In Rappelling you'll find everything you need to know about descending a rope, from the most basic to advanced techniques, including knots, rigging strategies, rappel devices, and more. Included is a comprehensive discussion of ropes, slings, and all the hardware used in rappelling. Rappelling techniques for climbing are covered in detail, including multi-pitch rappelling methods and rope management. Single rope fixed line rappelling techniques used in caving, canyoneering, and for industrial applications are also discussed, along with improvised rope ascending techniques ("prusiking") and ascending a fixed rope with mechanical ascenders ("jumaring"). Rappelling accident analysis and prevention is also included, along with a section on rappel back-ups and safety checks. Inside you'll find information on: Ropes Rappel devices Slings and webbing Knots and hitches Rigging rappel anchors Rappelling methods Rope retrieval techniques Rappelling accident analysis Rappel safety back-ups Working with fixed lines Rope ascending techniques

A family, separated by duty and distance, waits for a loved one to return home in this lyrical picture book celebrating the bonds of a Cherokee family and the bravery of history-making women pilots. At the mountain's base sits a cabin under an old hickory tree. And in that cabin lives a family -- loving, weaving, cooking, and singing. The strength in their song sustains them through trials on the ground and in the sky, as they wait for their loved one, a pilot, to return from war. With an author's note that pays homage to the true history of Native American U.S. service members like WWII pilot Ola Mildred "Millie" Rexroat, this is a story that reveals the roots that ground us, the dreams that help us soar, and the people and traditions that hold us up.

CLICK HERE to download the first 50 pages from Climbing the Seven Summits * First and only guidebook to climbing all Seven Summits * Full color with 125 photographs and 24 maps including a map for each summit route * Essential information on primary climbing routes and travel logistics for mountaineers, with historical and cultural anecdotes for armchair readers Aconcagua. Denali. Elbrus. Everest. Kilimanjaro. Kosciuszko. Vinson. To a climber, these mountains are known as the Seven Summits* -- the highest peaks on each continent. If you've ever dreamed of climbing Denali or Everest, or joining the even more exclusive "Seven Summiters " club, then Climbing the Seven Summits is the guidebook you need to turn your dream into reality. With Mike Hamill as your guide, you will discover different approaches to tackling the list, as well as details on what you'll need to plan an expedition and what to expect from each climb. For each mountain you'll learn about documents and immunizations, expedition costs, training, guiding options, climbing styles, best seasons, essential gear, day-by-day itineraries, summit routes, maps showing approaches and camps, regional natural history, cultural notes, and even post-climb activities like going on safari in Africa or wine-touring in South America. Throughout you'll also find helpful and inspiring stories from the likes of Conrad Anker, Vern Tejas, Damien Gildea, Eric Simonson, and other famed climbers. Special insider tips from Hamill, based on his years of experience, as well as full-color photographs of each peak round out this collectible guidebook. And, because there remains some controversy about whether Kosciuszko in Australia or Carstenz Pyramid on the island of New Guinea is the "seventh summit," this guidebook to the Seven Summits actually covers eight mountains! *Within mountaineering circles there is debate over which peaks are considered the official Seven Summits. For the purposes of this guidebook, the Seven Summits are based on the continental model used in Western Europe, the United States, and Australia, also referred to as the 'Bass list.'

Sport, Outdoor Life and the Nordic World explores the Nordic model of sport and outdoor life with respect to such issues as sport facilities, mountain guiding, women and ethnic minorities, urban planning, anti-doping, health, elite sport coaching and leadership, and the globalization of sport. The aims of the volume are twofold. First, it advances knowledge of Nordic sport and outdoor life, as important fields of social activity in their own rights. Second, it enhances the understanding of the 'Nordic model' of society, and the ways in which this is constructed, explored and challenged within and through sport and outdoor life activities. In doing so, the contributors explore a range of key themes, notably: how modern Nordic sport and outdoor life activities emerged and are organized through specific social policies; how they may challenge or harbour forms of social exclusion, particularly in regard to gender or minority populations; how they are affected by, and respond to, deviant practices such as doping; how they may contribute to alleviating social problems; and how they confront major structural challenges and changes, such as the impacts of globalization and the continuing dominance of neoliberal economic policies. Interdisciplinary in approach, Sport, Outdoor Life and the Nordic World is essential reading for those studying Nordic sports and societies, and will also appeal to students, academics and wider readers with interests in sport studies, sociology, social policy, cultural studies, anthropology and public health. The chapters were originally published as a special issue of Sport in Society.

On January 20, 2003, at 10:45 a.m., a massive avalanche in the Selkirk Range of British Columbia struck three members of two guided backcountry skiing groups and buried them. After a frantic hour of digging by those still standing, an unthinkable outcome became reality: seven people were dead. The tragedy made international news, splashing photos of the seven dead Canadian and US skiers on television screens and newspaper pages. The official analysis was that guide error was not a contributing factor in the accident. This interpretation was insufficient for some of the victims' families, the public and some members of the guiding community. Buried is the assistant guide's story. It renders an answerable truth about what happened by delving deep into the human factors that played into putting people in harm's way as well as the peace that comes from accountability and the personal growth that results from understanding.

In May 1993 the British Mountaineering Council met to discuss the future of high altitude tourism. Of concern to attendees were reports of queues on Everest and reference was made to mountaineer Peter Boardman calling Everest an 'amphitheater of the ego'. Issues raised included environmental and social responsibility and regulations to minimize impacts. In the years that have followed there has been a surge of interest in climbing Everest, with one day in 2012 seeing 234 climbers reach the summit. Participation in mountaineering tourism has surely escalated beyond the imagination of those who attended the meeting 20 years ago. This book provides a critical and comprehensive analysis of all pertinent aspects and issues related to the development and the management of the growth area of mountaineering tourism. By doing so it explores the meaning of adventure and special reference to mountain-based adventure, the delivering of adventure experience and adventure learning and education. It further

introduces examples of settings (alpine environments) where a general management framework could be applied as a baseline approach in mountaineering tourism development. Along with this general management framework, the book draws evidence from case studies derived from various mountaineering tourism development contexts worldwide, to highlight the diversity and uniqueness of management approaches, policies and practices. Written by leading academics from a range of disciplinary backgrounds, this insightful book will provide students, researchers and academics with a better understanding of the unique aspects of tourism management and development of this growing form of adventure tourism across the world.

With its prominent profile recognizable for miles around and featuring vistas among the most beloved in the Appalachians, North Carolina's Grandfather Mountain is many things to many people: an easily recognized landmark along the Blue Ridge Parkway, a popular tourist destination, a site of annual Highland Games, and an internationally recognized nature preserve. In this definitive book on Grandfather, Randy Johnson guides readers on a journey through the mountain's history, from its geological beginnings millennia ago and the early days of exploration to its role in regional development and eventual establishment as a North Carolina state park. Along the way, he shows how Grandfather has changed, and has been changed by, the people of western North Carolina and beyond. To tell the full natural and human story, Johnson draws not only on historical sources but on his rich personal experience working closely on the mountain alongside Hugh Morton and others. The result is a unique and personal telling of Grandfather's lasting significance. The book includes more than 200 historical and contemporary photographs, maps, and a practical guide to hiking the extensive trails, appreciating key plant and animal species and photographing the natural wonder that is Grandfather.

Complete with maps and an invaluable trip planning section detailing the information needed to make your trip an unforgettable success, Baffin Island is the first comprehensive adventure guide to the fifth largest island in the world, which is quickly becoming known as a premiere destination for climbers, skiers, trekkers and adventure travellers alike.

Descriptive inquiry into the neurochemistry of extreme sports.

Ranging geographically from Tierra del Fuego to California and the Caribbean, and historically from early European sightings and the utopian projects of would-be colonizers to the present-day cultural politics of migrant communities and international relations, this volume presents a rich variety of case studies and scholarly perspectives on the interplay of diverse cultures in the Americas since the European conquest. Subjects covered include documentary and archaeological evidence of cultural interaction, the collection of native artifacts and the role of museums in the interpretation of indigenous traditions, the cultural impact of Christian missions and the representation of indigenous cultures in writings addressed to European readers, the development of Latin American artistic traditions and the incorporation of motifs from European classical antiquity into modern popular culture, the contribution of Afro-descendants to the cultural mix of Latin America and the erasure of the Hispanic heritage from cultural perceptions of California since the nineteenth century. By offering accessible and well-illustrated accounts of a wide range of particular cases, the volume aims to stimulate thinking about historical and methodological issues, which can be exploited in a

* For climbers who know the basics and are ready to venture at higher altitudes* Written by longtime guides and climbing instructors certified by the American Mountain Guide Association (AMGA)* Teaches situational thinking and learning as well as technique This intermediate-level guide addresses tools, skills, and techniques used in alpine terrain including rock, snow, ice, and glaciers at moderate altitude - approximately 5000 meters (16,000 feet) and lower. The technical protection systems are covered, of course. But 30 years of alpine climbing experience has convinced the authors that mastery - and safety - lie in the far more difficult task of knowing exactly which techniques to use, where and when. Therefore, they teach step-by-step decision-making skills, providing scenarios, checklists, and self-posed questions to

Geotourism, as a form of sustainable geoheritage tourism, was defined and developed, from the early 1990s, to contextualize modern approaches to geoconservation and physical landscape management. However, its roots lie in the late seventeenth century and the emergence of the Grand Tour and its domestic equivalents in the eighteenth century. Its participants and numerous later travellers and tourists, including geologists and artists, purposefully explored wild landscapes as 'geotourists'. The written and visual records of their observations underpin the majority of papers within this volume; these papers explore some significant geo-historical themes, organizations, individuals and locations across three centuries, opening with seventeenth century elite travellers and closing with modern landscape tourists. Other papers examine the resources available to those geotourists and explore the geotourism paradigm. The volume will be of particular interest to Earth scientists, historians of science, tourism specialists and general readers with an interest in landscape history.

The previous edition of this directory extended its coverage of the Far East, Australasia and Latin America, areas previously under-represented. For this new edition emphasis has been given to increasing the number of entries for organizations from Britain, the United States and Australia, and particular attention has been paid to new political organizations in Central and Eastern Europe and the former Soviet Union. The number of entries included has gone up to over 68,000 of which over 9,000 are new or amended. Cross-references from defunct organizations in the previous edition have been deleted, and references (indicated by ex and now) added for organizations which have changed their name since the previous edition. As before, the range of organizations included is broad and only purely local organizations have been excluded. This directory therefore lists official and unofficial organizations, national and international, on all Subjects: political, economic and social. Acronyms of parent bodies of subsidiary organizations are given where appropriate and equivalencies are used to link acronyms in different languages for the same organization. Further information about the organizations listed can be found in the sources listed in the bibliography.
