording the Persistent Record Identifier. Uniform Conventional Headings for Legal and Religious texts are now catered for with separate fields. A number of fields have been revised: archival materials, manuscripts and documentation produced by the ISSN International Centre.

A landmark textbook on digital libraries for LIS students, educators and practising information professionals throughout the world. *Exploring Digital Libraries* is a highly readable, thought-provoking authoritative and in-depth treatment of the digital library arena that provides an up-to-date overview of the progress, nature and future impact of digital libraries, from their collections and technology-centred foundations over two decades ago to their emergent, community-centred engagement with the social web. This essential textbook:

- Brings students and working librarians up to date on the progress, nature and impact of digital libraries, bridging the gap since the publication of the best-known digital library texts
- Frames digital library research and practice in the context of the social web and makes the case for moving beyond collections to a new emphasis on libraries' value to their communities
- Introduces several new frameworks and novel syntheses that elucidate digital library themes, suggest strategic directions, and break new ground in the digital library literature.
- Calls a good deal of attention to digital library research, but is written from the perspective of strategy

and in-depth experience • Provides a global perspective and integrates material from many sources in one place - the chapters on open repositories and hybrid libraries draw together past, present and prospective work in a way that is unique in the literature. Readership: Exploring Digital Libraries suits the needs of a range of readers, from working librarians and library leaders to LIS students and educators, or anyone who wants a highly readable and thought-provoking overview of the field and its importance to the future of libraries.

Manuale RDA. Lo standard di metadatazione per l'era digitale Nessuno poteva aprire il libro... Miscellanea di studi e testimonianze per i settant'anni di fr. Silvano Danieli, OSM Firenze University Press

Coyle's articulate treatment of the issues at hand helps bridge the divide between traditional cataloging practice and the algorithmic metadata approach, making this book an important resource for both LIS students and practitioners.

Integrating the disparate disciplines of descriptive cataloging, subject cataloging, indexing, and classification, the book adopts a conceptual framework that views the process of organizing information as the use of a special language of description called a bibliographic language. Instant electronic access to digital information is the single most distinguishing attribute of the information age. The elaborate retrieval mechanisms that support such access are a product of technology. But technology is not enough. The effectiveness of a system for accessing information is a direct function of the intelligence put into organizing it. Just as the practical field of engineering has theoretical physics as its underlying base, the design of systems for organizing information rests on an intellectual foundation. The subject of this book is the systematized body of knowledge that constitutes this foundation. Integrating the disparate disciplines of descriptive cataloging, subject cataloging, indexing, and classification, the book adopts a conceptual framework that views the process of organizing information as the use of a special language of description called a bibliographic language. The book is divided into two parts. The first part is an analytic discussion of the intellectual foundation of information organization. The second part moves from generalities to particulars, presenting an overview of three bibliographic languages: work languages, document languages, and subject languages. It looks at these languages in terms of their vocabulary, semantics, and syntax. The book is written in an exceptionally clear style, at a level that makes it understandable to those outside the discipline of library and information science.

Covers six steps for applying graphic design concepts to a finished product suitable for print and screen production, including special effects for color, printing processes, and different types of binding.

English is not your mother tongue? This enjoyable book offers everything you need to cope with everyday situations as a resident in English-speaking countries, at scientific meetings or just to stay up to date with medical advances. Each chapter starts with a cartoon.

Introduces the science and technology of planes, discusses what keeps them in the air, and shares facts and statistics about flying.

Presents the history, controversy, and negotiations that have resulted in worldwide agreement on a set of principles which underlie the cataloguing practices for the digital age.

The purpose of authority control is to ensure consistency in representing a value - a name of a person, a place name, or a term or code representing a subject - in the elements used as access points in information retrieval. The primary purpose of this study is to produce a framework that will provide a clearly stated and commonly shared understanding of what the subject authority data/record/file aims to provide information about, and the expectation of what such data should achieve in terms of answering user needs."

This series of comprehensive manuals gives the home mechanic an in-depth look at specific areas of auto repair.

Medicinal and aromatic plants (MAPs) have accompanied mankind from its very early beginnings. Their utilization has co-evolved with homo sapiens itself bringing about a profound increase in our scientific knowledge of these species enabling them to be used in many facets of our life (e.g. pharmaceutical products, feed- and food additives, cosmetics, etc.). Remarkably, despite the new renaissance of MAPs usage, ca. 80 % of the world's population is relying on natural substances of plant origin, with most of these botanicals sourced from the wild state. This first volume and ultimately the series, provides readers with a wealth of information on medicinal and aromatic plants.

The IFLA Religious Libraries in Dialogue Special Interest Group is dedicated to libraries serving as places of dialogue between cultures through a better knowledge of religions. This book based on experiences of libraries serving interreligious dialogue, presents themes like library tools serving dialogue between cultures, collections dialoguing, children and young adults dialoguing beyond borders, story telling as dialog, librarians serving interreligious dialogue.

"This book introduces you to R, RStudio, and the tidyverse, a collection of R packages designed to work together to make data science fast, fluent, and fun. Suitable for readers with no previous programming experience"--

Addresses the art of controlling and updating your library's collection. Discussions of the importance and logistics of electronic resources are integrated throughout the book.

The essays collected in this volume, most previously unpublished, address a number of closely interconnected issues raised by the comparative syntax of functional heads within the Principles-and-Parameters approach. The general theory of head movement, the properties of derived structures created by incorporation, and the parameterization involved are the main theoretical foci. One major empirical area which is addressed concerns head movement in configurations involving certain kinds of operator-like elements, for example, the different manifestations of Verb Second phenomena in Wh and other constructions and the syntax of negative heads and specifiers. In addition, properties of functional heads and head movement in nominal and clausal

structures and the causative construction are investigated.

The 1998 Revision includes changes and corrections authorized by the Joint Steering Committee for Revision of AACR since 1988, including amendments authorized through 1997.

The fifteen essays collected here form a series of variations on a theme, exploring the interconnections between verbal works and the physical objects--primarily manuscripts and printed books--that transmit them. Verbal works may be intangible, but they generally come to us tied to objects; and the study of such works therefore cannot be separated from the study of artifacts. The aim of this book is to examine the theory that underlies this observation and the practical implications that follow from it.

L'iniziativa di offrire una Festschrift a fr. Silvano M. Danieli per il suo settantesimo compleanno rende omaggio a un uomo, a un professionista che con la sua attività ha lasciato un segno profondo nelle relazioni umane e nel mondo delle biblioteche. Fr. Silvano, bibliotecario della Pontificia Facoltà teologica "Marianum" e dal 2014 priore della comunità di Studio Marianum di Roma, ha, infatti, svolto un ruolo strategico nello sviluppo di URBE, l'associazione che riunisce le biblioteche dei pontifici atenei romani in un'unica rete di servizi. Il qualificato elenco dei partecipanti, italiani ed europei, testimonia l'ampiezza dei gradimenti ottenuti nei suoi trent'anni d'attività bibliotecaria e di curatore della Bibliografia dell'Ordine dei Servi e della Bibliografia mariana. Le parole di Aelredo di Rievaulx (1109-1167), la figura di maggior spicco del monachesimo cistercense anglosassone, esprimono il senso del dono: «Un uomo, in virtù dell'amicizia che ha verso un altro uomo, diventa amico di Dio, secondo quanto dice il Signore nel Vangelo: Non vi chiamo più servi, ma amici miei» (De spirituali amicitia, II, 14).

This detailed book is a "how-to" guide to building controlled vocabulary tools, cataloging and indexing cultural materials with terms and names from controlled vocabularies, and using vocabularies in search engines and databases to enhance discovery and retrieval online. Also covered are the following: What are controlled vocabularies and why are they useful? Which vocabularies exist for cataloging art and cultural objects? How should they be integrated in a cataloging system? How should they be used for indexing and for retrieval? How should an institution construct a local authority file? The links in a controlled vocabulary ensure that relationships are defined and maintained for both cataloging and retrieval, clarifying whether a rose window and a Catherine wheel are the same thing, or how pot-metal glass is related to the more general term stained glass. The book provides organizations and individuals with a practical tool for creating and implementing vocabularies as reference tools, sources of documentation, and powerful enhancements for online searching.

The UNIMARC Authorities Format was designed in the early 1990s to allow the creation of authority and reference records for the management of controlled access points in a bibliographic database. Incorporated in this work is relevant information from other IFLA working groups and from UNIMARC users. It is published under the auspices of the IFLA Cataloguing Section. This is the 3rd, completely updated and enlarged edition.
