Since 2010 the European Union has been plagued by crises
of democracy and the rule of law, which have been spreading
from Central and Eastern Europe (CEE), catching many by
surprise. This book argues that the professed success of the
2004 big bang enlargement mirrored the Potemkin villages
erected in the new Member States on their accession to
Europe. Slovenia is a prime example. Since its independence
and throughout the accession process, Slovenia has been
portrayed as the poster child of the 'New Europe'. This book
claims that the widely shared narrative of the Slovenian EU
dream is a myth. In many ways, Slovenia has fared even
worse than its contemporary, constitutionally-backsliding,
CEE counterparts. The book's discussion of the depth and
breadth of the democratic crises in Slovenia should contribute
to a critical intellectual awakening and better comprehension

of the real causes of the present crises across the other CEE Member States, which threaten the viability of the EU and Council of Europe projects. It is only on the basis of this improved understanding that the crises can be appropriately addressed at national, transnational and supranational levels.
