Peter Dale has been producing a significant body of poetry (The storms, Mortal fire, One another) as well as highly regarded poetic translations of medieval romance poets (Dante, Villon) and of poetry in other world languages since the 1960s. Eight by five is a collection of new epigrams. For a select bibliography, biography, and sound recordings of Dale reading his poetry, see: <http://www.poetryarchive.org/poetryarchive/singlePoet.do?poetId=13>

Forty-one-year-old school nurse Kate Cypher has returned home to rural Vermont to care for her mother who's afflicted with Alzheimer's. On the night she arrives, a young girl is murdered—a horrific crime that eerily mirrors another from Kate's childhood. Three decades earlier, her dirt-poor friend Del—shunned and derided by classmates as "Potato Girl"—was brutally slain. Del's killer was never found, while the victim has since achieved immortality in local legends and ghost stories. Now, as this new murder investigation draws Kate irresistibly in, her past and present collide in terrifying, unexpected ways. Because nothing is quite what it seems . . . and the grim specters of her youth are far from forgotten. More than just a murder mystery, Jennifer McMahon's extraordinary debut novel, *Promise Not to Tell*, is a story of friendship and family, devotion and betrayal—tautly written, deeply insightful, beautifully evocative, and utterly unforgettable.

Cryptography is one of the most active areas in current mathematics research and applications. This book focuses on cryptography along with two related areas: the study of probabilistic proof systems, and the theory of computational pseudorandomness. Following a common theme that explores the interplay between randomness and computation, the

important notions in each field are covered, as well as novel ideas and insights.
