The ideal course companion, Elements of Physical Chemistry is written specifically with the needs of undergraduate students in mind, and provides extensive mathematical and pedagogical support while remaining concise and accessible. For the seventh edition of this much-loved text, the material has been reorganized into short Topics, which are grouped into thematic Focuses to make the text more digestible for students, and more flexible for lecturers to teach from. At the beginning of each Topic, three questions are posed, emphasizing why it is important, what the key idea is, and what the student should already know. Throughout the text, equations are clearly labeled and annotated, and detailed 'justification' boxes are provided to help students understand the crucial mathematics which underpins physical chemistry. Furthermore, Chemist's toolkits provide succinct reminders of key mathematical techniques exactly where they are needed in the text. Frequent worked examples, in addition to self-test questions and end-of-chapter exercises, help students to gain confidence and experience in solving problems. This diverse suite of pedagogical features, alongside an appealing design and layout, make Elements of Physical Chemistry the ideal course text for those

studying this core branch of chemistry for the first time.

Inequalities in incomes and wealth have increased in advanced countries, making our economies less dynamic, our societies more unjust and our political processes less democratic. As a result, reducing inequalities is now a major economic, social and political challenge. This book provides a concise yet comprehensive overview of the economics of inequality. Until recently economic inequality has been the object of limited research efforts, attracting only modest attention in the political arena; despite important advances in the knowledge of its dimensions, a convincing understanding of the mechanisms at its roots is still lacking. This book summarizes the topic and provides an interpretation of the mechanisms responsible for increased disparities. Building on this analysis the book argues for an integrated set of policies addressing the roots of inequalities in incomes and wealth. Explaining Inequality will be of interest to students, researchers and practitioners concerned with inequality, economic and public policy and political economy.

To the best of our knowledge, the 1st Global AIGS Consensus Meeting on ""Structure and Function in the Management of Glaucoma"" was also the first global consensus meeting in ophthalmology. The goal was to reach an evidence-

based consensus for both clinical practice and research through the use of information obtained from peer-reviewed literature describing functional and structural diagnostic testing in glaucoma. The faculty and review group consisted of leading global authorities on glaucoma diagnostic testing. The preparation for the Consensus was unique in its format (see page xii). Repor.

communities large and small and across all socio-economic classes. What should each of us know about it, and do about it? *Unstitched* moves readers from feelings of helplessness and blame into empathy, ultimately helping friends, family, and community members separate the disease of addiction from the person underneath. A stranger, rumored to be a heroin addict, repeatedly breaks into the small-town library Brett Ann Stanciu runs. After she tries to get law enforcement to take meaningful action against him—elementary school children and young parents with babies frequent the place after all—he dies by suicide. When she realizes how little she knows about opioid misuse, she sets out on a mission, seeking insight from others, such as people in recovery, treatment providers, the town police chief, and Vermont's US attorney. Stanciu's journey leads to compassionate generosity, renewed faith, and ultimately a measure of personal redemption as she realizes she has a role to play in helping the people of her community stitch themselves back together.

In the 1950s and 1960s, luxury car buyers, from government ministers to captains of industry, almost invariably bought British. These were stately, dignified, and grand vehicles, with many featuring leather interiors and wood trim. Unfortunately, that market has now largely disappeared and, with it, so have the car-makers themselves. This new book covers cars in the over-3-litre class from the biggest names in British luxury motoring including Alvis, Daimler,

and Lagonda, and high-end models from Austin, Rover, and Jaguar. It examines the features and characteristics of these classic cars, as well as explaining why they fell from prominence in the 1970s. Replete with beautiful photography throughout, this book is a loving portrait of the British luxury car, a dearly missed saloon defeated by foreign imports.

There's a headless corpse in their hallway and the clerk at the Trinity Moons Motel was eaten by wild pigs. After that the night took a real turn for the worse. Now Lucy Barrot finds herself alone in a strange hospital and her missing husband is a suspected serial killer. She's got a marking on her stomach that has the town talking and the local Church folk want answers. That's the last thing she remembers before they took her to Roch House.

"It was a mistake to come here." Japan, 1864. The Tokugawa shogunate, the ruling government for the past 250 years, is locked in a bitter battle for supremacy with a group of rebellious clans, who desire to overthrow the shogunate and restore the emperor to supreme power. Considered rebels by the government, the bloodiest of the clans are the Choshu who will stop at nothing to eliminate the shogunate and destroy its power. The Choshu's chief weapon is Yotoko Mizuki, a seventeen-year-old assassin with the ominous nickname of 'Battosai', or 'Man Killer'. Feared even by the Choshu, Mizuki is cool, unemotional, ruthless, and hiding a dark secret. The feared 'Battosai' is actually a girl! Masquerading for years as a boy, Mizuki secretly longs for a normal, peaceful life as a girl. After a tragic accident leaves her emotionally scarred, she abandons her former life as an assassin and mysteriously shows up in Kyoto determined to leave a normal life as a normal girl and vowing to never kill again. That vow, however, is short-lived, and the killing begins anew. Her actions draw the attention of the Shinsengumi, a new police force hired as peace-keepers in Kyoto. Impressed by her skills, the Shinsengumi offer her an unexpected sparring match with the genius swordsman, Okita Souji, captain of the first unit of the Shinsengumi. When Souji finds that his greatest enemy is a woman, swords clash and sparks fly. Though bested by her, Souji is unexpectedly attracted to Mizuki. Forced to stay with the Shinsengumi under house arrest, Mizuki slowly begins to realize that here she can have a normal life. Her relationship with Souji grows closer by the day, and the two eventually realize they are in love. But her former leader, Toshimaru Yoshida, of the Choshu, has his own agenda for the young woman. Determined to get her back at any cost, Yoshida heads to Kyoto with a group of men and a violent confrontation with Mizuki and the Shinsengumi, pitting the two lovers against each other in a dangerous game of lies and

accusations. Can Souji protect Mizuki from the demons of her past, or will she be lost to him forever?

The first volume in a series reprinting the Buz Sawyer strip reprints all of the daily strips published during WWII. Buz serves aboard an aircraft carrier, flies combat missions against the notorious Japanese Zeros, crash lands behind enemy lines and is captured by a Japanese submarine. Also includes a selection of the best of the Sunday strips, which feature Buz Sawyer's pal and gunner, Roscoe Sweeny. This volume showcases some of Crane's most atmospheric drawings, aided by his expert use of Craftint tones, luscious romance and exciting action.
