The first of the US Baby Boomers, who were born between 1946 and 1964, reached 65 years old on January 1, 2011. They will retire at an average rate of 4.5 +/- 0.5 million per year, or 12,300 every day over those next 18 years. (Source: "The Demographic Cliff " page 19, Figure 1-5 immigration adjusted birth index by Harry S. Dent, Jr.) Some will buy an RV to travel in North America. Some will go full time and become Snow Birds, going south in the winter and North in the summers, other, like us, will live at home and travel only in the best season for an area. We were often asked about our choice of a small RV without a tow. Our answer is that the size of your RV depends on how much stuff you must carry to support your lifestyle. RVs larger than 25 feet start to have maneuverability problems on normal streets, tight corners, parking lots, bridge limit due to their weight, and sinking in soft ground when parked. These problems are solved with an additional smaller tow vehicle that is used for touring, resulting in a different way to tour than ours. Now, that large RV must first be parked where it will not be broken into before going off to tour in the tow vehicle and then retrying to the your RV for the night. Our way is we do our touring directly from our small RV, moving on to the next RV Park for the night. We also travel at the cars speed limits rather than the reduced speed limit for those that tow.

Offering invaluable sightseeing tips, advice on fun activities, and detailed descriptions of campgrounds, this grand tour of Mexico's Baja Peninsula provides both RV and tent campers with the best resources for planning a vacation chock-full of beaches, backroads, golf, fishing, and water sports. The tour centers around one of the most interesting highways in the world, a two-lane ribbon of asphalt winding southward to Cabo San Lucas, from the Pacific Ocean to the Sea of Cortez and back again, including such details as border crossings, document requirements, vehicle preparation, and road conditions. In addition to describing the formal campgrounds of Baja, featuring location maps, recreational opportunities, lists of facilities, and driving instructions from nearby towns and routes, this guide also provides telephone numbers, websites, e-mail addresses, GPS coordinates, and picture icons that offer a convenient, quick review of each campground. Hit the road and experience the wonders of RVing with these useful tips and tricks to make RV life easier, more organized, more efficient, and fun! Welcome to RV life! Whether you're a first-timer or an experienced RVer, these RV hacks are sure to make life on the road easier so you can worry less and have more fun. From ingenious organizational hacks (like broom holders to keep flashlights at the ready or suction cup shower organizers to corral kids' activity supplies) to ideas for repurposing plastic bottles to make a funnel or pancake batter mixer, RV Hacks has everything you need to make your next cross-country caravanning adventure carefree.

July 2019 Printed in BLACK AND WHITE The Army's Weapon Systems Handbook was updated in July 2019, but is still titled "Weapon Systems Handbook 2018." We are printing this in black and white to keep the price low. It presents many of the acquisition programs currently fielded or in development. The U.S. Army Acquisition Corps, with its 36,000 professionals, bears a unique responsibility for the oversight and systems management of the Army's acquisition lifecycle. With responsibility for hundreds of acquisition programs, civilian and military professionals collectively oversee research, development and acquisition activities totaling more than \$20 billion in Fiscal Year 2016 alone. Why buy a book you can download for free? We print this so you don't have to. We at 4th Watch Publishing are former government employees, so we know how government employees actually use the standards. When a new standard is released, somebody has to print it, punch holes and put it in a 3-ring binder. While this is not a big deal for a 5 or 10-page document, many DoD documents are over 400 pages and printing a large document is a time-consuming effort. So, a person that's paid \$25 an hour is spending hours simply printing out the tools needed to do the job. That's time that could be better spent doing mission. We publish these documents so you can focus on what you are there for. It's much more cost-effective to just order the latest version from Amazon.com. Since the post World War Two boom in private automobile ownership, Drive Tourism has transformed the tourism landscape by facilitating dispersal and the growth of attractions and tourism related infrastructure beyond the zones that had previously emerged around seaports and railway terminals. The automobile has made regional dispersal possible and created opportunities for many small rural communities to supplement rural economies with a tourism economy. Drive Tourism is a popular form of tourism activity that has significantly contributed to the development of Tourism in many nations, but has received relatively little attention in the literature. This book is the first attempt to provide a global comprehensive review and scholarly investigation into this popular and growing form of tourism. It draws on a vast range of geographical locations to critically explore the impacts of drive tourism in developed and underdeveloped regions. It evaluates tourism authorities' response to the Drive Tourism Experience, and offers operational insights into the management of the drive experience as well as providing original empirical research and insights into the field that will contribute to future investigation. In doing so it explores the many forms of drive tourism from caravanning to fly drive touring.

A tiny American town's plans for radical self-government overlooked one hairy detail: no one told the bears. Once upon a time, a group of libertarians got together and hatched the Free Town Project, a plan to take over an American town and completely eliminate its government. In 2004, they set their sights on Grafton, NH, a barely populated settlement with one paved road. When they descended on Grafton, public funding for pretty much everything shrank: the fire department, the library, the schoolhouse. State and federal laws became meek suggestions, scarcely heard in the town's thick wilderness. The anything-goes atmosphere soon caught the attention of Grafton's neighbors: the bears. Freedom-loving citizens ignored hunting laws and regulations on food disposal. They built a tent city in an effort to get off the grid. The bears smelled food and opportunity. A Libertarian Walks Into a Bear is the sometimes funny, sometimes terrifying tale of what happens when a government disappears into the woods. Complete with gunplay, adventure, and backstabbing politicians, this is the ultimate story of a quintessential American experiment -- to live free or die, perhaps from a bear.

A scorching, trenchant, analysis of how the wealthiest group in American society is making life miserable for everyone—including themselves. In 21st century America, the top 0.1% of the wealth distribution have walked away with the big prizes even while the bottom 90% have lost ground. What's left of the American Dream has taken refuge in the 9.9% that lies just below the tip of extreme wealth. Collectively, the members of this group control more than half of the wealth in the country—and they are doing whatever it takes to hang on to their piece of the action in an increasingly unjust system. They log insane hours at the office and then turn their leisure time into an excuse for more career-building, even as they rely on an underpaid servant class to power their economic success and satisfy their personal needs. They have segregated themselves into zip codes designed to exclude as many people as possible. They have made fitness a national obsession even as swaths of the population lose healthcare and grow sicker. They have created an unprecedented demand for admission to elite schools and helped to fuel the dramatic cost of higher education. They channel their political energy into symbolic conflicts over identity in order to avoid acknowledging the economic roots of their privilege. And they have created an ethos of "merit" to justify their advantages. They are all around us. In fact, they are us—or what we are supposed to want to be. In *The 9.9 Percent*, Matthew Stewart argues that a new aristocracy is emerging in American society and it is repeating the mistakes of history. It is entrenching inequality, warping our culture, eroding democracy, and transforming an abundant economy into a source of misery. He calls for a regrounding of American culture and politics on a foundation closer to the original promise of America.

The Corps of Royal Electrical and Mechanical Engineers (REME) provides the Army's integral repair and recovery capability. Its soldiers are deployed at the front line and have to be capable of switching instantly from a technical role to fighting alongside those they support, as their many awards for gallantry demonstrate. This, the third volume of REME's distinguished history covers the period from post-Cold War drawdown to the end of UK combat operations in Afghanistan, during which time REME was continuously involved in operations. The narrative knits together personal accounts of front line experiences with an explanation of the political and military background, with a particular focus on equipment support issues. It explains how REME operates and deals with broader issues related to the procurement and support of equipment, and the changing organizations delivering these vital services, within which members of REME have frequently played key enabling roles.

When an armored car hijacking leaves two men dead, Arizona Sheriff Jim Weber takes the crime personally, because one of the dead men is his brother-in-law. His hunt for the killers leads him into a world of sordid sex, deceit, and violence, with a suspect list that includes jilted women, a family of anti-government survivalists, and the beautiful wife of the richest man in town. With a plot that has more twists and turns than an Arizona mountain road, a cast of characters you won't soon forget, and a shocking ending that shakes the town of Big Lake to its very foundation, this first book in the Big Lake series will keep you turning pages to the very end

This book is the definitive guide to building or rebuilding an effective, successful, and profitable Commercial Truck Operation within a retail auto dealership. This handbook serves as a guide to deploying battery energy storage technologies, specifically for distributed energy resources and flexibility resources. Battery energy storage technology is the most promising, rapidly developed technology as it provides higher efficiency and ease of control. With energy transition through decarbonization and decentralization, energy storage plays a significant role to enhance grid efficiency by alleviating volatility from demand and supply. Energy storage also contributes to the grid integration of renewable energy and promotion of microgrid.

This book is a compilation of the best tips submitted by readers of the Trailer Life magazine column "10-Minute Tech." Photos, postcards, and ads featuring vintage trailers—from humble family vacations to Hollywood stars. Trailerama provides a visual wonderland filled with imagery featuring these vintage vehicles, fondly recalled for their associations with fun, adventure, family vacations—and of course, movie stars on the set. From greeting cards to postcards to Hollywood photos, the travel trailer is put on grand display in this kitschy celebration culled from the coffers of Trailer Travel's Phil Noyes. "Filled with colorful images of trailers. Culled from ads, postcards, sheet music, and more, they run the gamut from the earliest mobile coaches in the 1930s to the roving behemoths that came to dominate the market in later decades...Noyes documents the country's still smoldering love affair with life on the road."—Los Angeles Magazine

This book takes a look at fully automated, autonomous vehicles and discusses many open questions: How can autonomous vehicles be integrated into the current transportation system with diverse users and human drivers? Where do automated vehicles fall under current legal frameworks? What risks are associated with automation and how will society respond to these risks? How will the marketplace react to automated vehicles and what changes may be necessary for companies? Experts from Germany and the United States define key societal, engineering, and mobility issues related to the automation of vehicles. They discuss the decisions programmers of automated vehicles must make to enable vehicles to perceive their environment, interact with other road users, and choose actions that may have ethical consequences. The authors further identify expectations and concerns that will form the basis for individual and societal acceptance of autonomous driving. While the safety benefits of such vehicles are tremendous, the authors demonstrate that these benefits will only be achieved if vehicles have an appropriate safety concept at the heart of their design. Realizing the potential of automated vehicles to reorganize traffic and transform mobility of people and goods requires similar care in the design of vehicles and networks. By covering all of these topics, the book aims to provide a current, comprehensive, and scientifically sound treatment of the emerging field of "autonomous driving".

Vintage camper trailers are a unique symbol of midcentury America that resonates with many people. This book introduces many of those people, along with the trailers they've lovingly maintained or restored. It includes hundreds of photographs of everything from fancy and comfortable trailers designed for glamping (glamorous camping), to trailers handed down through families across generations, and even entrepreneurs who have transformed their trailers into vending booths. Paul Lacitinola enjoys everything about vintage camper trailers, including rescuing, restoring, and rallying. In 2011, he began publishing the first U.S.-based magazine for collectors, restorers, and admirers of American-made camper trailers, Vintage Camper Trailers, which now has thousands of subscribers in more than a dozen different countries. He lives in Elverta, California.

Strings Attached is the story of a brilliant, but ferocious music teacher who came to be known as Mr K. A Ukrainian immigrant who survived an abusive childhood to become a noted resident and teacher, Mr K used music as a means of escape. The authors, who spent their childhoods in the late 60s and 70s, rehearsing and playing together as young musicians, bring the extraordinary character of Mr K to life - from his days as a forced Nazi labourer; to his home life as a husband to an invalid wife; to his heart-breaking search to find his missing daughter; to the terrifying challenges he huddled from behind the music stand.

The Airstream is an eye-catching vintage classic. First appearing on American highways in the early 1930s, these sleek aluminum icons were compact, cozy spaces that could be hitched to the family car and taken out on the open road – and nearly a century later their timeless design has lost none of its appeal, with the Airstream enjoying renewed popularity among celebrities, event planners and young travelers who appreciate its air of nostalgia and distinctively American blend of functionalism and beauty. Born in the California backyard of inventor Wally Byam and partly inspired by the work of Hawley Bowlus, the famed chief builder of The Spirit of St. Louis, the Airstream's modernist aesthetic has remained relatively unchanged in eight decades, and its industrial durability has earned a reputation without equal, with more than 65% of all Airstreams still on the road today. The book features the complete history of the Airstream, tips, cool facts, quotes and fabulous photographs—a fitting tribute to a true American legend. Whether you're downsizing or thrill-seeking—or anything in between—find out if the RV lifestyle is right for you, and learn how to transition from a life of traditional home-ownership to one on the road. "We were certainly pioneers as the Trieste was one of only two such vehicles in the world—the French Navy's bathyscaphe FNRS-3 was the other. It meant that we had to 'write the book' about deep submergence operations in terms of technique and technologies. We learned by doing and by failures, although very few of the latter were serious. For example, if we needed a piece of equipment we would have to design it and make it. There were no commercial vendors who catered to deep submergence technology requirements. The market was far too small."—From the foreword by Capt. Don Walsh, USN (Ret.), PhD, U.S. Navy Submersible Pilot No. 1? Developed by French physicist Auguste Piccard and his son Jacques, the bathyscaph Trieste was a scientific marvel that allowed unprecedented scientific, technical, and military feats in the ocean depths. France and the United States both acquired and subsequently developed variants of the original bathyscaph. While both France and the United States employed??the bathyscaph as a tool for scientific investigation of the deepest ocean depths, the U.S. Navy developed and employed the Trieste for military missions as well.?From its earliest years, participants in the Trieste program realized that they were making history, blazing a trail into previously unexplored and unexploited depths, developing new capabilities and opening a new frontier. Comparisons with developments in space and the space-race between the United States and the Soviet Union often were?made? concerning the Trieste program and contemporary developments in undersea technologies and capabilities.? The Trieste opened the entire oceans to exploration, exploitation, and operations. The bathyscaph was a first-generation system, a "Model-T" that spawned an entirely new industry and encouraged new concepts for deep-ocean naval operations. Advances in deep-sea technologies lacked the "gee-whiz" factor of the concurrent space?race, but were highly significant in the development of new technology, new knowledge, and new military capabilities.? Opening the Great Depths is the story of the three Trieste? deep-ocean vehicles, their? officers and enlisted men, and the civilians, often told in their own words, documenting for the first time the earliest years of humanity's probing into Earth's final frontier.?

David Rosenfelt's Dogtripping is moving and funny account of a cross-country move from California to Maine, and the beginnings of a dog rescue foundation When mystery writer David Rosenfelt and his family moved from Southern California to Maine, he thought he had prepared for everything. They had mapped the route, brought three GPSs for backup, as well as refrigerators full of food, and stoves and microwaves on which to cook them. But traveling with twenty-five dogs turned out to be a bigger ordeal than he anticipated, despite the RVs, the extra kibble, volunteers (including a few readers), and camping equipment. Rosenfelt recounts the adventure of moving his animal companions across the United States with humor and warmth, and tells the tale of how he and his wife became passionate foster parents for rescue dogs, culminating in the creation of the Tara Foundation and successfully placing several thousand dogs with loving families.
