Presents the latest research in Egyptology on the theme of Ancient Egypt in a Global World This selection of 23 papers from the 15th annual Current Research in Egyptology symposium addresses the interregional and interdisciplinary theme of "Ancient Egypt in a Global World". This theme works on a number of levels highlighting the current global nature of Egyptological research and it places ancient Egypt in the wider ancient world. The first section presents the results of recent excavations, including in the western Valley of the Kings and analysis of the structures, construction techniques, food production and consumption remains at Tell Timai (Thmuis) in the Delta. Part II focuses on the cross-cultural theme with papers including discussions on the presence in India of terracotta figurines from Roman Egypt; the ancient Egyptian influence of Aegean lion-headed divinities; Libyan influence in New Kingdom and Third Intermediate Period Egyptian administration and the identification of ancient Egyptian finds from the British countryside reported to the Portable Antiquities Scheme. The third part of the book includes current research undertaken across the world of Egyptology, including analysis of late Roman crocodile mummies through non-invasive radiographic imaging techniques and the study of infant jar-burials in ancient Egypt and Sudan to identify differences in regional socio-economic contexts and the interaction between people and local resources. Branded as "the new Falun Gong" by local authorities, The Church of Almighty God is the most persecuted religious movement in China today. Thousands of police officers are deployed full time to identify and arrest its members. Hundreds of thousands of its devotees are in jail. Authorities claim, perhaps hyperbolically, that it has some four million members and accuse the group of serious crimes. Yet, the movement continues to grow. In this ground-breaking study, Massimo Introvigne offers an inside look at this once-elusive movement, sharing interviews with hundreds of members and the Chinese police officers who hunt them down. The story of The Church of Almighty God is one of rapid growth, dramatic persecution, and the

struggle of believers to seek asylum in countries around the world. In his telling of the story, Introvigne reconstructs the Church's idiosyncratic theology, centered in the belief that Jesus Christ has returned in our time in the shape of a Chinese woman, worshipped as Almighty God, to eradicate the sinful nature of humans, and that we have entered the third and final time period in the history of humanity: the Age of Kingdom. A major book from one of the world's leading scholars of new religious movements, *Inside The Church of Almighty God* is a critical addition to the scholarship of Chinese religion.

Images play a key role for scholarly work in many ways – they facilitate communication and support understanding or make research results look more appealing. At the same time powerful image-editing programs have profoundly changed how image manipulations are perceived today. This book explores how scholars from different domains conceive image manipulation. The study is based on research carried out at the Interdisciplinary Laboratory Image Knowledge Gestaltung at Humboldt University Berlin. Informants from the field of biology, computer science, art history and design explain how they differentiate between appropriate and inappropriate image manipulation. Furthermore these experts report on whether guidelines or practical logics shape their work with images.
