This book reveals the key trends in the modern Russian trade policy to provide a deeper understanding of the main challenges and barriers, possible paths and opportunities in its development. An international team of authors investigates specific factors influencing the Russian trade policy evolution; recent trends in Russia's international trade development; and the impact of Russia's participation in the World Trade Organization on the domestic economy. Particular attention is paid to regional integration processes that involve Russia and their outcomes; as well as challenges in the remaining and building commercial relations with Russia's traditional and 'new' trade partners, taking into consideration those alienating the West and economic sanctions regimes. The analysis of key trends is combined with a special focus on selected industries and economic partners of Russia. The book contains a variety of case studies investigating the ways in which political and business actors adapt to the transformation of Russian trade policy, how Russia participates in the WTO dispute settlement mechanism, and what the driving forces and outputs are for the national economic agents. Finally, the authors consider what the reasonable expectations might be regarding the future prospects of Russian trade policy. The book presents a unique, comprehensive and multidimensional analysis of modern Russian trade policy. Filling an important gap in the existing literature, this book will be of value to all those interested in Russia's economic development path.

Political Economy and International Economics is the fifth volume of collected essays by the noted economist Jagdish Bhagwati. Following Essays in International Economic Theory (edited by Robert Feenstra) and Essays in Development Economics (edited by Gene Grossman), it reflects Bhagwati's wide range of interests and his rare ability to combine economic theory and political analysis. Many of Bhagwati's writings provide fresh insights into old problems, from the theory of commercial policy, to foreign investment and labor migration; others open up new areas such as services to analysis. Recent work on the theory of political economy, including DUP (directly unproductive profit-seeking) activities and quid pro quo direct investment, breaks new ground. Also included are a number of previously inaccessible lectures covering such important issues as poverty and public policy. Cutting across several fields of economics, including public finance and development, these provide masterly syntheses and overviews of broader issues. Jagdish Bhagwati is Arthur Lehman Professor of Economics and Professor of Economics at Columbia University. He is the founding editor of the new journal Economics and Politics. Douglas A. Irwin is an economist with the Board of Governors of the Federal Reserve System.
