During and after the English civil wars, between 1640 and 1690, an unprecedented number of manuals teaching cryptography were published, almost all for the general public. While there are many surveys of cryptography, none pay any attention to the volume of manuals that appeared during the seventeenth century, or provide any cultural context for the appearance, design, or significance of the genre during the period. On the contrary, when the period's cryptography writings are mentioned, they are dismissed as esoteric, impractical, and useless. Yet, as this book demonstrates, seventeenth-century cryptography manuals show us one clear beginning of the capitalization of information. In their pages, intelligence—as private message and as mental ability—becomes a central commodity in the emergence of England's capitalist media state. Publications boasting the disclosure of secrets had long been popular, particularly for English readers with interests in the occult, but it was during these particular decades of the seventeenth century that cryptography emerged as a permanent bureaucratic function for the English government, a fashionable activity for the stylish English reader, and a respected discipline worthy of its own genre. These manuals established cryptography as a primer for intelligence, a craft able to identify and test particular mental abilities deemed "smart" and useful for England's financial future. Through close readings of five specific primary texts that have been ignored not only in cryptography scholarship but also in early modern literary, scientific, and historical studies, this book allows us to see one origin of disciplinary division in the popular imagination and in the university, when particular broad fields—the sciences, the mechanical arts, and the liberal arts—came to be viewed as more or less profitable.

For decades, traditional medicine had very little to offer for individuals suffering from multiple sclerosis and other autoimmune diseases. Today, medical science has brought us wave upon wave of immunomodulatory medications to try to slow disease progression. Unfortunately, these medications come with their own health- and life-threatening side effects. And sometimes, they just stop working. "Fighting the Dragon: How I Beat Multiple Sclerosis" is the story of one woman's thirty year battle with multiple sclerosis and what she did to reclaim her life when she realized she would need an assisted living facility within a few years. The book contains detailed descriptions of what worked and what did not, where she got the help she needed (and how the reader can locate these resources within his/her own community), and the logic behind the non-conventional therapies. "Fighting the Dragon" is a narrative of courage—courage driven by desperation, a story written by a patient who decided, when her neurologist told her, "You will never walk normally again," that she would dance. "Fighting the Dragon" is also a book the MS patient can take to his/her physician . . . it contains well-researched, easy-to-follow guidelines for what to do and how. The information is also applicable to a wide range of other autoimmune conditions, cancers, and AIDS. * * * * * Excerpt: . . . if your car kept breaking down and the mechanic you took it to kept doing the same thing to fix it—but it did not stay fixed, you would question the mechanic's competence. Maybe the mechanic pulled out a technical manual. "See. I fixed it exactly as the manual said. This is the industry-approved way to solve this problem." When the car broke down again a week later, would you be satisfied? Probably not. You might decide it is time to replace the car. But that might be too expensive. So, what to do? If you were smart, you would probably try to find a new mechanic. You might ask your friends who they would recommend. You might search on the Internet to see if other people had the same experience with their cars . . . and what caused the problem. You might telephone some repair shops to get some idea of what they thought the problem might be. If you found a new mechanic and that mechanic looked over the car and said, "I have a solution that is not in any industry-approved repair manuals, but it is safe and it works,"—would you walk away and go back to the first mechanic who never got it right? Why is your health worth any less than your car?

Srila Bhaktisiddhanta Sarasvati Thakura (1874-1937) was the son of Srila Bhaktivinoda Thakura, appearing in answer to his fathers prayer as the Thakura worked tirelessly to reform Gaudiya Vaisnavism and to prove its preeminence among world religions. Srila Bhaktisiddhanta Sarasvati Thakura took up his fathers mission and both preached the conclusive truths of Sri Caitanya Mahaprabhus teachings and tasted the sweetness of pure devotion himself. During his lifetime, he initiated thousands of disciples and gave thousands of hours of careful and compassionate instructions. This book provides a compendium of those instructions. Like the Bhaktivinoda Vani Vaibhava volumes that have preceded it, Amrta Vani is presented in a question-and-answer format. It was compiled by Sri Bhakti Mayukha Bhagavata Maharaja, one of Sarasvati Thakuras disciples. Following the system designed by the compiler of Bhaktivinoda Vani Vaibhava, Bhagavata Maharaja posed questions, then found the responses amid Sarasvati Thakuras lectures, lectures, essays, and other writings. The Caitanya-caritamrta states, "Krsna is so merciful that simply by aiming His instructions at Arjuna, He has given protection to the whole world." When those same instructions come through Krsnas pure devotee, one cannot measure the benefit. It is said that by associating for even a moment with a pure devotee one can attain all success in spiritual life. This book provides yet another opportunity for such association.

"Advanced Statistics in Research: Reading, Understanding, and Writing Up Data Analysis Results" is the simple, nontechnical introduction to the most complex multivariate statistics presented in empirical research articles. "wwwStatsInResearch.com," is a companion website that provides free sample chapters, exercises, and PowerPoint slides for students and teachers. A free 600-item test bank is available to instructors. "Advanced Statistics in Research" does not show how to "perform" statistical procedures--it shows how to read, understand, and interpret them, as they are typically presented in journal articles and research reports. It demystifies the sophisticated statistics that stop most readers cold: multiple regression, logistic regression, discriminant analysis, ANOVA, ANCOVA, MANOVA, factor analysis, path analysis, structural equation modeling, meta-analysis--and more. "Advanced Statistics in Research" assumes that you have never had a course in statistics. It begins at the beginning, with research design, central tendency, variability, z scores, and the normal curve. You will learn (or re-learn) the big-three results that are common to most procedures: statistical significance, confidence intervals, and effect size. Step-by-step, each chapter gently builds on earlier concepts. Matrix algebra is avoided, and complex topics are explained using simple, easy-to-understand examples. "Need help writing up your results?" Advanced Statistics in Research shows how data-analysis results can be summarized in text, tables, and figures according to APA format. You will see how to present the basics (e.g., means and standard deviations) as well as the advanced (e.g., factor patterns, post-hoc tests, path models, and more). "Advanced Statistics in Research" is appropriate as a textbook for graduate students and upper-level undergraduates (see supplementary materials at StatsInResearch.com). It also serves as a handy shelf reference for investigators and all consumers of research.

This book is primarily concerned with the classical music catalog of Mercury Living Presence recordings recorded and published by the Mercury Record Corporation. Mercury Records made some of the finest and most natural sounding audio recordings ever made, mostly of excellent and committed performances of classical music. But this is not a history of Mercury records or even of the Living Presence series of recordings. My main focus was to create a list of all the Mercury Living Presence classical records. I am mostly interested in the stereo recordings, but there are also many earlier mono recordings of great interest, too, so I have included those also. Specifically, what is included is information on the SR 90000 series of stereo recordings and the MG 50000 series of mono recordings, but there is also a listing of the Wing classical reissue series. ***** Decades ago, when I began collecting Mercury records, and years later when I started collecting the CDs, I was looking for a complete list of all the Mercury Living Presence records and later the CDs. Though I found some information that was helpful, to get what I wanted, I had to make the list myself. I started with lists of records on the record sleeves of the albums, got some information from The Absolute Sound! magazine, and in the internet age, found useful information on several internet sites, but mostly to get the list I wanted, I had to dig up the information and build it myself. Having completed the list, it occurred to me that other collectors might find it helpful, too. So I put together a group of databases and spreadsheets in Microsoft Excel and Microsoft Works database format files and issued the databases I had created on a CD-rom disc in early 2013. By that time I had all the original series of CDs mastered by Wilma Cozart Fine, and many of the records that had been reissued on CD, and virtually all of the stereo records not issued on CD, plus most of the mono records in which I had a strong interest. Now it is available as a book. Among other things it includes the following lists: Complete Mercury Living Presence CDs, including every CD, with its track information, identifying Composer, title, soloist, conductor, orchestra, CD #, LP where originally published, and recording date. Complete Mercury Living Presence LPs including every LP with its track information identifying Composer, title, soloist, conductor, orchestra, LP #, CD on which it was reissued if any, and recording date. Different versions of the files are arranged by: Composer and Title, Recording Date, Record number, and CD number. There are also a listings of LPs and LP tracks that have not been reissued in the Mercury Living Presence CD series. Included are listings of all original Mercury Living Presence records in the SR 90000 and MG 50000 series, all CDs originally mastered by Wilma Cozart Fine, all SACDs, and the more recent reissues and new issues in the large 50+ CD box sets and the 10-CD box sets of Marcel Dupré and Janos Starker. There are also a few chapters of background information, little known facts, and other topics of interest. Hopefully readers will find it interesting and useful.

"Most self-help books are trite. They don't tell you anything you don't already know, and if you could follow their advice, you wouldn't need to read the book in the first place. This book, however, is radically different. It assumes that you are a normal happy person and want to experience the misery that so many others complain about. It gives some great advice on how to bring yourself to hell on earth, -- and bring all of your family, friends, and co-workers right along with you! Best of all, you can do all this while rolling on the floor with laughter. Give this book to anyone whose cheerful mood annoys you when you are down in the dumps. I totally recommend this book for anyone even slightly Unhappy or those who love them !!!" "I totally recommend this book for anyone even slightly Unhappy or those who love them !! It's fabulous. We had a great time, saw ourselves and others in the pages and since, unfortunately, this whole family is part of the 20% of happy people in a miserable world, the laughs were frequent and heartfelt." "I've read through bunches of self-help books. Of all of them, I think "Born to Win" and this book are the only two that will persist on my shelves." "The book is a delightful take hon the American way. Written with insight and humor, the author takes you into misery as a way of life and offers clever ways of maintaining your miserable status. I read it in one evening and thoroughly enjoyed the wacky humor and uncanny knowledge of how we make ourselves sick with unnecessary worry and self doubt. Read it with a sense of humor and you can't help but love it the way I did." "This is a great book to have on your living room coffee table or bedside, so that you can pick it up often, open to any page, and laugh at how ludicrous we can be on a regular basis. I have taught social dance classes for over 20 years, and my goal is to provide an arena in which people have the freedom to laugh at themselves while learning about something new. Gil's book provides me and others with that freedom. I highly recommend it!" "This is a good book when one feels down and needs an uplift. It allows one to realize not to take life so seriously. Very enjoyable reading."
