Learn how to analyze highway maps, projection maps, and geopolitical maps, as well as time zones, in a skills book focusing on the Americas.

Teaches students how to use maps as tools.

This series takes a fresh approach to the mastery of grade-specific skills. Each book uses a wide range of activities to spark students interest in learning. As students complete the activities, they develop the skills they need to meet academic standards in reading, writing, math, social studies, and science. Because the ability levels of students in any one grade level vary, each book spans a broad range of skills. Both teachers and parents can use the books to introduce new concepts, to assess learning and skill development, and to reinforce familiar knowledge. The versatile activities can be used for individual practice, test preparation, or homework assignments. Complete answer keys are provided.

"... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called "zones," with each of four zones represented by a different color. In the activities, students also learn how to

use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD."--Publisher's website.

A fun-filled introduction to maps through the eyes of an adorable pig Henry is a very particular sort of pig. "A place for everything and everything in its place," he always says. But when he looks out his window he is troubled. The farm is a mess! Henry is worried that nobody will be able to find anything in this mess. So he draws a map showing all the animals exactly where they belong. And Henry embarks on a journey through the farm, his friends tagging along as he creates his map: sheep in the woolshed, chickens in the coop, the horse in the stable. After the map is complete,

Henry uses it to bring himself back home, where he is relieved to know that he is exactly where he belongs. A place for everything and everything in its place, indeed. For fans of Zen Shorts by Jon J. Muth or of Winnie the Pooh, this sweet romp through the farm is adorably illustrated by David Elliot, who created the endearing animals who inhabit Brian Jacques world of Redwall. Perfect for pre-schoolers and elementary-schoolers learning to read maps for the first time. Praise for Henry's Map: *** "With appealing characters and gentle humor, this book will be a hit at storytime, or as an introduction to mapping lessons." —School Library Journal *** (starred) *** "Here's hoping for many more Henry-centric adventures." —Kirkus Reviews *** (starred) "Elliot's barnyard animals brim with personality and emotion, matching the understated humor of this charming story." —Publisher's Weekly "This story may even inspire budding cartographers to map their own world." —Booklist "Complete units, background information, vocabulary, teaching suggestions, extension activities, student worksheets"--Cover.

Too often map skills focus on memorizing country borders, names, and capitals. With our rapidly changing world, what is learned one year may become obsolete the next. Map Skills, Grade 6 has a more practical approach. It focuses on the natural geography of the world, why maps are made like they are, and how to use them to find your way around. Students will learn to understand map symbols such as the legend, scale, directional compass, and grids. They will learn to differentiate between physical, political, thematic, and direction maps and how each type is useful for different information. Political boundaries and country names may change, but the skills learned in this book will last a lifetime.

From treasure maps to state maps, this fun and colorful map skills primer covers symbols, cardinal directions, the globe-map connection, and more.
