The world of investing normally sees experts telling us the 'right' way to manage our money. How often do these experts pull back the curtain and tell us how they invest their own money? Never. How I Invest My Money changes that. In this unprecedented collection, 25 financial experts share how they navigate markets with their own capital. In this honest rendering of how they invest, save, spend, give, and borrow, this group of portfolio managers, financial advisors, venture capitalists and other experts detail the 'how' and the 'why' of their investments. They share stories about their childhood, their families, the struggles they face and the aspirations they hold. Sometimes raw, always revealing, these stories detail the indelible relationship between our money and our values. Taken as a whole, these essays powerfully demonstrate that there is no single 'right' way to save, spend, and invest. We see a kaleidoscope of perspectives on stocks, bonds, real assets, funds, charity, and other means of achieving the life one desires. With engaging illustrations throughout by Carl Richards, How I Invest My Money inspires readers to think creatively about their financial decisions and how money figures in the broader quest for a contented life. With contributions from: Morgan Housel, Christine Benz, Brian Portnoy, Joshua Brown, Bob Seawright, Carolyn McClanahan, Tyrone Ross, Dasarte Yarnway, Nina O'Neal, Debbie Freeman, Shirl Penney, Ted Seides, Ashby Daniels, Blair duQuesnay, Leighann Miko, Perth Tolle, Josh Rogers, Jenny Harrington, Mike Underhill, Dan Egan, Howard Lindzon, Ryan Krueger, Lazetta Rainey Braxton, Rita Cheng, Alex Chalekian

Every day of the year, Rick Law and Katherine Motley work with people ranging from healthy, vigorous baby boomers to the fragile remaining elders of the Depression and World War II generation. Rick and Kathy know that most retirees make lots of poor investment and legal choices—unsafe, complex, and with pie-in-the-sky promises. Want to sleep better? Read this book! It was written by two very talented people who work together to provide boomer retirees, maturing seniors and frail elders with legal and financial solutions. In this book Rick and Katherine join forces to share with you how to find the best place to stand in today's economic earthquake. They know that you are looking for four things from a legal and financial advisor: • Safety, because it's too hard to get back what you lost. • A reasonable rate of return on your money. Most people do not expect to be stock market wizards. They want a safe and consistent way to be able to support their lifestyle. • Simplicity, because nobody wants to be a fool. They want to make legal and financial decisions they can understand. • Income for life. Nobody wants to run out of money before they die. If you are out of money, then you are out of options. Both of their voices are heard throughout this book—informing, inspiring and amusing you throughout your cruise through retirement. With their help, it will be much smoother ride! Rock-and-roll icon and three-time bestselling author Nikki Sixx tells his origin story: how Frank Feranna became Nikki Sixx, chronicling his fascinating journey from irrepressible Idaho farmboy to the man who formed the revolutionary rock group Mötley Crüe. Nikki Sixx is one of the most respected, recognizable, and entrepreneurial icons in the music industry. As the founder of Mötley Crüe, who is now in his twenty-first year of sobriety, Sixx is incredibly passionate about his craft and wonderfully open about his life in rock and roll, and as a person of the world. Born Franklin Carlton Feranna on December 11, 1958, young Frankie was abandoned by his father and partly raised by his mother, a woman who was ahead of her time but deeply troubled. Frankie ended up living with his grandparents, bouncing from farm to farm and state to state. He was an all-American kid—hunting, fishing, chasing girls, and playing football—but underneath it all, there was a burning desire for more, and that more was music. He eventually took a Greyhound bound for Hollywood. In Los Angeles, Frank lived with his aunt and his uncle—the president of Capitol Records—for a short time. But there was no easy path to the top. He was soon on his own. There were dead-end jobs: dipping circuit boards, clerking at liquor and record stores, selling used light bulbs, and hustling to survive. But at night, Frank honed his craft, joining Sister, a band formed by fellow hard-rock veteran Blackie Lawless, and formed a group of his own: London, the precursor of Mötley Crüe. Turning down an offer to join Randy Rhoads's band, Frank changed his name to Nikki London, Nikki Nine, and, finally, Nikki Sixx. Like Huck Finn with a stolen guitar, he had a vision: a group that combined punk, glam, and hard rock into the biggest, most theatrical and irresistible package the world had ever seen. With hard work, passion, and some luck, the vision manifested in reality—and this is a profound true story finding identity, of how Frank Feranna became Nikki Sixx. It's also a road map to the ways you can overcome anything, and achieve all of your goals, if only you put your mind to it.

A fascinating life of Sir Joseph Banks which restores him to his proper place in history as a leading scientific figure of the English Enlightenment As official botanist on James Cook's first circumnavigation, the longest-serving president of the Royal Society, advisor to King George III, the "father of Australia," and the man who established Kew as the world's leading botanical garden, Sir Joseph Banks was integral to the English Enlightenment. Yet he has not received the recognition that his multifarious achievements deserve. In this engaging account, Toby Musgrave reveals the true extent of Banks's contributions to science and Britain. From an early age Banks pursued his passion for natural history through study and extensive travel, most famously on the HMS Endeavour. He went on to become a pivotal figure in the advancement of British scientific, economic, and colonial interests. With his enquiring, enterprising mind and extensive network of correspondents, Banks's reputation and influence were global. Drawing widely on Banks's writings, Musgrave sheds light on Banks's profound impact on British science and empire in an age of rapid advancement.

The first complete English translation of the nineteenth-century Austrian innovator's evocative, elemental cycle of novellas. For Kafka he was "my fat brother"; Thomas Mann called him "one of the most peculiar, enigmatic, secretly audacious and strangely gripping storytellers in world literature." Often misunderstood as an idyllic poet of "beetles and buttercups," the nineteenth-century Austrian writer Adalbert Stifter can now be seen as a radical experimenter with narrative and a forerunner of nature writing's darker currents. One of his best-known works, the novella cycle *Motley Stones* now appears in its first complete English translation, a rendition that respects the bracing strangeness of the original. In six thematically linked novellas, including the beloved classic "Rock Crystal," human dramas play out amid the natural cycles of the Alps or the urban rhythms of Vienna—environments so keenly observed that they emerge as the tales' most indomitable protagonists. Stifter's human characters are equally haunting—children braving perils, eccentrics and loners harboring enigmatic torments. "We seek to glimpse the gentle law that guides the human race," Stifter famously wrote. What he glimpsed, more often than not, was the abyss that lies behind the idyll. The tension between his humane sensitivity and his dark visions is what lends his writing its heartbreaking power.

Sheard redefines the concept of "retirement" as an issue of financial independence that can be achieved at any age. He spells out clearly, as no book has before, exactly how to set up and reach personal financial and lifestyle goals through savvy investing. Designed for boomers now in their peak earning years, the book cuts through the complicated formulas and actuarial tables to show readers how to figure out exactly how to plan for and achieve financial independence. Eschewing the traditional approach to retirement at 65, the book acknowledges that boomers are in a hurry. They want to get on with their lives, change careers, take sabbaticals -- in short, to pursue their dreams. By abandoning the age criteria and formulating a new approach to retirement, Sheard makes this possible. Using the techniques he made famous while with the Motley Fools, Sheard develops a framework that treats individuals as self-sustaining "foundations," living off a well-invested nest egg. He clearly shows the reader what steps to take in order to make financial independence possible. Mr. Sheard gained a broad following at The Motley Fool. His audience will undoubtedly be interested in Money For Life. He is now an investor columnist with the Microsoft Network.

Life is not lived all at once—it's lived in moments, days, months, years, and decades. This means that the financial plans and actions we all have to take to meet our responsibilities sensibly must be organized by years and decades. Ben Stein wrote the original guide to this subject almost a quarter century ago. Now, Ben, along with Phil DeMuth, the eminent financial planner and writer, have gotten together to update the book, incorporating the massive changes that have occurred in the economy in the past 25 years. This book tells you what and when to save, how much to save, what to save it in, when to spend, and when to say no to your present and yes to your future. Yes, You Can Get A Financial Life! is a time-traveling guidebook on how to organize the money side of your life for all of the decades of your life.

Do you have a real relationship with God, or do you just have a religion? Do you know God, or do you just know about God? In How Big Is Your God? Paul Coutinho, SJ, challenges us to grow stronger and deeper in our faith and in our relationship with God—a God whose love knows no bounds. To help us on our way, Coutinho introduces us to people in various world religions—from Hindu friends to Buddhist teachers to St. Ignatius of Loyola—who have shaped his spiritual life and made possible his deep, personal

relationship with God.

Doing well with money isn't necessarily about what you know. It's about how you behave. And behavior is hard to teach, even to really smart people. Money—investing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don't make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In *The Psychology of Money*, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life's most important topics.
