Blackface minstrelsy, the nineteenth-century performance practice in which ideas and images of blackness were constructed and theatricalized by and for whites, continues to permeate contemporary popular music and its audience. Harriet J. Manning argues that this legacy is nowhere more evident than with Michael Jackson in whom minstrelsy's gestures and tropes are embedded. During the nineteenth century, blackface minstrelsy held together a multitude of meanings and when black entertainers took to the stage this complexity was compounded: minstrelsy became an arena in which black stereotypes were at once enforced and critiqued. This body of contradiction behind the blackface mask provides an effective approach to try and understand Jackson, a cultural figure about whom more questions than answers have been generated. Symbolized by his own whiteface mask, Jackson was at once 'raced' and raceless and this ambiguity allowed him to serve a whole host of others' needs - a function of the mask that has run long and deep through its tortuous history. Indeed, Manning argues that minstrelsy's assumptions and uses have been fundamental to the troubles and controversies with which Jackson was beset.

As new media mature, the changes they bring to writing in college are many and suggest implications not only for the tools of writing, but also for the contexts, personae, and conventions of writing. An especially visible change has been the increase of visual elements-from typographic flexibility to the easy use and manipulation of color and images. Another would be in the scenes of writing-web sites, presentation "slides," email, online conferencing and coursework, even help files, all reflect non-traditional venues that new media have brought to writing. By one logic, we must reconsider traditional views even of what counts as writing; a database, for example, could be a new form of written work. The authors of Writing New Media bring these ideas and the changes they imply for writing instruction to the audience of rhetoric/composition scholars. Their aim is to expand the college writing teacher's understanding of new media and to help teachers prepare students to write effectively with new media beyond the classroom. Each chapter in the volume includes a lengthy discussion of rhetorical and technological background, and then follows with classroom-tested assignments from the authors' own teaching.

The death of the book has been duly announced, and with it the end of brick-and-mortar libraries, traditional publishers, linear narrative, authorship, and disciplinarity, along with the emergence of a more equitable discursive order. These essays suggest that it won't be that simple. While the contributors to this volume are enthusiastic about the possibilities created by digital technologies, they also see the new media raising serious critical issues that force us to reexamine basic notions about rhetoric, reading, and the nature of discourse itself.
