A New York Times Best Seller! What will Gameknight999 do when his own friend is infected with the evil Herobrine virus? This adventure series is created especially for readers who love the fight of good vs. evil, magical academies like Hogwarts in the Harry Potter saga, and games like Minecraft, Terraria, and Pokemon GO. With the destruction of the infected Ender Dragon, the monster kings were forced to retreat. Herobrine's poisonous XP has been captured in an obsidian box and sealed tightly. Gameknight999 and his friends know that the obsidian box will have to be destroyed to eliminate the evil virus once and for all. But how? And who will be brave enough to do it? Gameknight and his friends decide to take the infected ender chest far from their village, to a place where it will do no harm. But during the voyage, Herobrine takes control of Herder and has him steal the ender chest, taking it to the Nether where the blaze-king, Charybdis, awaits. But while they're battling a host of blazes, zombie-pigmen, and ghosts, the obsidian box is broken, infecting Herder with Herobrine's XP. As Herder is overcome by the virus's poisonous wickedness, Gameknight must face his friend in battle if he hopes to defeat this monster. But how can he destroy Herobrine without destroying his friend? Sky Pony Press, with our Good Books, Racehorse and Arcade imprints, is proud to publish a broad range of books for young readers—picture books for small children, chapter books, books for middle grade readers, and novels for

young adults. Our list includes bestsellers for children who love to play Minecraft; stories told with LEGO bricks; books that teach lessons about tolerance, patience, and the environment, and much more. While not every title we publish becomes a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

Learn valuable programming skills while building your own Minecraft adventure! If you love playing Minecraft and want to learn how to code and create your own mods, this book was designed just for you. Working within the game itself, you'll learn to set up and run your own local Minecraft server, interact with the game on PC, Mac and Raspberry Pi, and develop Python programming skills that apply way beyond Minecraft. You'll learn how to use coordinates, how to change the player's position, how to create and delete blocks and how to check when a block has been hit. The adventures aren't limited to the virtual – you'll also learn how to connect Minecraft to a BBC micro:bit so your Minecraft world can sense and control objects in the real world! Our workbook enables students to master skills they previously could not. We recognize that the conventional approach to learning fractions is a failure. Assigning problems and providing problem-specific solutions at the end of a workbook does not help students master the broader concepts. We solve this problem with our specially designed step-by-step approach that teaches the reasoning and critical thinking instead of merely asking students to memorize math facts. Students are also taught through research-based strategies and tasks in a way middle school students can understand and consequently, make sense of fractions. Students who struggle with high school algebra usually have lower standardized test scores because fractions are a fundamental part of middle and high school standardized testing. Now, your student can unleash his fullest math-learning potential - all on his own schedule!

Did someone say “field trip”? Gerald is all in! He’d much rather be exploring the Taiga than sleeping through science class. His buddy Sam is all about spotting polar bears, but Gerald is having way too much fun building igloos and snow golems. His science teacher says there are only two rules—learn something every day, and stay with the group. (That’s adult speak for “don’t get lost.”) When Gerald discovers a secret trapdoor in an igloo, he doesn’t exactly get lost. But . . . if he’s not careful, his classmates might just lose him!

Minecraft + STEM = An unstoppable force for fun and learning! Math Skills to Master by Age 12 - A Fun-Schooling Math Workbook for older kids who still struggle with simple math skills, and for younger kids who are advanced in math and love Minecraft. BLACK AND WHITE INTERIOR (For the Full color PDF Version visit [DyslexiaGames.com](http://DyslexiaGames.com)) Unlike other books that help older children with basic math skills this one is not "babyish". It's fun, challenging, and includes building challenges and hands-on cube crafts. The math stories are fun and the math problems spark inquisitiveness! If your child can read simple instructions, or if you have two minutes per day to help your child, this book will be practical to use with your student ages 7 to 12, though it is ideal for 3rd and 4th graders. Help your child to enjoy many aspects of math including: Addition, Subtraction, Multiplication, Fractions, Story Problems, Number Games, Building Challenges, Cube Crafts & Mazes. This is a math book that will change a child's attitude about math. It not only includes number games but other activities that help kids to process the math lessons so they will be able to remember them later. This book is designed to help kids who feel like they are not good at Math to lay a new foundation for the basic learning that leads to mastery. This book is all about using math, logic and numbers, it's not just a boring collection of math problems to memorize and repeat. When kids can apply math skills to activities that are fun, interesting and important in their world... or in their Minecraft World, they begin to feel confident about their own abilities to calculate! Next, they learn to apply their mathematical knowledge to things that matter to them. They will not look at the math in this book and say "Why do I have to learn this? I'll never use this in real life!" Kids can immediately put their math skills to work in their Minecraft Worlds, and as life goes on they will naturally apply their learning to real world opportunities and challenges! We do not provide an answer key because kids are just so tempted to cheat when the answers are in the back. Please take 4 minutes to show your child how to check his own work with a calculator. Using a calculator is a vital life skill, so don't feel bad about it. This math book is effective and practical for kids with Dyslexia and ADHD, the Dyslexia Font is used to make the text easy to read. Active kids enjoy the variety of activities! This is an unofficial Minecraft themed activity book, published under the rules of MOJANG for unofficial Minecraft products. Mojang and Minecraft did not publish this book.
