A leading importer of limited-production wines of character and quality takes us on an intimate tour through family-owned vineyards in France and Italy and reflects upon the last three decades of controversy, hype, and change in the world of wine. In the late 1970s, Neal I. Rosenthal set out to learn everything he could about wine. Today, he is one of the most successful importers of traditionally made wines produced by small family-owned estates in France and Italy. Rosenthal has immersed himself in the culture of Old World wine production, working closely with his growers for two and sometimes three generations. He is one of the leading exponents of the concept of "terroir"—the notion that a particular vineyard site imparts distinct qualities of bouquet, flavor, and color to a wine. In *Reflections of a Wine Merchant*, Rosenthal brings us into the cellars, vineyards, and homes of these vigneron, and his delightful stories about his encounters, relationships, and explorations—and what he has learned along the way—give us an unequalled perspective on winemaking tradition and what threatens it today. Rosenthal was featured in the documentary film *Mondovino* and is one of the more outspoken figures against globalization, homogenization, and the "critic-ization" of the wine business. He was also a major subject in Lawrence Osborne's *The Accidental Connoisseur*. His is an important voice in defense of the individual and the artisanal, and their contribution to our quality of life.

The secret history of the invention that changed everything—and became the most profitable product in the world. NATIONAL BESTSELLER Shortlisted for the Financial Times Business Book of the Year Award One of the Best Business Books of 2016 - CNBC, Bloomberg, 1-800-CEO-Read "The One Device is a tour de force, with a fast-paced edge and heaps of analytical insight." -Ashlee Vance, New York Times bestselling author of *Elon Musk* "A stunning book. You will never look at your iPhone the same way again." -Dan Lyons, New York Times bestselling author of *Disrupted* Odds are that as you read this, an iPhone is within reach. But before Steve Jobs introduced us to "the one device," as he called it, a cell phone was merely what you used to make calls on the go. How did the iPhone transform our world and turn Apple into the most valuable company ever? Veteran technology journalist Brian Merchant reveals the inside story you won't hear from Cupertino-based on his exclusive interviews with the engineers, inventors, and developers who guided every stage of the iPhone's creation. This deep dive takes you from inside One Infinite Loop to 19th century France to WWII America, from the driest place on earth to a Kenyan pit of toxic e-waste, and even deep inside Shenzhen's notorious "suicide factories." It's a firsthand look at how the cutting-edge tech that makes the world work—touch screens, motion trackers, and even AI—made their way into our pockets. *The One Device* is a roadmap for design and engineering genius, an anthropology of the modern age, and an unprecedented view into one of the most secretive companies in history. This is the untold account, ten years in the making, of the device that changed everything.

The 2015 INTERNATIONAL FUEL GAS CODE SOFT COVER sets forth requirements that address the design and installation of fuel gas systems and gas-fired appliances, based on the most current information and technology available. The requirements are performance-driven, making this an effective tool and valuable addition to a user's code products. In this updated code, the section on protection of piping has been completely

rewritten, and readers are informed that line regulators installed in rigid piping must have a union installed to allow removal of the regulator.

The greatest threat to privacy today is not the NSA, but good-old American companies. Internet giants, leading retailers, and other firms are voraciously gathering data with little oversight from anyone. In Las Vegas, no company knows the value of data better than Caesars Entertainment. Many thousands of enthusiastic clients pour through the ever-open doors of their casinos. The secret to the company's success lies in their one unrivaled asset: they know their clients intimately by tracking the activities of the overwhelming majority of gamblers. They know exactly what games they like to play, what foods they enjoy for breakfast, when they prefer to visit, who their favorite hostess might be, and exactly how to keep them coming back for more. Caesars' dogged data-gathering methods have been so successful that they have grown to become the world's largest casino operator, and have inspired companies of all kinds to ramp up their own data mining in the hopes of boosting their targeted marketing efforts. Some do this themselves. Some rely on data brokers. Others clearly enter a moral gray zone that should make American consumers deeply uncomfortable. We live in an age when our personal information is harvested and aggregated whether we like it or not. And it is growing ever more difficult for those businesses that choose not to engage in more intrusive data gathering to compete with those that do. Tanner's timely warning resounds: Yes, there are many benefits to the free flow of all this data, but there is a dark, unregulated, and destructive netherworld as well.

This report on central government's use of the Government Procurement Card to pay for goods and services finds that when used appropriately it can be cost-effective. However, while controls in five departments examined by the NAO were operating as intended, there is no up to date value-for-money case quantifying the benefits of the cards. Central government spent £322 million using Government Procurement Cards in 2010-11, and £149 million in the first half of 2011-12. There were 1.75 million transactions in 2010-11, and 818,781 transactions in the first half of 2011-12. The majority of transactions were low-value purchases, with an average value of £184 in 2010-11. Use of the cards varies between departments, both in the amount spent and in the type of goods and services purchased. Some departments have inadequate management information and cannot monitor the use of the Government Procurement Card effectively. Central data is incomplete and inconsistent and does not provide an accurate picture of spending across government. There has been a lack of central government oversight of card use which has increased risks to value for money, but the new central policy, which defines minimum standards across government, is an important move towards strengthening controls and ensuring greater consistency. While departments acknowledge the risks and potential advantages of the card, there is no up-to-date value for money case to substantiate this. Work by the NAO has suggested that the cost of more traditional procurement methods may have fallen; however, using the cards could still provide a potential saving of around 35 per cent, or £5 a transaction.

"This document is Part 9 of thirteen parts of the official triennial compilation and publication of the adoptions, amendments and repeal of administrative regulations to California Code of Regulations, Title 24, also referred to as the California Building Standards Code. This part is known as the California fire code."--Preface.

Everything we know about the world today follows an invisible set of rules-how we work, love, parent, spend our money, and define success. But what if we could remove these outdated ideas and start anew? What would our lives look like if we could redefine the meaning of happiness, purpose, and success? The Code of the Extraordinary Mind blends computational thinking, integral theory, modern spirituality, evolutionary biology, and a little bit of humor to provide a revolutionary framework for re-coding ourselves with new, empowering beliefs and behaviors so we can live extraordinary lives. Throughout, Vishen Lakhiani shares transformative insights from legendary thinkers including Elon Musk, Richard Branson, and Arianna Huffington, among others, helping us to think like the greatest creative minds of our era-questioning, challenging, and creating new rules for our lives. Lakhiani's 10 laws help us retrain our minds to grow and achieve more than we ever thought was possible, showing us that we do not need to follow convention and can succeed on our own terms no matter where we are starting from.

Draws on real-life stories and figures, including Martin Luther King, Jr. and Steve Jobs, to examine the qualities a good leader requires in order to inspire and motivate people.

The definitive account of the trillion-dollar payment card industry. The payment card business has evolved from its inception in the 1950s as a way to handle payment for expense-account lunches (the Diners Club card) into today's complex, sprawling industry that drives trillions of dollars in transaction volume each year. Paying with Plastic is the definitive source on an industry that has revolutionized the way we borrow and spend. More than a history book, Paying with Plastic delivers an entertaining discussion of the impact of an industry that epitomizes the notion of two-sided markets: those in which two or more customer groups receive value only if all sides are actively engaged. New to this second edition, the two-sided market discussion provides useful insight into the implications of these market dynamics for cardholder rewards, merchant interchange fees, and card acceptance. The authors, both of whom have researched the industry for more than 25 years, also examine the implications of the recent antitrust cases on the industry as well as other business and technological changes—including the massive consolidation brought about by bank mergers, the rise of the debit card, and the emergence of e-commerce—that could alter the payment card industry dramatically in the years to come.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients,

colleagues and the courts.

Education is the key to America's economic growth and prosperity and to our ability to compete in the global economy. It is the path to higher earning power for Americans and is necessary for our democracy to work. It fosters the cross-border, cross-cultural collaboration required to solve the most challenging problems of our time. The National Education Technology Plan 2010 calls for revolutionary transformation. Specifically, we must embrace innovation and technology which is at the core of virtually every aspect of our daily lives and work. This book explores the National Education Technology Plan which presents a model of learning powered by technology, with goals and recommendations in five essential areas: learning, assessment, teaching, infrastructure and productivity.

NEW YORK TIMES BESTSELLER • This instant classic explores how we can change our lives by changing our habits. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Wall Street Journal • Financial Times In *The Power of Habit*, award-winning business reporter Charles Duhigg takes us to the thrilling edge of scientific discoveries that explain why habits exist and how they can be changed. Distilling vast amounts of information into engrossing narratives that take us from the boardrooms of Procter & Gamble to the sidelines of the NFL to the front lines of the civil rights movement, Duhigg presents a whole new understanding of human nature and its potential. At its core, *The Power of Habit* contains an exhilarating argument: The key to exercising regularly, losing weight, being more productive, and achieving success is understanding how habits work. As Duhigg shows, by harnessing this new science, we can transform our businesses, our communities, and our lives. With a new Afterword by the author “Sharp, provocative, and useful.”—Jim Collins “Few [books] become essential manuals for business and living. *The Power of Habit* is an exception. Charles Duhigg not only explains how habits are formed but how to kick bad ones and hang on to the good.”—Financial Times “A flat-out great read.”—David Allen, bestselling author of *Getting Things Done: The Art of Stress-Free Productivity* “You’ll never look at yourself, your organization, or your world quite the same way.”—Daniel H. Pink, bestselling author of *Drive* and *A Whole New Mind* “Entertaining . . . enjoyable . . . fascinating . . . a serious look at the science of habit formation and change.”—The New York Times Book Review

The *Merchants of Oran* weaves together the history of a Mediterranean port city with the lives of Oran's Jewish mercantile elite during the transition to French colonial rule. Through the life of Jacob Lasry and other influential Jewish merchants, Joshua Schreier tells the story of how this diverse and fiercely divided group both responded to, and in turn influenced, French colonialism in Algeria. Jacob Lasry and his cohort established themselves in Oran in the decades after the Regency of Algiers dislodged the Spanish in 1792, during a period of relative tolerance and economic prosperity. In newly-Muslim Oran, Jewish merchants found opportunities to ply their trades, dealing in both imports and exports. On the eve of France's long and brutal invasion of Algeria, Oran owed much of its commercial vitality to the success of these Jewish merchants. Under French occupation, the merchants of Oran maintained their commercial, political, and social clout. Yet by the 1840s, French policies began collapsing Oran's diverse Jewish inhabitants into a single social category, legally separating Jews from their Muslim neighbors and creating a racial hierarchy. Schreier argues that France's exclusionary policy of "emancipation," far more than older antipathies, planted the seeds of twentieth-century ruptures between Muslims and Jews.

This Surgeon General's report details the causes and the consequences of tobacco use among youth and young adults by focusing on the social, environmental, advertising, and marketing influences that encourage youth and young adults to initiate and sustain tobacco use. This is the first time tobacco data on young adults as a discrete population have been explored in detail. The report also highlights successful strategies to prevent young people from using tobacco.

INSTANT NEW YORK TIMES BESTSELLER "One of the most important books I've ever read—an indispensable guide to thinking clearly about the world." – Bill Gates "Hans Rosling tells the story of 'the secret silent miracle of human progress' as only he can. But Factfulness does much more than that. It also explains why progress is so often secret and silent and teaches readers how to see it clearly." —Melinda Gates "Factfulness by Hans Rosling, an

outstanding international public health expert, is a hopeful book about the potential for human progress when we work off facts rather than our inherent biases." - Former U.S. President Barack Obama

Factfulness: The stress-reducing habit of only carrying opinions for which you have strong supporting facts. When asked simple questions about global trends—what percentage of the world’s population live in poverty; why the world’s population is increasing; how many girls finish school—we systematically get the answers wrong. So wrong that a chimpanzee choosing answers at random will consistently outguess teachers, journalists, Nobel laureates, and investment bankers. In *Factfulness*, Professor of International Health and global TED phenomenon Hans Rosling, together with his two long-time collaborators, Anna and Ola, offers a radical new explanation of why this happens. They reveal the ten instincts that distort our perspective—from our tendency to divide the world into two camps (usually some version of us and them) to the way we consume media (where fear rules) to how we perceive progress (believing that most things are getting worse). Our problem is that we don’t know what we don’t know, and even our guesses are informed by unconscious and predictable biases. It turns out that the world, for all its imperfections, is in a much better state than we might think. That doesn’t mean there aren’t real concerns. But when we worry about everything all the time instead of embracing a worldview based on facts, we can lose our ability to focus on the things that threaten us most. Inspiring and revelatory, filled with lively anecdotes and moving stories, *Factfulness* is an urgent and essential book that will change the way you see the world and empower you to respond to the crises and opportunities of the future. --- “This book is my last battle in my life-long mission to fight devastating ignorance...Previously I armed myself with huge data sets, eye-opening software, an energetic learning style and a Swedish bayonet for sword-swallowing. It wasn’t enough. But I hope this book will be.” Hans Rosling, February 2017.

A powerful and sophisticated underground business delivers thousands of refugees a day all along the Mediterranean coasts of Europe. The new breed of criminals that controls it has risen out of the political chaos of post-9/11 Western foreign policy and the fiasco of the Arab Spring. These merchants of men are intertwined with jihadist armed organizations such as al Qaeda in the Maghreb. They have prospered smuggling cocaine from West Africa and kidnapping Westerners. More recently, the destabilization of Syria and Iraq coupled with the rise of ISIS offered them new business opportunities in the Middle East, from selling Western hostages to jihadist groups to trafficking in refugees numbering in the millions. Overall, the kidnapping industry today is bigger than the illegal drug trade and worth hundreds of billions of dollars annually. *Merchants of Men* is based on exclusive access to hostage negotiators actively involved in ransom negotiations and rescue missions, counter-terrorism experts, members of security services, and former hostages, among many others. The reader will discover that the protocols of prevention and rescue change according to the type of abduction and the designated targets, and will come to know first hand the range of experiences of kidnapping victims. Will the West once again reap the benefits of the political chaos it has sown in its own backyard? From colonization to the advent of "friendly" dictatorial regimes, today's fast-aging European nations are buyers on the refugee market. New workers are needed, and the merchants of men are supplying them. But only skilled, highly educated refugees are wanted. As a tsunami of migrants and refugees floods Europe, new questions almost too numerous to count must be answered.

Outlines a revisionist approach to management while arguing against common perceptions about the inevitability of startup failures, explaining the importance of

providing genuinely needed products and services as well as organizing a business that can adapt to continuous customer feedback.

The Government Procurement Card (GPC) is a payment card which individuals can use to purchase goods and services; the supplier is paid immediately and the balance is paid in full each month by departments. However, inappropriate or fraudulent use of the card brings significant risks. The strength of the controls in place varies significantly between departments. This is particularly evident in the Ministry of Defence, which accounts for around three-quarters of total GPC expenditure, but which limits checks to only a sample of its transactions. The Cabinet Office has overall responsibility and recently created a GPC Steering Group. The Steering Group introduced a central GPC policy in November 2011, setting out a minimum standard across government. The central policy should consider going further, for example by specifying: 100% transaction checking, blocking categories of expenditure by default, banning use of the card for certain items (such as alcohol) and ensuring that all cardholders are permanent staff members. However, the initial challenge will be for the GPC Steering Group to ensure that the policy as it stands is being implemented, and to hold departments to account where there are found to be gaps in the design and implementation of controls. As procurement processes have advanced substantially, the estimated difference in cost of using a card over other methods has reduced. The Cabinet Office has now committed to refreshing the business case, which should help departments to make the right decisions about when using the cards is the most cost-effective way of buying goods and services

#1 New York Times bestselling author Elizabeth Wein delivers an exhilarating, unmissable thriller that finds three very different young adults united to decode a secret that could turn the tide of World War II. Facing a seemingly endless war, fifteen-year-old Louisa Adair wants to fight back, make a difference, do something--anything to escape the Blitz and the ghosts of her parents, who were killed by enemy action. But when she accepts a position caring for an elderly German woman in the small village of Windyedge, Scotland, it hardly seems like a meaningful contribution. Still, the war feels closer than ever in Windyedge, where Ellen McEwen, a volunteer driver with the Royal Air Force, and Jamie Beaufort-Stuart, a flight leader for the 648 Squadron, are facing a barrage of unbreakable code and enemy attacks they can't anticipate. Their paths converge when a German pilot lands in Windyedge under mysterious circumstances and plants a key that leads Louisa to an unparalleled discovery: an Enigma machine that translates German code. Louisa, Ellen, and Jamie must work together to unravel a puzzle that could turn the tide of the war--but doing so will put them directly in the cross-hairs of the enemy. Featuring beloved characters from Code Name Verity and The Pearl Thief, as well as a remarkable new voice, this brilliant, breathlessly plotted novel by award-winning author Elizabeth Wein is a must-read.

The GHS addresses classification of chemicals by types of hazard and proposes harmonized hazard communication elements, including labels and safety data sheets. It aims at ensuring that information on physical hazards and toxicity from chemicals be available in order to enhance the protection of human health and the environment

during the handling, transport and use of these chemicals. The GHS also provides a basis for harmonization of rules and regulations on chemicals at national, regional and worldwide level, an important factor also for trade facilitation. This fifth revised edition of the GHS contains various new or revised provisions concerning, inter alia, new hazard categories for chemically unstable gases and non-flammable aerosols; further rationalization of precautionary statements, and further clarification of some of the criteria to avoid differences in their interpretation.--Publisher's description.
