The Farmer and the Seed story was written in honor of those in life that fail to see the miracle of God's plans. Many times in life this has been myself. However, the solid truth of it all is that through devotion, prayer, & faithfulness God will bring anyone to where they need to be... but it takes time, sometimes many years, before the wonderous outcome is revealed. One has only to have the faith of a mustard seed; to make a difference down the line. Your life is your seed. What kind of "tree" will you be remembered as?

Before 1941 the United States had no intelligence service worthy of the name. While each military department had its own parochial tactical intelligence apparatus and the State Department maintained a haphazard collection of 'country files' there was no American equivalent to the 400-year-old British espionage establishment or the German Abwehr. No one in Washington was charged with putting the jigsaw puzzle of fact, rumor, and foreign innuendo together to see what pictures might develop or what portions might be missing. Even those matters of vital interest to policy makers remained uncoordinated, unevaluated, uninterrupted, and frequently in the wrong hands. That was in 1941. Four years later the scene was forever altered. The organization which achieved this dramatic turnabout was the Office of Strategic Services, better known by its initials: OSS. Headed by William J. Donovan, a World War 1 hero, Republican politician, and millionaire lawyer, the OSS infiltrated agents into every country of occupied Europe and raised guerillas armies in most. This book examines the small but representative role played by Marines assigned to this country's first central intelligence agency. In so doing, it provides the first serious attempt to chronicle a totally forgotten chapter of Marine Corps history.

Should I start when my friends blew up a chemistry classroom? How about the tenth time I was almost murdered? No. Wait. I know when it all started. Field Manual (FM) 3-34.400, "General Engineering," is the primary implementing manual for the engineer function that bears its name (the others being combat and geospatial engineering). This manual provides general engineering (GE) doctrine for the United States (U.S.) Army and U.S. Marine Corps. As the implementing manual for the engineer function of general engineering (GE), FM 3-34.400 describes the operational environment (OE) and how to apply and integrate GE principles in support of full spectrum operations and the linkage of GE to assured mobility. This FM focuses on the establishment and maintenance of lines of communications (LOCs) and sustainment operations that support operational requirements throughout the area of operations (AO). FM 3-34.400 is designed primarily to assist Army engineers at all echelons in planning and coordinating GE operations at the strategic, operational, and tactical levels. It is also a resource applicable to Department of Defense (DOD), joint, and other Army organizations and agencies that have a role in supporting, establishing, and/or maintaining the infrastructure required to conduct and sustain military operations. It is the primary manual to define the engineer function of GE. FM 3-34.400 is applicable across full spectrum operations. This includes the four types of Army operations (offense, defense, stability, and/or civil support) across the spectrum of conflict (peace, crisis, and war). This FM recognizes the need for joint interdependence and the reality that operations will frequently be performed in a joint, interagency, and multinational environment.

This book is primarily concerned with the classical music catalog of Mercury Living Presence recordings recorded and published by the Mercury Record Corporation. Mercury Records made some of the finest and most natural sounding audio recordings ever made, mostly of excellent and committed performances of classical music. But this is not a history of Mercury records or even of the Living Presence series of recordings. My main focus was to create a list of all the Mercury Living Presence classical records. I am mostly interested in the stereo recordings, but there are also many earlier mono recordings of great interest, too, so I have included those also. Specifically, what is included is information on the SR 90000 series of stereo recordings and the MG 50000 series of mono recordings, but there is also a listing of the Wing classical reissue series. \*\*\*\*\* Decades ago, when I began collecting Mercury records, and years later when I started collecting the CDs, I was looking for a complete list of all the Mercury Living Presence records and later the CDs. Though I found some information that was helpful, to get what I wanted, I had to make the list myself. I started with lists of records on the record sleeves of the albums, got some information from The Absolute Sound! magazine, and in the internet age, found useful information on several internet sites, but mostly to get the list I wanted, I had to dig up the information and build it myself. Having completed the list, it occurred to me that other collectors might find it helpful, too. So I put together a group of databases and spreadsheets in Microsoft Excel and Microsoft Works database format files and issued the databases I had created on a CD-rom disc in early 2013. By that time I had all the original series of CDs mastered by Wilma Cozart Fine, and many of the records that had been reissued on CD, and virtually all of the stereo records not issued on CD, plus most of the mono records in which I had a strong interest. Now it is available as a book. Among other things it includes the following lists: Complete Mercury Living Presence CDs, including every CD, with its track information, identifying Composer, title, soloist, conductor, orchestra, CD #, LP where originally published, and recording date. Complete Mercury Living Presence LPs including every LP with its track information identifying Composer, title, soloist, conductor, orchestra, LP #, CD on which it was reissued if any, and recording date. Different versions of the files are arranged by: Composer and Title, Recording Date, Record number, and CD number. There are also a listings of LPs and LP tracks that have not been reissued in the Mercury Living Presence CD series. Included are listings of all original Mercury Living Presence records in the SR 90000 and MG 50000 series, all CDs originally mastered by Wilma Cozart Fine, all SACDs, and the more recent reissues and new issues in the large 50+ CD box sets and the 10-CD box sets of Marcel Dupré and Janos Starker. There are also a few chapters of background information, little known facts, and other topics of interest. Hopefully readers will find it interesting and useful.

Money problems are at the top of her list of concerns, as usual... but now there is so much more weighing her down. The other case is brought to her by none other than OOA thief Jax, who's returned to Sheridan County. At first she resists getting involved, certain that his brand of work wasn't anything she wanted to be a part of... but after meeting with Dusty, a mutual friend and local crime lord, Andi finds herself drawn not only into Jax's occult case, but also Dante's SCPD case involving the murder of a well-known but low level criminal. Meanwhile, Jax's newest case had brought him around the world, searching holy buildings for secret doors that were hidden centuries ago by the very first members of the Occult Observation Alliance (OOA)... doors that he must now destroy in order to stop a global catastrophe. At first he is thrilled when the end of his search brings him back to Sheridan County, and he hopes to prod Andi's curiosity until she agrees to spend time with him helping on the case. But as more things go wrong and he receives more information about what's behind those doors, Jax begins to doubt his place within the OOA and in Andi's life... especially when his case crosses directly into Detective Dante's path. Originally published in 1918, with the memories of the war still harsh and fresh, Captain Belton and Lieutenant Odell's book of the war will be read with deep and sustained interest by everyone who wants to understand "the real thing." For myself I confess to being thrilled by the simple, direct, conversational style of the chapters describing the preparations for the attack on and ultimate capture of Vimy Ridge. The story is told with the terseness of a despatch. You see the battalion gathering for its deadly work after the training is done; you plod with it in Indian file along the Aux Reitz communication trench; you sprawl with the officers and men in the "jumping off" trench; you wonder whether the missing jar of rum will turn up in time, and, finally, you go "over the top" with what amounts to a sigh of relief that the ghastly period of waiting has ended and that the "Zero Hour" will mark either the end or the beginning of a strangely heroic experience. Here is the truth, and nothing but the truth, so you accept every word for what it is worth.
