How to compete in the right space for greater profitability and growth The Internet, mobile technology, the ubiquity of information and the availability of big data have dramatically increased the speed and impact of success and failure. Companies today know that they must be

competitive, but precisely where, and more importantly how, to compete is not always easy to identify—until now. *Compete Smarter, Not Harder* explains how to prioritize market opportunities so that a company's strengths in one area can be leveraged across multiple markets. Using cutting-edge academic research and extensive industry practice, author William Putsis outlines the strategic decisions needed to determine which space provides the best margins, overall profitability, and growth potential. Details a step-by-step process for strategic prioritization, from strategic market selection to the tactics of execution, providing competitive advantage across markets. Written by Doctor William Putsis, a professor of marketing, economics, and business strategy at the University of North Carolina at Chapel Hill, who has consulted and led executive development efforts with leading companies throughout the world. Prioritize with conviction. Make absolutely sure that all of your hard work goes toward the right space.

Through its discussion and analysis, the book guides students to a greater understanding of contemporary business issues and helps them to develop new tools of analysis. The text is a European adaptation of our current US book: *Strategic Market Management, 9th Edition* by David Aaker. This new edition is a mainstream text suitable for all business students studying strategy and marketing courses. *Strategic Market Management: Global Perspectives* is motivated by the strategic challenges created by the dynamic nature of markets. The premise is that all traditional strategic management tools either do not apply or need to be adapted to a more dynamic context. The unique aspects of the book are its inclusion of: A business strategy definition that includes product/market scope, value proposition, and assets and competences. A structured strategic analysis including a detailed customer, competitor, market, and environmental analysis leading to an understanding of market dynamics that is supported by a summary flow diagram, a set of agendas to help start the process, and a set of planning forms. Concepts of strategic commitment, opportunism, and adaptability and how they can and should be blended together. Bases of a value proposition and strong brands. A strategy without a compelling value proposition will not be market driven or successful. Brand assets that will support a business strategy need to be developed. Creating synergetic marketing with silo organisations defined by products or countries. All organisations have multiple products and markets and creating cooperation and communication instead of competition and isolation is becoming an imperative. A global perspective is an essential aspect of this new edition. This reflects the lived experience of the student reader but also their likely professional challenges. This is achieved by the extensive use of new examples and vignettes.

Strategic Marketing Management: Theory and Practice offers a systematic overview of the fundamentals of marketing theory, defines the key principles of marketing management, and presents a value-based framework for developing viable market offerings. The theory presented stems from the view of marketing as a value-creation process that is central to any business enterprise. The discussion of marketing theory is complemented by a set of practical tools that enable managers to apply the knowledge contained in the generalized frameworks to specific business problems and market opportunities. The information on marketing theory and practice contained in this book is organized into eight major parts. The first part defines the essence of marketing as a business discipline and outlines an overarching framework for marketing management that serves as the organizing principle for the information presented in the rest of the book. Specifically, we discuss the role of marketing management as a value-creation process, the essentials of marketing strategy and tactics as the key components of a company's business model, and the process of developing an actionable marketing plan. Part Two focuses on understanding the market in which a company operates. Specifically, we examine how consumers make choices and outline the main steps in the customer decision journey that lead to the purchase of a company's offerings. We further discuss the ways in which companies conduct market research to gather market insights in order to make informed decisions and develop viable courses of action. Part Three covers issues pertaining to the development of a marketing strategy that will guide the company's tactical activities. Here we focus on three fundamental aspects of a company's marketing strategy: the identification of target customers, the development of a customer value proposition, and the development of a value proposition for the company and its collaborators. The discussion of the strategic aspects of marketing management includes an in-depth analysis of the key principles of creating market value in a competitive context. The next three parts of the book focus on the marketing tactics, viewed as a process of designing, communicating, and delivering value. Part Four describes how companies design their offerings and, specifically, how they develop key aspects of their products, services, brands, prices, and incentives. In Part Five, we address the ways in which companies manage their marketing communication and the role of personal selling as a means of persuading customers to choose, purchase, and use a company's offerings. Part Six explores the role of distribution channels in delivering the company's offerings to target customers by examining the value-delivery process both from a manufacturer's and a retailer's point of view. The seventh part of the book focuses on the ways in which companies manage growth. Specifically, we discuss strategies used by companies to gain and defend market position and, in this context, address the issues of pioneering advantage, managing sales growth, and managing product lines. We further address the process of developing new market offerings and the ways in which companies manage the relationship with their customers. The final part of this book presents a set of tools that illustrate the practical application of marketing theory. Specifically, Part Eight delineates two workbooks: a workbook for segmenting the market and identifying target customers and a workbook for developing the strategic and tactical components of a company's business model. This part also contains examples of two marketing plans—one dealing with the launch of a new offering and the other focused on managing an existing offering.

The 7th Edition of Global Marketing Management prepares students to become effective managers overseeing global marketing activities in an increasingly competitive environment. The text's guiding principle, as laid out concisely and methodically by authors Kotabe and Helsen,
