Long praised by instructors and students for its accessible regional chapter structure, readability, and sustained attention to social history, the Eleventh Edition of A History of World Societies includes even more features and tools to engage today's students and save instructors time. This edition includes more help with historical thinking skills, an expanded primary source program in print and online, and the best and latest scholarship throughout.

Modern industrialized society chronically and pervasively objectifies the female body, and many women have come to view themselves through the lens of an external observer, habitually monitoring their own appearance whether in public or private settings. Given the negative effects associated with self-objectification-such as body shame, appearance anxiety, depression, and disordered eating-an empirically based approach to researching and treating self-objectification is critical. This book integrates recent research developments and current clinical knowledge on self-objectification in women. Using Barbara L. Fredrickson and Tomi-Ann Roberts' objectification theory as a framework, the contributors address various aspects of the theory, including evidence for and causes of self-objectification across the life span, psychological consequences, and associated mental health risks. The book also discusses various scales for measuring self-objectification, as well as approaches to prevent and disrupt this phenomenon. With research from a variety of disciplines-psychology, sociology, anthropology, women's studies, and political science-this book should be read by everyone interested in the well-being of women.

For the most benefit use in conjunction with McGraw-Hill's leading text, History of the Modern World, 10th Edition, by Palmer.

This revision of Bloom's taxonomy is designed to help teachers understand and implement standards-based curriculums. Cognitive psychologists, curriculum specialists, teacher educators, and researchers have developed a two-dimensional framework, focusing on knowledge and cognitive processes. In combination, these two define what students are expected to learn in school. It explores curriculums from three unique perspectives-cognitive psychologists (learning emphasis), curriculum specialists and teacher educators (C & I emphasis), and measurement

and assessment experts (assessment emphasis). This revisited framework allows you to connect learning in all areas of curriculum. Educators, or others interested in educational psychology or educational methods for grades K-12.

In Forging the 10th Mountain Division for War, Major Justin Chabalko presents a history of Army adaptability and ingenuity. The latest in AUP's Art of War series offers an examination of how wartime and environmental factors informed Army training, with the exciting history of the development of the 10th Mountain Division and the special cold weather considerations that came with preparing troops for victory in extreme conditions. The successes the 10th Mountain Division earned in the mountains of Italy during World War II highlighted the benefits of adaptive training efforts and specialized force building throughout the US Army. Climb to Glory!

Seven hundred years after Hitler's conquest of Europe men are encouraged to follow the soldierly virtues, while women are reduced to breeders and victims

This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

An ardent treatise for the Dignity of Man, which elevates Humanism to a truly Christian level, making this writing as pertinent today as it was in the Fifteenth Century.

Herbert Asbury presents here a vivid and startling account of New York gangdom from its beginning in Revolutionary times to comparatively recent days. Here are the stories of the great gangs which terrorized the city and at times menaced its very existence—from the Bowery Boys and the Dead Rabbits to the Gophers and the Eastmans. Kid Dropper, Dopey Benny, Gyp the Blood and Owney Madden are a few of the gangster luminaries described, not to mention such female evildoers as Gallus Mag and Sadie the Goat. Nor have the underworld's lesser lights been overlooked; for these pages are crowded with a host of gang warriors, pickpockets, tong leaders, murderers, politicians, gamblers, prostitutes, dive-keepers and a few would-be reformers. Mr. Asbury has created such a rich, factual background for this chronicle of crime and gangsterism that the book gains considerable stature as a revealing picture of New York City's history through a century of frenzied growth and expansion. Whether you read it as such or merely for amusement, it is a swift, exciting experience.

This Handbook provides a comprehensive ten-step model that will help guide development practitioners through the process of designing and building a results-based monitoring and evaluation system.

A History of Western Society continues to capture the attention of AP European history students because it recreates the lives of ordinary people and makes history memorable. This report of the President's Commission on Law Enforcement and Administration of Justice -- established by President Lyndon Johnson on July 23, 1965 -- addresses the causes of crime and delinquency and recommends how to prevent crime and delinquency and improve law enforcement and the administration of criminal justice. In developing its findings and recommendations, the Commission held three national conferences, conducted five national surveys, held hundreds of meetings, and interviewed tens of thousands of individuals. Separate chapters of this report discuss crime in America, juvenile delinquency, the police, the courts, corrections, organized crime, narcotics and drug abuse, drunkenness offenses, gun control, science and technology, and research as an instrument for reform. Significant data were generated by the Commission's National Survey of Criminal Victims, the first of its kind conducted on such a scope. The survey found that not only do Americans experience far more crime than

they report to the police, but they talk about crime and the reports of crime engender such fear among citizens that the basic quality of life of many Americans has eroded. The core conclusion of the Commission, however, is that a significant reduction in crime can be achieved if the Commission's recommendations (some 200) are implemented. The recommendations call for a cooperative attack on crime by the Federal Government, the States, the counties, the cities, civic organizations, religious institutions, business groups, and individual citizens. They propose basic changes in the operations of police, schools, prosecutors, employment agencies, defenders, social workers, prisons, housing authorities, and probation and parole officers.

In 1789 the West Indian colony of San Domingo supplied two-thirds of the overseas trade of France. The entire structure of what was arguably the most profitable colony in the world rested on the labour of half a million slaves. In 1791 the waves of unrest inspired by the French Revolution reached across the Atlantic dividing the loyalties of the white population of the island. The brutally treated slaves of Saint Domingo seized at this confusion and rose up in rebellion against masters. In this classic work, CLR James chronicles the only successful slave revolt in history and provides a critical portrait of their leader, Toussaint L'Ouverture, 'one of the most remarkable men of a period rich in remarkable men'.

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

A History of Western Society continues to capture the attention of AP European history students because it recreates the lives of ordinary people and makes history memorable. As the importance and dependence of specific mineral commodities increase, so does concern about their supply. The United States is currently 100 percent reliant on foreign sources for 20 mineral commodities and imports the majority of its supply of more than 50 mineral commodities. Mineral commodities that have important uses and face potential supply disruption are critical to American economic and national security. However, a mineral commodity's importance and the nature of its supply chain can change with time; a mineral commodity that may not have been considered critical 25 years ago may be critical today, and one considered critical today may not be so in the future. The U.S. Geological Survey has produced this volume to describe a select group of mineral commodities currently critical to our economy and security. For each mineral commodity covered, the authors provide a comprehensive look at (1) the commodity's use; (2) the geology and global distribution of the mineral deposit types that account for the present and possible future supply of the commodity; (3) the current status of production, reserves, and resources in the United States and globally; and (4) environmental considerations related to the commodity's production from different types of mineral deposits. The volume describes U.S. critical mineral resources in a global context, for no country can be self-sufficient for all its mineral commodity needs, and the United States will always rely on global mineral commodity supply chains. This volume provides the scientific understanding of critical mineral resources required for informed decisionmaking by those responsible for ensuring that the United States has a secure and sustainable supply of mineral commodities.

A bestseller in its field, A History of Western Society examines the lives of both historical figures and ordinary people, using an engaging, lively writing style to capture students' interest. The authors pay careful attention to traditional political and cultural developments, providing a balanced, well-rounded view of Western history as a whole. Designed to appeal to a more visual student body, the Seventh Edition devotes increased attention to cultural history. The text's photo and map programs have been enhanced, with a stronger relationship between the narrative and illustrations. Scholarly updates throughout the text include new information on Egyptian religion; a revised discussion of the polis and Greek democracy; new material on the origins of Christian sacraments; an expanded discussion on the Peace of God; a new exploration of the cultural consequences of the Crusades; updated scholarship on the Atlantic slave trade; and a revised discussion of nationalism.
